

ANNUAL REPORT

2022

welltower[®]

LETTER FROM THE CEO

Dear Fellow Shareholders,

While current macroeconomic conditions remain highly uncertain with heightened concerns surrounding economic growth, inflation, and the health of the banking system, I am pleased to report that Welltower's prospects have only *improved* as we've entered 2023. The recession-resilient nature of our business model has been on full display in recent quarters, with stellar top-line growth being reported from our seniors housing business just as the economy has shown signs of cooling. To be clear, we may not be completely immune from exogenous shocks which may surface and we will not take anything for granted in the current environment. However, we believe that the drivers of our business are only getting better, setting the stage for an extended period of outsized growth.

I can confidently say that the future for Welltower has never appeared brighter than it does today.

UNPRECEDENTED INTERNAL & EXTERNAL GROWTH DRIVERS

Within the real estate space, rarely do companies have the *simultaneous* opportunity to drive growth through both operations (internal growth) and capital deployment (external growth). This is because, usually, when fundamentals are robust, capital quickly flows to the sector, driving asset prices higher. However, we currently find ourselves in a period in which organic growth is clearly accelerating and acquisition opportunities and pricing are growing more attractive for us.

I've previously spoken about the rare and powerful combination we are currently witnessing with a cyclical recovery in seniors housing fundamentals superimposed on demographic-driven secular tailwinds. I'll now add another dimension to this equation: our efforts to optimize the seniors housing business through an operating platform unlike anything seen in the industry (i.e. structural change or disruption). I'll touch upon each of these important drivers below but, suffice it to say, we believe that the result of this "trifecta" will be what every company should strive for: long-term compounding of per share growth.

Additionally, while these drivers alone should support sustained growth, we remain well-positioned to create meaningful value through capital deployment. While the events of the past year have left many participants paralyzed, we remain active, yet disciplined allocators of the capital entrusted to us by our shareholders.

INTERNAL GROWTH

As most of you are aware, we are at the precipice of a dramatic shift in the demographic profile of our country, marked by a sharp acceleration of the 80+ population, a trend that will persist well into the next decade. Not only has demand within our seniors housing operating portfolio strengthened on the back of this trend, but the growth of this age cohort has also coincided with a 10-year low in new construction. As a result, in 2022, we reported another year of both healthy occupancy gains and pricing power aided by the largely inelastic nature of our product type. And while we're undoubtedly encouraged by the prospects of another year of near double-digit revenue growth in 2023, we're perhaps even more excited about recent expense trends, with our operators reporting a meaningful improvement across key line items. And if the Fed is successful in reining in inflation and John Burkart's team continues to rack up wins with respect to its asset management efforts, the pace of improvement will only intensify.

Simply put, the building blocks for a period of strong and sustained net operating income growth are solidly in place.

RELENTLESS PURSUIT OF HIGHER STANDARDS

As I described in last year's letter, we are in the midst of a critical initiative to professionalize the seniors housing business through the creation of an industry-leading operating platform. The process of building out a platform which encompasses over one thousand seniors housing properties across three countries has been exhausting, expensive, and, at times, downright frustrating. Nevertheless, it is absolutely necessary. Under the leadership of our COO, John Burkart, we continue to attract incredible talent from *outside of the healthcare real estate sector* to drive this imperative. Just a few months ago, John convinced Jerry Davis, another prolific operator in the multifamily space, to join Welltower as a strategic advisor. Jerry previously spent 30 years at UDR, an S&P 500 multifamily REIT, most recently serving as President and COO of the company. John and Jerry (known as J²), amongst others, upended the multifamily sector through the use of technology and data, resulting in extraordinary growth for their respective companies (and tremendous value creation for their investors). The path we are currently pursuing is a similar one. And, as our investors have very well come to know, we will never hesitate to take the tough road as long as it's in the interest of long-term value creation. *At Welltower, we are relentless in our pursuit of higher standards.*

EXTERNAL GROWTH

2022 was another extraordinary year for Welltower, as we completed over \$4.0 billion of pro rata gross investments across a wide range of opportunities. As you have come to expect from us, these deals were executed in a granular and off-market manner and completed at a significant discount to replacement cost.

While we are pleased with our teams' success in sourcing and executing on these deals, our opportunity set has expanded dramatically in recent months – across property sectors, regions, and up and down the capital stack. Following the Fed's unprecedented monetary tightening over the past year, distress has emerged across the commercial real estate space. Yet, few large participants are able to capitalize on the opportunity due to significant equity outflows from core and other real estate investment vehicles and a significant tightening in lending standards by most financial institutions. This confluence of events has created an exceedingly rare moment in which seniors housing sector fundamentals are rapidly improving while, simultaneously, we are one of very few companies positioned to deploy capital in size, at an attractive basis, and with in-place cash flow.

Ultimately, our capital deployment strategy, which focuses on buying assets when they're out of favor (or with little to no competition), at the right price, and in the right structure, allows for outsized

returns with a large margin of safety. We believe that basis (i.e. price) – not exposure – is the ultimate mitigant of risk. And, as always, we will remain disciplined and patient, but not fearful of taking bold and decisive action when the right opportunities manifest themselves.

APPRECIATION

Before discussing the principles which embody who we are at Welltower, I would be remiss not to express my gratitude to Ken Bacon, our Independent Director and Board Chairman, and to our committed, experienced and passionate directors who have served alongside our team. I am also deeply grateful to the Welltower team, which I am convinced is the deepest in the real estate space (and beyond) with the longest runway ahead. And to you, our fellow shareholders, I remain humbled by the trust you have placed in our team and for your continued support during both the highs and lows of the past few years. We have never been as excited about our future as we are today and look forward to the journey ahead with you.

GROUND RULES

After a whirlwind period for our Company and industry, I thought it would be instructive to take a step back and reflect upon a simple, yet thought-provoking question posed to me by a legendary investor whom I am also privileged to call a mentor and a father figure: as we embark on this journey to drive long-term per share growth, who do we seek

as our investor partners? Because, in his words, “you deserve the shareholder you get.” Our management team has spent significant time considering this question and has created a set of ground rules or common principles which form the philosophical foundation for how we run the Company – with our ultimate goal of generating superior returns for our continuing shareholders on both an absolute and relative basis. We have included these principles below.

At Welltower, we believe that stock is the fractional ownership of a business, not a ticker symbol. Hence, as an investor, you are a partner in this business. This is no different from owning a lemonade stand or a farm together. We take the responsibility of managing the business with utmost pride and promise to always act in the best interests of the long-term continuing owners of the Company. And, because of that, we think you should know what we represent and, as importantly, what we do not.

We believe that a great investment has three characteristics:

- 1) superior returns
- 2) lower risk
- 3) long duration or longevity

While much of the investment world is focused on #1, we are equally focused on #2 and #3. We recommend that you do not invest in our Company unless the following principles resonate with you.

IT IS ALL ABOUT:

1 LONG-TERM CAPITAL ALLOCATION

We, as capital allocators, strive every day to create per share value by compounding over a LONG PERIOD OF TIME. While we hope near-term priorities do not conflict with those of the long term, practically speaking, we often encounter situations where these time horizons diverge. It is critical that our investors understand that, at these crossroads, we will always follow the path to long-term value creation at the expense of short-term gains. These ideas include:

- An adherence to a capital allocation framework fixated on risk-adjusted total cash returns (IRR) through the lens of opportunity cost rather than GAAP earnings accretion. We will not hesitate to make capital allocation decisions, which are a drag today but have the potential to create significant value tomorrow
- Making bold, long-term investment decisions that may not be initially popular on Wall Street. In fact, you can count on us to do so
- A willingness to sacrifice near-term financial returns for opportunities to build long-term win/win partnerships which will add significant longevity to our superior returns. That is, we are focused on sowing seeds for the best long-term interests of our partnership; not harvesting short-term gains to please Wall Street
- Real estate is a long-term business. It takes at least three years for an acquisition to play out and perhaps five years for a development to do so. Hence, we prefer a five-year relative performance measurement period but insist on a window of at least three years to gauge performance of the partnership
- Our capital allocation decisions today, the power of our platform, and the long-term value creation we hope to achieve, may not be captured in point-in-time earnings multiples or NAV but, instead, will be reflected through a long-term cash flow growth analysis
- Remaining within our circle of competence, which we define as the area where we can assess and allocate capital with house odds rather than gamblers' odds. We invest within the boundaries of probabilities while acknowledging that the boundaries of possibilities are much wider. We remain humble and remind ourselves each day that we could be wrong; yet, we are unafraid to look foolish. This is a game of batting average

2 MARKET LEADERSHIP AND MOAT

While capital intensive infrastructure businesses rarely possess a competitive advantage, we firmly believe we have established a deep and wide moat through our data analytics and operating platform, and uniquely entrepreneurial culture. We focus on fairness and creating win/win solutions which result in an additive-sum mentality as opposed to the zero-sum mentality which is prevalent in our industry.

- Over the course of many years, we have built an industry-leading predictive analytics platform which requires exceptional people, a perpetual supply of myriad and expensive data sources, and constant evolution. We do not sacrifice the quality and the depth of the platform because the cost drag may hurt quarterly earnings. While value remains part of our ethos, we will not hesitate to invest money in people and ideas which will help expand our moat
- Our proprietary predictive analytics platform allows us to make capital allocation decisions through a probabilistic framework that is focused on biasing outcomes in our favor rather than chasing the illusion of certainties
- We are the clean shirt in an industry where re-trading counterparties is the norm. We believe our handshake is worth more than a contract. This means we will leave pennies on the table today to earn dollars tomorrow. Our reputation is one of doing first-class business in a first-class way
- We only engage in businesses with clear market leadership and a differentiated view of how to create shareholder value. Following the herd only results in mediocre returns. We seek advantageous divergences in our specific niches

3 THE PEOPLE

We take great pride in the culture of our organization, with a foundation built on mutually beneficial solutions where all parties are motivated and incentivized by the same goals. Everyone is all in. We do not take advantage of our counterparties because we are a large company with access to an army of lawyers. We believe that just because you can do something doesn't mean you should. We treat people the way we want to be treated - in an old fashioned, Ben Franklin way.

- We aim to attract the best and brightest to our team and we retain them long-term by providing a meritocracy-based environment that is entrepreneurial, collaborative, and transparent. We are focused on value - NOT cost - while rewarding our people. But, in all cases, our compensation structure is very simple - we eat our own cooking and we get paid a fraction of the profits generated for our investors

- We believe in bringing in people from industries with higher standards. In other words, we value a desire for constant improvement and emphasize kinetic energy over experience and potential energy
- We are all students, continuously learning and applying lessons from great businesses and capital allocators in all industries. We do not confine ourselves to Wall Street's version of real estate or its perception of how a real estate company should operate its business. There is no complacency at Welltower; instead we operate with "healthy paranoia" looking to always push forward and up. Like the Navy Seals, we believe "the only easy day is yesterday." Hence if your goal is to solve for a stable and passive exposure, we recommend you look elsewhere
- Being an extreme fiduciary is our pride; not just our responsibility. Decades from now, we want to be known as one of the best capital allocators of any industry. Long-term compounding is what we are truly after

4 BASIS AND STAYING POWER

We believe the accepted model of investing in real estate – one which is focused on cap rates – is a faulty and dangerous one (if you don't know what a cap rate is, consider yourself lucky). We think there are two metrics which cannot be faked while investing in real estate:

- 1) basis (price per unit or price per foot) when buying
- 2) realized unlevered total returns when selling

Hence, our strong belief that capital allocation priorities should be judged by these two metrics. And, because we are focused on the long-term and believe in a handshake business, it is of paramount importance that we have staying power to see the thesis play out and a balance sheet that no counterparty ever questions. We absolutely believe that real estate is a leverageable asset class where our point-in-time leverage may appear suboptimal depending on where we are in the cycle. However, we want you to understand that in the context of how we operate our business (i.e. contrarian investment philosophy in a handshake format) we are required to think about our balance sheet through an entire cycle and not at a point-in-time.

5 RISK AS DEFINED BY PERMANENT CAPITAL LOSS; NOT VOLATILITY

As mentioned above, one of the hallmarks of a great investment is lower risk. While many efficient market theory proponents believe that an asset's risk is defined by its level of volatility, we strongly disagree. At Welltower, we believe that risk should be assessed through the lens of permanent capital loss; not volatility. In order to reduce risk, we seek a large margin of safety in all of our capital allocation decisions – that is, acquiring assets for less than what it costs to build. We believe it is important to understand this key point of differentiation between ourselves and others as it relates to risk. We would also note that a vast majority of our management's personal wealth is invested with the partnership as compared to many shareholders who benefit from a diversified portfolio. In addition to the tomatoes you will deservedly throw at us, please remember that a permanent loss of capital will likely impact our life's work and wealth disproportionately. We are all in with you and highly focused on permanent capital loss; not winning a popularity contest.

We hope these principles provide you with perspective on who we are and how we think about creating per share value for our long-term continuing owners. Each day, we strive to not only be the employer of choice and the partner of choice but also the investment of choice. We therefore believe it is as important for us to find the right capital allocation opportunities as it is the right long-term investors.

We look forward to learning more about you and we hope you will about us.

Best regards,

Shankh Mitra
CEO, Welltower Inc.

PART I

Item 1. *Business*

General

Welltower Inc. (NYSE:WELL), an S&P 500 company headquartered in Toledo, Ohio, is driving the transformation of health care infrastructure. The company invests with leading seniors housing operators, post-acute providers and health systems to fund the real estate and infrastructure needed to scale innovative care delivery models and improve people's wellness and overall health care experience. Welltower™, a real estate investment trust ("REIT"), owns interests in properties concentrated in major, high-growth markets in the United States ("U.S."), Canada and the United Kingdom ("U.K."), consisting of seniors housing, post-acute communities and outpatient medical properties. More information is available on the Internet at www.welltower.com. The information on our website is not incorporated by reference in this Annual Report on Form 10-K, and our web address is included as an inactive textual reference only.

Our primary objectives are to protect stockholder capital and enhance stockholder value. We seek to pay consistent cash dividends to stockholders and create opportunities to increase dividend payments to stockholders as a result of annual increases in net operating income and portfolio growth. To meet these objectives, we invest across the full spectrum of seniors housing and health care real estate and diversify our investment portfolio by property type, relationship and geographic location.

On March 7, 2022, we announced our intent to complete an UPREIT reorganization. In February 2022, the company formerly known as Welltower Inc. ("Old Welltower") formed WELL Merger Holdco Inc. ("New Welltower") as a wholly owned subsidiary, and New Welltower formed WELL Merger Holdco Sub Inc. ("Merger Sub") as a wholly owned subsidiary. On April 1, 2022, Merger Sub merged with and into Old Welltower, with Old Welltower continuing as the surviving corporation and a wholly owned subsidiary of New Welltower (the "Merger"). In connection with the Merger, Old Welltower's name was changed to "Welltower OP Inc.", and New Welltower inherited the name "Welltower Inc." Effective May 24, 2022, Welltower OP Inc. ("Welltower OP") converted from a Delaware corporation into a Delaware limited liability company named Welltower OP LLC (the "LLC Conversion"). Following the LLC Conversion, New Welltower's business continues to be conducted through Welltower OP and New Welltower does not have substantial assets or liabilities, other than through its investment in Welltower OP.

Welltower Inc. is the initial member and majority owner of Welltower OP, with an approximate ownership interest of 99.751% as of December 31, 2022. Welltower Inc. issues equity from time to time, the net proceeds of which it is obligated to contribute as additional capital to Welltower OP. All debt including credit facilities, senior notes and secured debt is incurred by Welltower OP, and Welltower Inc. has fully and unconditionally guaranteed all existing and future senior unsecured notes.

Unless stated otherwise or the context otherwise requires, references to "Welltower" mean Welltower Inc. and references to "Welltower OP" mean Welltower OP LLC. References to "we," "us," "our" or the "company" mean collectively Welltower, Welltower OP and those entities/subsidiaries owned or controlled by Welltower and/or Welltower OP.

Portfolio of Properties

Please see "Item 7 – Management's Discussion and Analysis of Financial Condition and Results of Operation – Executive Summary – Company Overview" for a table that summarizes our portfolio as of December 31, 2022.

Property Types

We invest in seniors housing and health care real estate and evaluate our business through three reportable segments: Seniors Housing Operating, Triple-net and Outpatient Medical. For additional information regarding our segments, please see Note 18 to our consolidated financial statements. The accounting policies of the segments are the same as those described in the summary of significant accounting policies in Note 2 to our consolidated financial statements. The following is a summary of our various property types.

Seniors Housing Operating

Our Seniors Housing Operating properties include seniors apartments, independent living and independent supportive living, continuing care retirement communities, assisted living, Alzheimer's/dementia care and include care homes with or without nursing (U.K.), which assist with activities of daily living that preserve a person's mobility and social systems to promote cognitive engagement. Our properties include stand-alone properties that provide one level of service, combination properties that provide multiple levels of service and communities or campuses that provide a wide range of services. Properties are primarily held in joint venture entities with operating partners. We utilize the structure authorized by the REIT Investment Diversification and Empowerment Act of 2007, which is commonly referred to as a "RIDEA" structure (the provisions of the Internal Revenue Code authorizing the RIDEA structure were enacted as part of the Housing and Economic Recovery Act of 2008).

Seniors Apartments Seniors apartments generally refer to age-restricted multi-unit housing with self-contained living units for older adults, usually aged 55+ who are able to care for themselves. Seniors apartments generally do not offer other additional services such as meals.

Independent Living and Independent Supportive Living (Canada) Independent living and independent supportive living generally refers to age-restricted, multifamily properties with central dining that provide residents access to meals and other services such as housekeeping, linen service, transportation and social and recreational activities.

Continuing Care Retirement Communities Continuing care retirement communities typically include a combination of detached homes and properties offering independent living, assisted living and/or long-term/post-acute care services on one campus. These communities appeal to residents because there is no need to relocate when health and medical needs change. Resident payment plans vary, but can include entrance fees, condominium fees and rental fees. Many of these communities also charge monthly maintenance fees in exchange for a living unit, meals and some health services.

Assisted Living Assisted living refers to state-regulated rental properties that provide independent living services, but also provide supportive care from trained employees to residents who require assistance with activities of daily living, including, but not limited to, management of medications, bathing, dressing, toileting, ambulating and eating.

Alzheimer's/Dementia Care Alzheimer's/Dementia Care refers to state-regulated rental properties that generally provide assisted living and independent living services, but also provide supportive care to residents with memory loss, Alzheimer's disease and/or other types of dementia. Amenities vary, but may include enhanced security, specialized design features and memory-enhancing therapies that promote relaxation and help slow cognitive decline.

Care Homes with or without Nursing (U.K.) Care homes without nursing, regulated by the Care Quality Commission ("CQC"), are rental properties that provide essentially the same services as U.S. assisted living. Care homes with nursing, also regulated by the CQC, are licensed daily rate or rental properties where most individuals require 24-hour nursing and/or medical care. Generally, these properties are licensed for various national and local reimbursement programs. Unlike the U.S., care homes with nursing in the U.K. generally do not provide post-acute care.

Our Seniors Housing Operating segment accounted for 72%, 68% and 67% of total revenues for the years ended December 31, 2022, 2021 and 2020, respectively. As of December 31, 2022, we had relationships with 43 operators to manage our Seniors Housing Operating properties. In each instance, our partner provides management services to the properties pursuant to an incentive-based management contract. We rely on our partners to effectively and efficiently manage these properties. For the year ended December 31, 2022, our relationship with Sunrise Senior Living accounted for approximately 20% of our Seniors Housing Operating segment revenues and 14% of our total revenues. Additionally Revera accounted for approximately 8% of our Seniors Housing Operating segment revenues and 6% our total revenues. Revera owns a controlling interest in Sunrise Senior Living.

Triple-net

Our Triple-net properties offer services including independent living and independent supportive living (Canada), assisted living, continuing care retirement communities, Alzheimer's/dementia care and care homes with or without nursing (U.K.) described above, as well as long-term/post-acute care. Our properties include stand-alone properties that provide one level of service, combination facilities that provide multiple levels of service, and communities or campuses that provide a wide range of services. We invest primarily through acquisitions, development and joint venture partnerships. Our properties are primarily leased to operators under long-term, triple-net master leases that obligate the tenant to pay all operating costs, utilities, real estate taxes, insurance, building repairs, maintenance costs and all obligations under certain ground leases. We are not involved in property management.

Long-Term/Post-Acute Care Facilities Post-acute care is at the leading edge of reducing health care costs while improving quality. These high-impact centers help patients recover from illness or surgery with the goals of getting the patient home and healed faster and reducing hospital readmission rates. Our long-term/post-acute care properties generally offer skilled nursing/ post-acute care, inpatient rehabilitation and long-term acute care services. Skilled nursing/post-acute care refers to licensed daily rate or rental properties where most individuals require 24-hour nursing and/or medical care. Generally, these properties are licensed for Medicaid and/or Medicare reimbursement in the U.S. or provincial reimbursement in Canada. All properties offer some level of rehabilitation services. Some properties focus on higher acuity patients and offer rehabilitation units specializing in cardiac, orthopedic, dialysis, neurological or pulmonary rehabilitation. Inpatient rehabilitation properties provide intensive inpatient services after illness, injury or surgery to patients able to tolerate and benefit from three hours of rehabilitation per day. Long-term acute care properties provide inpatient services for patients with complex medical conditions that require more intensive care, monitoring or emergency support than is available in most skilled nursing/post-acute care properties.

Our Triple-net segment accounted for 16%, 19% and 17% of total revenues for the years ended December 31, 2022, 2021 and 2020, respectively. For the year ended December 31, 2022, our revenues related to our relationship with ProMedica Health System ("ProMedica") accounted for approximately 26% of our Triple-net segment revenues and 4% of total revenues. In December 2022, ProMedica relinquished to Welltower its 15% interest in 147 skilled nursing facilities previously owned by the Welltower/ProMedica joint venture in exchange for a lease modification, which relieved ProMedica from its lease obligation on the 147 skilled nursing properties and amended the lease on the remaining 58 assisted living and memory care properties that continue to be held by the Welltower/ProMedica joint venture. The 58 assisted living and memory care assets continue to be operated by ProMedica and backed by the existing guaranty. Concurrently, Welltower and Integra Healthcare Properties ("Integra") entered into master leases for the skilled nursing portfolio. Approximately 15 regional operators will enter into subleases with Integra to operate the properties. Also in December 2022 and January 2023, we sold to Integra a 15% ownership interest in 85 of those skilled nursing facilities and Integra is expected to buy into the remaining 62 assets throughout 2023.

For the year ended December 31, 2022, our revenues related to our relationship with Genesis Healthcare ("Genesis") accounted for approximately 2% of our Triple-net segment revenues and less than 1% of our total revenues. During 2020, Genesis indicated substantial doubt as to their ability to continue as a going concern. As a result, effective July 1, 2020, we recognized reserves for all existing straight-line rent receivable balances of \$91,025,000 as a reduction to rental income and now recognize rental income from Genesis on a cash basis. Additionally, in March 2021, we entered into definitive agreements to substantially exit our operating relationship with Genesis. As of December 31, 2022, our relationship with Genesis was comprised of one property owned 100% by us and leased to Genesis, a loan balance net of allowance for credit losses of \$168,949,000, approximately 9.5 million shares of GEN Series A common stock and a 25% ownership stake in an unconsolidated joint venture that includes two master leases for 28 properties operated by Genesis.

Outpatient Medical

Outpatient Medical Buildings Demand for outpatient medical services is growing as more procedures are performed safely and efficiently outside the hospital setting. State-of-the-art outpatient centers are needed in

accessible, consumer-friendly locations. Our portfolio of outpatient medical buildings is an integral part of creating health care provider connectivity in local markets and generally include physician offices, ambulatory surgery centers, diagnostic facilities, outpatient services and/or labs. Approximately 87% of our outpatient medical building portfolio is affiliated with health systems (buildings directly on or adjacent to hospital campuses or with tenants that are satellite locations for the health system and its physicians). We typically lease our outpatient medical buildings to multiple tenants and provide varying levels of property management. Our Outpatient Medical segment accounted for 12%, 13% and 16% of total revenues for each of the years ended December 31, 2022, 2021 and 2020, respectively. No single tenant exceeds 20% of segment revenues.

Investments

Providing high-quality and affordable health care to an aging global population requires vast investments and infrastructure development. We invest in seniors housing and health care real estate primarily through acquisitions, developments and joint venture partnerships. For additional information regarding acquisition and development activity, please see Note 3 to our consolidated financial statements. Our portfolio creates opportunities to connect partners across the continuum of care and drive efficiency. We seek to diversify our investment portfolio by property type, relationship and geographic location. In determining whether to invest in a property, we focus on the following: (1) the experience of the obligor's/partner's management team; (2) the historical and projected financial and operational performance of the property; (3) the credit of the obligor/partner; (4) the security for any lease or loan; (5) the real estate attributes of the building and its location; (6) the capital committed to the property by the obligor/partner; and (7) the operating fundamentals of the applicable industry.

We monitor our investments through a variety of methods determined by the type of property. Our asset management process for seniors housing properties generally includes review of monthly financial statements and other operating data for each property, review of obligor/partner creditworthiness, property inspections, and review of covenant compliance relating to licensure, real estate taxes, letters of credit and other collateral. Our internal property management division manages and monitors the outpatient medical portfolio with a comprehensive process including review of, among other things, tenant relations, lease expirations, the mix of health service providers, hospital/health system relationships, property performance, capital improvement needs, and market conditions.

Investment Types

Real Property Our properties are primarily comprised of land, buildings, improvements and related rights. Our triple-net properties are generally leased to operators under long-term operating leases. The leases generally have a fixed contractual term of 12 to 15 years and contain one or more five to 15-year renewal options. Certain of our leases also contain purchase options, a portion of which could result in the disposition of properties for less than full market value if the options were to be exercised. Most of our rents are received under triple-net leases requiring the operator to pay rent and all additional charges incurred in the operation of the leased property. The tenants are required to repair, rebuild and maintain the leased properties. Substantially all these operating leases are designed with escalating rent structures. Leases with fixed annual rental escalators are generally recognized on a straight-line basis over the initial lease period, subject to a collectability assessment. Rental income related to leases with contingent rental escalators is generally recorded based on the contractual cash rental payments due for the period.

At December 31, 2022, approximately 96% of our triple-net properties were subject to master leases. A master lease is a lease of multiple properties to one tenant entity under a single lease agreement. From time to time, we may acquire additional properties that are then leased to the tenant under the master lease. The tenant is required to make one monthly payment that represents rent on all the properties that are subject to the master lease. Typically, the master lease tenant can exercise its right to purchase the properties or to renew the master lease only with respect to all leased properties at the same time. We believe this bundling feature benefits us because the tenant cannot limit the purchase or renewal to better performing properties and terminate the leasing arrangement with respect to poorer performing properties. This spreads our risk among the entire group of properties within the master lease. The bundling feature should provide a similar advantage to us if the master

lease tenant is in bankruptcy. Subject to certain restrictions, a debtor in bankruptcy has the right to assume or reject its unexpired leases and executory contracts. In the context of integrated master leases such as ours, our tenants in bankruptcy would be required to assume or reject the master lease as a whole, rather than deciding on a property by property basis.

Our Outpatient Medical portfolio is primarily self-managed and consists mainly of multi-tenant properties leased to health care providers. Our leases typically include increasers and some form of operating expense reimbursement by the tenant. As of December 31, 2022, 62% of our portfolio included leases with full pass through, 31% with a partial expense reimbursement (modified gross) and 7% with no expense reimbursement (gross). Our outpatient medical leases are non-cancellable operating leases that have a weighted-average remaining term of seven years at December 31, 2022 and are often credit enhanced by security deposits, guarantees and/or letters of credit.

Construction We provide funds for the construction of properties for tenants primarily as part of long-term operating leases. We capitalize certain interest costs associated with funds used for the construction of properties owned by us. The amount capitalized is based upon the amount advanced during the construction period using the rate of interest that approximates our company-wide cost of financing. Our interest expense is reduced by the amount capitalized. The construction period commences upon initial funding and terminates upon the earlier of the completion of the applicable property or the end of a specified period. During the construction period, we advance funds to the tenants in accordance with agreed upon terms and conditions which require, among other things, periodic site visits by a company representative. During the construction period, we generally require an additional credit enhancement in the form of payment and performance bonds and/or completion guarantees. At December 31, 2022, we had outstanding construction investments of \$1,021,080,000 and were committed to provide additional funds of approximately \$1,883,449,000 to complete construction for consolidated investment properties. We also provide for construction loans which, depending on the terms and conditions, could be treated as loans or investments in unconsolidated entities.

Loans Our real estate loans are typically structured to provide us with interest income, principal amortization and transaction fees. Real estate loans consist of mortgage loans and other real estate loans which are primarily collateralized by a first, second or third mortgage lien, a leasehold mortgage on, or an assignment of the partnership interest in the related properties, corporate guarantees and/or personal guarantees. Non-real estate loans are generally corporate loans with no real estate backing. At December 31, 2022, we had outstanding loans, net of allowances, of \$1,180,012,000 with an interest yield of approximately 9.9% per annum. Our yield on loans depends upon a number of factors, including the stated interest rate, average principal amount outstanding during the term of the loan and any interest rate adjustments. The loans outstanding at December 31, 2022 are generally subject to one to 15-year terms with principal amortization schedules and/or balloon payments of the outstanding principal balances at the end of the term.

Investments in Unconsolidated Entities Investments in entities that we do not consolidate but for which we can exercise significant influence over operating and financial policies are reported under the equity method of accounting. At December 31, 2022, we had investments in unconsolidated entities of \$1,499,790,000. Our investments in unconsolidated entities generally represent interests ranging from 10% to 88% in real estate assets. Under the equity method of accounting, our share of the investee's earnings or losses is included in our consolidated results of operations. The initial carrying value of investments in unconsolidated entities is based on the amount paid to purchase the entity interest inclusive of transaction costs. We evaluate our equity method investments for impairment based upon a comparison of the estimated fair value of the equity method investment to its carrying value. When we determine a decline in the estimated fair value of such an investment below its carrying value is other-than-temporary, an impairment is recorded.

In Substance Real Estate Additionally, we provide loans to third parties for the acquisition, development and construction of real estate. Under these arrangements, it is possible that we will participate in the expected residual profits of the project through the sale, refinancing or acquisition of the property. We evaluate the characteristics of each arrangement, including its risks and rewards, to determine whether they are more similar to those associated with a loan or an investment in real estate. Arrangements with characteristics implying real estate joint ventures are treated as in substance real estate investments, accounted for using the equity method,

and are presented as investments in unconsolidated entities. We have made loans related to 21 properties with a carrying value of \$649,267,000 as of December 31, 2022, which are classified as in substance real estate investments.

Principles of Consolidation

The consolidated financial statements are in conformity with U.S. general accepted accounting principles (“U.S. GAAP”) and include the accounts of our wholly-owned subsidiaries and joint venture entities that we control, through voting rights or other means. All material intercompany transactions and balances have been eliminated in consolidation.

At inception of joint venture transactions, we identify entities for which control is achieved through means other than voting rights (“variable interest entities” or “VIEs”) and determine which business enterprise is the primary beneficiary of its operations. A VIE is broadly defined as an entity where either (i) the equity investors as a group, if any, do not have a controlling financial interest, or (ii) the equity investment at risk is insufficient to finance that entity’s activities without additional subordinated financial support. We consolidate investments in VIEs when we are determined to be the primary beneficiary. Accounting Standards Codification Topic 810, “Consolidations”, requires enterprises to perform a qualitative approach to determining whether or not a VIE will need to be consolidated. This evaluation is based on an enterprise’s ability to direct and influence the activities of a VIE that most significantly impact that entity’s economic performance.

For investments in joint ventures, U.S. GAAP may preclude consolidation by the sole general partner in certain circumstances based on the type of rights held by the limited partner(s). We assess the limited partners’ rights and their impact on our consolidation conclusions, and we reassess if there is a change to the terms or in the exercisability of the rights of the limited partners, the sole general partner increases or decreases its ownership of limited partnership interests, or there is an increase or decrease in the number of outstanding limited partnership interests. We similarly evaluate the rights of managing members of limited liability companies.

Borrowing Policies

We utilize a combination of debt and equity to fund investments. Generally, we intend to issue unsecured, fixed-rate public debt with long-term maturities to approximate the maturities on our triple-net leases and investment strategy. For short-term purposes, we may borrow on our primary unsecured credit facility or issue commercial paper. We typically replace these borrowings with long-term capital such as senior unsecured notes or common stock. When terms are deemed favorable, we may invest in properties subject to existing mortgage indebtedness. In addition, we may obtain secured financing for unleveraged properties in which we have invested or may refinance properties acquired on a leveraged basis. In certain agreements with our lenders, we are subject to restrictions with respect to secured and unsecured indebtedness.

Competition

We compete with other real estate investment trusts, real estate partnerships, private equity and hedge fund investors, banks, insurance companies, finance/investment companies, government-sponsored agencies, taxable and tax-exempt bond funds, health care operators, developers and other investors in the acquisition, development, leasing and financing of health care and seniors housing properties. We compete for investments based on a number of factors including relationships, certainty of execution, investment structures and underwriting criteria. Our ability to successfully compete is impacted by economic and demographic trends, availability of acceptable investment opportunities, our ability to negotiate beneficial investment terms, availability and cost of capital, construction and renovation costs and applicable laws and regulations.

The operators/tenants of our properties compete with properties that provide comparable services in the local markets. Operators/tenants compete for patients and residents based on a number of factors including quality of care, reputation, physical appearance of properties, location, services offered, family preferences (including a preference for home health services instead of residing in one of our communities), physicians, staff and price. We also face competition from other health care facilities for tenants, such as physicians and other health care providers that provide comparable facilities and services.

For additional information on the risks associated with our business, please see “Item 1A — Risk Factors” of this Annual Report on Form 10-K.

Environmental, Social and Governance

Environmental, Social and Governance (“ESG”) Approach We are committed to operating in a responsible, transparent and sustainable manner. Our leadership (through the ESG Steering Committee launched in 2022) and Board of Directors (through the Nominating Corporate/Governance Committee), oversee and advance our ESG initiatives. We recognize that focusing on ESG engagement, integration and impact benefit our stakeholders and are fundamental to our business. Our corporate responsibility and sustainability strategy is focused on adopting leading ESG practices across our business and we were recognized for our leadership in this space over the past year in the following ways:

- Recognized at the Management band level with a CDP score of “B” for taking coordinated action on climate issues;
- Raised MSCI ESG rating from AA to AAA;
- Listed in the FTSE4Good Index since 2012;
- Recognized by the U.S. Environmental Protection Agency (EPA) and U.S. Department of Energy as an ENERGY STAR Partner of the Year for the fourth consecutive year and maintained the level of Sustained Excellence, the EPA’s highest recognition within the ENERGY STAR program;
- Maintained top 30% (3rd decile) ISS Quality Score ranking for each Governance, Environment and Social;
- Named to the Bloomberg Gender-Equality Index for the fourth consecutive year;
- Maintained Prime status under the ISS-ESG Corporate rating for the fourth consecutive year;
- Improved GRESB score and maintained GRESB Green Star status;
- Named by S&P Global in the 2022 edition of The Sustainability Yearbook;
- Recognized by Labrador as a 2022 Transparency Award winner in the real estate industry for our clear and concise disclosure of relevant information to stakeholders in our annual proxy statement, Form 10-K, and investor relations website
- Named to the top 30 percent of Newsweek’s America’s Most Responsible Companies list for the fourth consecutive year; and
- Named to Sustainalytics 2022 Top-Rated ESG Companies list.

Environmental We strive to reduce our environmental impact by increasing energy and water efficiency, reducing greenhouse gas emissions, and by investing in projects that reduce energy and water consumption that meet our rate of return threshold. After several years of portfolio and program evolution, along with our increased ability to collect data in partnership with our operators and tenants, our property-level sustainability dataset (energy, greenhouse gas (“GHG”), water, and waste) is evolving to become a set of tools for benchmarking. A portion of our self-managed Outpatient Medical portfolio is benchmarked in EPA ENERGY STAR Portfolio Manager (“ESPM”) and we regularly engage with our operators and tenants on ENERGY STAR, utility bill aggregators, utility companies, and others to add to our number of ESPM benchmarked properties throughout our portfolio.

We have employee, tenant, operator/manager and vendor engagement programs in place, focused on operational strategies to drive energy and water efficiency. We have issued guidance with accompanying training to assist them to successfully benchmark our buildings and to engage them to improve energy and water efficiency, as well as increase their recycling diversion rates.

In December 2019, we issued our inaugural green bond of \$500,000,000 of 2.700% senior unsecured notes due 2027 and in March 2022 we issued an additional green bond of \$550,000,000 of 3.85% senior unsecured

notes due 2032. The net proceeds from the offerings have been, and continue to be, used to fund energy efficiency, water conservation and green building projects. As of September 30, 2022, we have utilized \$572,090,000 of proceeds from these issuances on such projects.

We understand that as we continue to make our operations and buildings more sustainable, we also have a responsibility to effectuate the same in our supply chain and our purchasing decisions. As such, we partner with suppliers that offer take back programs for their products, look for the ENERGY STAR label when purchasing eligible items, seek to purchase office supply products that contain recycled content and purchase paper products that are either Forest Stewardship Council or Sustainable Forestry Initiative certified.

Social We value and are committed to our employees. We believe that a diverse workplace produces a variety of perspectives, motivates employees and helps us understand and better serve our stakeholders, and the communities in which we do business. As of December 31, 2022, our U.S. employees self-identified as follows:

Ethnicity	Male	Female
Asian	7%	9%
Black or African American	4%	8%
Hispanic or Latino	8%	7%
Native Hawaiian or Other Pacific Islander	—%	1%
Two or More Races	1%	2%
White	80%	73%
	100%	100%
Gender	51%	49%

We have reinforced our already strong commitment to diversity and inclusion through our Diversity Council and support of our eight employee network groups (“ENGs”). Our ENGs include women, families, racial and ethnic minorities, military, young professionals, and those who identify as LGBTQI+ and their allies. Our ENGs provide support, education, networking opportunities and community belonging for our employees. Our support of diversity and inclusion through our Diversity Council and ENGs, taken together with other employee initiatives, such as tailored messaging, training and discussions on equality and belonging, support our efforts to compete for and foster talent and inclusiveness in an ever-changing workforce.

In addition, we have several social initiatives in place that are focused on fostering a more diverse workforce, engaging with our communities and promoting the health and well-being of our employees, tenants and residents. The Welltower Charitable Foundation (the “Foundation”) financially supports charitable initiatives related to aging, health care, the environment, education and the arts. Since its inception, the Foundation has provided more than \$42 million in cash and in-kind support. We encourage our employees to give back to the community by matching their contributions and donating their time to eligible charitable organizations. Funds are also allocated to each of our ENGs to make charitable contributions in support of their programming efforts. Additionally, the Foundation facilitates presentations for charities to compete in the Give-WELL campaign. This campaign enables our employees to present and vote for charities that will receive donations from the Foundation. During 2022, we sponsored our third annual Day of Giving so our employees could collaborate to make an impact with local charitable organizations through volunteer opportunities. See Human Capital section below for additional information regarding employee initiatives and programs.

Governance Our commitment to diversity starts at the top with a highly knowledgeable, skilled and diverse Board of Directors. As of December 31, 2022, our ten Directors self-identified as follows:

Board Composition			
Ethnicity		Gender	
Asian	10%	Male	60%
Black or African American	20%	Female	40%
Hispanic or Latino	20%		<u>100%</u>
White	<u>50%</u>		
	<u>100%</u>		

Nine of our ten Directors are independent and the independent Chair of our Board is held by a Black/African American male. Four of five, or 80%, of our Board committees are chaired by either a Female (2), Hispanic/Latino (1) or Black/African American (1) Director.

Additional information regarding our ESG programs and initiatives is available in our 2021 Environmental, Social and Governance Report (located on our website at www.welltower.com). Information on our website, including our Environmental, Social and Governance Report or sections thereof, is not incorporated by reference into this Annual Report.

Human Capital

Our employees are our greatest asset. As of December 31, 2022, we had 514 employees (491 located in United States, 14 in the United Kingdom, eight in Canada and one in Luxembourg). We are committed to the success of our people and the unique combination of skills and experiences they bring to achieving our mission.

Employee Engagement High employee engagement and satisfaction are critical to attracting and retaining top talent. During 2022, we conducted an employee engagement survey through an independent third party, measuring our progress on important employee issues such as manager relationships, employee empowerment, performance management and resources and support, and identifying opportunities for growth and improvement. The 2022 overall engagement score improved over the 2021 engagement score as a result of managers taking action on the 2021 results.

Employee Development Programs and Performance Management Development through the talent pipeline, recognizing and rewarding performance and providing opportunities for continued growth are the cornerstones of our Human Capital strategy. We offer employees resources, trainings and tools designed to develop future leaders, advance careers and attract and retain talent including but not limited to our robust early career programs, formal mentorship and coaching programs, manager development training, skill development courses and education assistance. During 2022, we continued executive management coaching programs to equip leaders with structured 360 feedback, customized development plans and guidance on company-wide succession planning. For some leaders, we partnered with a virtual coaching platform that scales individual access to expert coaches, training opportunities and enables behavioral change through award-winning artificial intelligence. For our senior vice presidents, we partnered with an independent advisory firm to provide one-on-one coaching, including an extensive 360 feedback process to focus on maximizing their executive leadership potential.

Compensation and Benefits In addition to salary, our compensation and benefits programs include annual short term incentive bonuses, long-term incentive stock awards, retirement plans, an employee stock purchase plan, healthcare and insurance benefits, health savings and flexible spending accounts, paid time off, parental and caregiver leave, senior wellness leave, employee assistance programs, tuition assistance and health and wellness reimbursement programs, among many others. With the assistance of independent third parties, we annually evaluate and benchmark the competitiveness of our compensation and benefits programs focusing on fair pay practices that reward performance and support the needs of our employees.

Health, Safety and Wellness The success of our business is fundamentally connected to the safety and well-being of our employees, tenants, operators and managers, and their residents and visitors, as the case may be. We provide our employees and their families with access to numerous innovative, flexible and convenient health and wellness programs that support physical, mental and financial well-being. While COVID-19 continued in 2022, our focus remained on providing a safe office environment for our employees while continuing to allow for remote work, hybrid work and flexible work schedules where feasible. With the support of the varying work arrangements and a geographically dispersed workforce, we continued to develop ways to best support our people. We improved our employee experience by growing our internal communication platform (intranet), enhancing connectivity and collaboration. The mobile application created an easily accessible digital home-base where all company communications, including important office announcements, must-read company articles and external media engagements are located. Additional communication tools, including podcasts, town hall meetings, team events (virtually and in person) and dedicated communication channels for ENGs, demonstrate our commitment to ensuring employee alignment and engagement. Although workplace injuries are minimal, our safety committee implemented a workforce injury root cause analysis program to ensure we focus on future incident prevention and improvement.

Credit Concentrations Please see Note 9 to our consolidated financial statements.

Geographic Concentrations Please see “Item 2 – Properties” below and Note 18 to our consolidated financial statements.

Certain Government Regulations

United States

Health Law Matters — Generally

Typically, operators of seniors housing facilities do not receive significant funding from government programs and are largely subject to state laws, as opposed to federal laws. Operators of long-term/post-acute care facilities and hospitals do receive significant funding from government programs, and these facilities are subject to extensive regulation, including federal and state laws covering the type and quality of medical and/or nursing care provided, ancillary services (*e.g.*, respiratory, occupational, physical and infusion therapies), qualifications of the administrative personnel and nursing staff, the adequacy of the physical plant and equipment, reimbursement and rate setting and operating policies. In addition, as described below, operators of these facilities are subject to extensive laws and regulations pertaining to health care fraud and abuse, including, but not limited to, the federal Anti-Kickback Statute (“AKS”), the federal Stark Law (“Stark Law”), and the federal False Claims Act (“FCA”), as well as comparable state laws. Hospitals, physician group practice clinics, and other health care providers that operate in our portfolio are subject to extensive federal, state, and local licensure, registration, certification, and inspection laws, regulations, and industry standards, as well as other conditions of participation in federal and state government programs such as Medicare and Medicaid. Further, operators of long-term care facilities are required to have in place compliance and ethics programs that meet the requirements of federal laws and regulations. Our tenants’ failure to comply with applicable laws and regulations could result in, among other things: loss of accreditation; denial of reimbursement; imposition of fines; suspension, decertification, or exclusion from federal and state health care programs; loss of license; or closure of the facility. See risk factors “The requirements of, or changes to, governmental reimbursement programs, such as Medicare or Medicaid, could have a material adverse effect on our obligors’ liquidity, financial condition and results of operations, which could adversely affect our obligors’ ability to meet their obligations to us” and “Our operators’ or tenants’ failure to comply with federal, state, local, and industry-regulated licensure, certification and inspection laws, regulations, and standards could adversely affect such operators’ or tenants’ operations, which could adversely affect our operators’ and tenants’ ability to meet their obligations to us” in “Item 1A – Risk Factors” below. Moreover, in light of certain arrangements that Welltower may pursue with healthcare entities who are directly subject to laws and regulations pertaining to health care fraud and abuse, and, given that certain of our arrangements are structured under the provisions of the REIT Investment Diversification and Empowerment Act of 2007 (“RIDEA”), certain health care fraud and abuse laws and data privacy laws could apply directly to Welltower. See risk factor “We assume operational and legal risks with respect to our properties

managed in RIDEA structures that could have a material adverse effect on our business results of operations, and financial condition” in “Item 1A - Risk Factors” below.

Licensing and Certification

The primary regulations that affect seniors housing facilities are state licensing and certification laws. For example, certain health care facilities are subject to a variety of licensure and certificate of need (“CON”) laws and regulations. Where applicable, CON laws generally require, among other requirements, that a facility demonstrate the need for (1) constructing a new facility, (2) adding beds or expanding an existing facility, (3) investing in major capital equipment or adding new services, (4) changing the ownership or control of an existing licensed facility or (5) terminating services that have been previously approved through the CON process. Certain state CON laws and regulations may restrict the ability of operators to add new properties or expand an existing facility’s size or services. In addition, CON laws may constrain the ability of an operator to transfer responsibility for operating a particular facility to a new operator.

With respect to licensure, generally our long-term/post-acute care facilities are required to be licensed by the applicable state regulatory authority and certified for participation in Medicare, Medicaid and other federal and state health care programs. The failure of our operators to maintain or renew any required license or regulatory approval as well as the failure of our operators to correct serious deficiencies identified in a compliance survey could require those operators to discontinue operations at a property. In addition, if a property is found to be out of compliance with Medicare, Medicaid or other federal or state health care program conditions of participation, the property operator may be excluded from participating in those government health care programs.

Reimbursement

The reimbursement methodologies applied to health care facilities continue to evolve. Federal and state authorities have considered and implemented and may continue seeking to implement new or modified reimbursement methodologies, including value-based reimbursement methodologies that may negatively impact health care property operations. Likewise, third-party payors may continue imposing greater controls on operators, including through changes in reimbursement rates and fee structures. The impact of any such changes, if implemented, may result in a material adverse effect on our portfolio. No assurance can be given that current revenue sources or levels will be maintained. Accordingly, there can be no assurance that payments under a government health care program are currently, or will be in the future, sufficient to fully reimburse the property operators for their operating and capital expenses.

- *Seniors Housing Facilities* The majority of the revenues received by the operators of U.S. seniors housing facilities are from private pay sources. The remaining revenue source is primarily Medicaid provided under state waiver programs for home and community-based care. There can be no guarantee that a state Medicaid program operating pursuant to a waiver will be able to maintain its waiver status. Rates paid by self-pay residents are set by the facilities and are determined by local market conditions and operating costs. Generally, facilities receive a higher payment per day for a private pay resident than for a Medicaid beneficiary who requires a comparable level of care. The level of Medicaid reimbursement varies from state to state. Thus, the revenues generated by operators of our assisted living facilities may be adversely affected by payor mix, acuity level, or changes in Medicaid eligibility and reimbursement levels.
- *Long-Term/Post-Acute Care Facilities* The majority of the revenues received by the operators of these facilities are from the Medicare and Medicaid programs, with the balance representing reimbursement payments from private payors and patients. Consequently, changes in federal or state reimbursement policies may adversely affect an operator’s ability to cover its expenses, including our rent or debt service. Long-term/post-acute care facilities are subject to periodic pre- and post-payment reviews and other audits by federal and state authorities. A review or audit of a property operator’s claims could result in recoupments, denials or delay of payments in the future. Due to the significant judgments and estimates inherent in payor settlement accounting, no assurance can be given as to the adequacy of any reserves maintained by our property operators to cover potential adjustments to reimbursements or to cover settlements made to payors.

- Medicare Reimbursement* Generally, long-term/post-acute care facilities are reimbursed by Medicare under prospective payment systems, which generally provide reimbursement based upon a predetermined fixed amount per episode of care and are updated by CMS, an agency of the Department of Health and Human Services (“HHS”) annually. There is a risk under these payment systems that costs will exceed the fixed payments, or that payments may be set below the costs to provide certain items and services. Further, there is risk that Medicare Skilled Nursing Facility (“SNF”) payment reforms may impact our tenants and operators. In addition, the HHS Office of Inspector General has released recommendations to address SNF billing practices and Medicare payment rates, which may impact our tenants and operators. In September 2022, HHS announced that additional data about the ownership of all Medicare-certified nursing homes will be released to the public. This information will make it easier for stakeholders (such as state licensing officials, state and federal law enforcement and researchers) and the public to identify common owners of nursing homes across different nursing home locations. The information will also allow for greater accessibility to information regarding facilities’ performance and any common ownership links among facilities with poor performance. CMS announced it is increasing scrutiny and oversight over the country’s poorest performing nursing facilities by strengthening requirements for completion of the Special Focus Facility Program and increasing enforcement actions against facilities that fail to demonstrate improvement, including denial of payment and potential loss of Medicare certification.
- Medicaid Reimbursement* Many states reimburse SNFs using fixed daily rates, which are applied prospectively based on patient acuity and the historical costs incurred in providing patient care. In most states, Medicaid does not fully reimburse the cost of providing services. Certain states are attempting to slow the rate of Medicaid growth by freezing rates or restricting eligibility and benefits. In addition, Medicaid reimbursement rates may decline if state revenues in a particular state are not sufficient to fund budgeted expenditures.
- Medicare Reimbursement for Physicians, Hospital Outpatient Departments (“HOPDs”), and Ambulatory Surgical Centers (“ASCs”)* Changes in reimbursement to physicians, HOPDs and ASCs may further affect our tenants and operators. Generally, Medicare reimburses physicians under the Physician Fee Schedule, while HOPDs and ASCs are reimbursed under prospective payment systems. The Physician Fee Schedule and the HOPD and ASC prospective payment systems are updated annually by CMS. These annual Medicare payment regulations have resulted in lower net pay increases than providers of those services have often expected. In addition, the Medicare and Children’s Health Insurance Program Reauthorization Act of 2015 (“MACRA”) includes payment reductions for providers who do not meet government quality standards. The implementation of pay-for-quality models like those required under MACRA has the potential to produce funding disparities that could adversely impact some provider tenants in outpatient medical buildings and other health care properties. Changes in Medicare Advantage plan payments may also indirectly affect our operators and tenants that contract with Medicare Advantage plans.
- Health Reform Laws* The Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010 (collectively, the “Health Reform Laws”) dramatically altered how health care is delivered and reimbursed in the U.S. and any substantial changes may directly impact us or the operators and tenants of our properties. Other health reform measures could be implemented as a result of political, legislative, regulatory and administrative developments and judicial proceedings. On February 28, 2022, President Biden announced reforms to be implemented by CMS to ensure that: (a) every nursing home provides a sufficient number of staff who are adequately trained to provide high-quality care; (b) poorly performing nursing homes are held accountable for improper and unsafe care and immediately improve their services or are cut off from taxpayer dollars; and (c) the public has better information about nursing home conditions so that they can find the best available options. These reforms include minimum staffing requirements, reinforced safeguards against unnecessary medications, more funding for inspection activities, increased scrutiny on poor performers and expanded financial penalties and other sanctions. We cannot predict whether the existing Health Reform Laws, or future health care reform legislation, executive order, or regulatory changes, will have a material impact on our operators’ or tenants’ property or business.

Fraud & Abuse Enforcement

Long-term/post-acute care facilities (and seniors housing facilities that receive Medicaid payments) are subject to federal, state, and local laws, regulations, and applicable guidance that govern the operations and financial and other arrangements that may be entered into by health care providers. Certain of these laws, such as the AKS and Stark Law, prohibit direct or indirect payments of any kind for the purpose of inducing or encouraging the referral of patients for medical products or services reimbursable by government health care programs. Other government health program laws require providers to furnish only medically necessary services and submit to the government valid and accurate statements for each service. Our operators and tenants that receive payments from federal health care programs, such as Medicare and Medicaid, are subject to substantial financial penalties under the Civil Monetary Penalties Act and the FCA upon a finding of noncompliance with such laws. In addition, states may also have separate false claims acts, which, among other things, generally prohibit health care providers from filing false claims or making false statements to receive payments. Federal and state FCAs contain “whistleblower” provisions that permit private individuals to bring health care fraud enforcement claims on behalf of the government. Still other laws require providers to comply with a variety of safety, health and other requirements relating to the condition of the licensed property and the quality of care provided. Sanctions for violations of these laws, regulations and other applicable guidance may include, but are not limited to, criminal and/or civil penalties and fines, loss of licensure, immediate termination of government payments, exclusion from any government health care program, damage assessments and imprisonment. In certain circumstances, violation of these rules (such as those prohibiting abusive and fraudulent behavior) with respect to one property may subject other facilities under common control or ownership to sanctions, including exclusion from participation in the Medicare and Medicaid programs, as well as other government health care programs, and revocation of healthcare licenses. In the ordinary course of its business, a property operator is regularly subjected to inquiries, investigations and audits by the federal and state agencies that oversee these laws and regulations.

Prosecutions, investigations or whistleblower actions could have a material adverse effect on a property operator’s liquidity, financial condition, and operations, which could adversely affect the ability of the operator to meet its financial obligations to us. In addition, government investigations and enforcement actions brought against the health care industry have increased dramatically over the past several years and are expected to continue. The costs for an operator of a health care property associated with both defending such enforcement actions and the undertakings in settling these actions can be substantial and could have a material adverse effect on the ability of an operator to meet its obligations to us. In addition, Welltower could potentially be directly subject to these health care fraud and abuse laws, as well as potential investigation or enforcement, as a result of our RIDEA-structured arrangements, and certain collaboration or other arrangements we may pursue with stakeholders who are directly subject to these laws.

Federal and State Data Privacy and Security Laws

The Health Insurance Portability and Accountability Act of 1996 (“HIPAA”), as amended by the Health Information Technology for Economic and Clinical Health Act, and numerous other state and federal laws govern the collection, security, dissemination, use, access to and confidentiality of personal information, including individually identifiable health information. Violations of these laws may result in substantial civil and/or criminal fines and penalties. The costs to a business such as ours or to an operator of a health care property associated with developing and maintaining programs and systems to comply with data privacy and security laws, defending against privacy and security related claims or enforcement actions and paying any assessed fines, can be substantial. Moreover, such costs could have a material adverse effect on the ability of an operator to meet its obligations to us. Finally, data privacy and security laws and regulations continue to develop, including with regard to HIPAA and U.S. state privacy laws. The California Consumer Privacy Act has been amended by the California Privacy Rights Act. These updates and the Virginia Consumer Data Protection Act went into effect January 1, 2023. Similar comprehensive privacy laws from Colorado, Connecticut and Utah will go into effect in 2023. As we use data to better inform our investments and the efficacy of care in our communities, these developments may add potential uncertainty and costs towards compliance obligations, business operations or transactions that depend on data. These new privacy laws may create restrictions or requirements in our, our

operators' and other business partners' use, sharing and securing of data. New privacy and security laws could require substantial investment in resources to comply with regulatory changes as privacy and security laws proliferate in divergent ways or impose additional obligations, and potentially create new privacy related legal risks.

United Kingdom

In the U.K., care home services are principally regulated by the Health and Social Care Act 2008 (as amended) and other regulations. This legislation subjects service providers to a number of legally binding "Fundamental Standards" and requires, amongst other things, that all persons carrying out "Regulated Activities" in the U.K., and the managers of such persons, be registered. Providers of care home services are also subject (as data controllers) to laws governing their use of personal data (including in relation to their employees, clients and recipients of their services). These laws currently take the form of the U.K.'s Data Protection Act 2018 and the U.K. General Data Protection Regulation (collectively "U.K. DP Laws"). U.K. DP Laws impose a significant number of obligations on controllers with the potential for fines of up to 4% of annual worldwide turnover or £17.5 million, whichever is greater. Further, to the extent that an entity established in the U.K. or any other jurisdiction offers goods or services to individuals in the European Economic Area, that entity may also be subject to the E.U. General Data Protection Regulation ("E.U. GDPR"). Similarly, the E.U. GDPR imposes obligations on controllers with the potential for fines of up to 4% of annual worldwide turnover or €20 million, whichever is greater. Entities incorporated in or carrying on a business in the U.K., as well as individuals residing in the U.K., are also subject to the U.K. Bribery Act 2010. The U.K. has national minimum wage legislation with a maximum fine for non-payment of £20,000 per worker and employers who fail to pay will be banned from being a company director for up to 15 years. In addition, the Working Time and Holiday Pay Bill 2019-2021 is currently going through the U.K. Parliament, which makes provision for the expiration of the Working Time Regulations 1998, provides for additional regulations governing working time and makes provisions for holiday pay for employees.

Canada

Senior living residences in Canada are provincially regulated. Within each province, there are different categories for senior living residences that are generally based on the level of care sought and/or required by a resident (e.g. assisted or retirement living, senior living residences, residential care, long-term care). In some of these categories and depending on the province, residences may be government funded, or the individual residents may be eligible for a government subsidy, while other residences are exclusively private-pay. The governing legislation and regulations vary by province, but generally the object of the laws is to set licensing requirements and minimum standards for senior living residences, and regulate operations. These laws empower regulators in each province to take a variety of steps to ensure compliance, conduct inspections, issue reports and generally regulate the industry.

Our operations in Canada are subject to privacy legislation, including, in certain provinces, privacy laws specifically related to personal health information. Although the obligations of senior living residences in the various provinces differ, they all include the obligation to protect personal information. Under some of these laws, notification to the regulator in the event of an actual or suspected privacy breach is mandatory. The powers of privacy regulators and penalties for violations of privacy law vary according to the applicable law or are left to the courts. In September 2021, the province of Quebec adopted significant amendments to its privacy legislation, including a new enforcement scheme with significant penalties and fines: up to CAD \$10 million or 2% of global turnover (whichever is greater) for administrative monetary penalties and up to CAD \$25 million or 4% of global turnover for penal fines. The amendments will go into effect in three stages: (i) a few provisions on September 22, 2022, (ii) most provisions on September 22, 2023 (including the new enforcement scheme), and (iii) one provision on September 23, 2024. Senior living residences may also be subject to laws pertaining to residential tenancy, provincial and/or municipal laws applicable to fire safety, food services, zoning, occupational health and safety, public health and the provision of community health care and funded long-term/post-acute care.

Taxation

The following summary of the taxation of the Company and the material U.S. federal income tax consequences to the holders of the equity of the Company and the debt securities of the Company and Welltower OP (defined below) is for general information only and is not tax advice. This summary does not address all aspects of taxation that may be relevant to certain types of holders of stock or securities (including, but not limited to, insurance companies, tax-exempt entities, financial institutions or broker-dealers, persons holding shares of common stock as part of a hedging, integrated conversion, or constructive sale transaction or a straddle, traders in securities that use a mark-to-market method of accounting for their securities, investors in pass-through entities and non-U.S. corporations and persons who are not citizens or residents of the United States).

This summary does not discuss all of the aspects of U.S. federal income taxation that may be relevant to you in light of your particular investment or other circumstances. In addition, this summary does not discuss any state or local income taxation or non-U.S. income taxation or other non-U.S. tax consequences. This summary is based on current U.S. federal income tax laws. Subsequent developments in U.S. federal income tax law, including changes in law or differing interpretations, which may be applied retroactively, could have a material effect on the U.S. federal income tax consequences of purchasing, owning and disposing of our securities as set forth in this summary. Before you purchase our securities, you should consult your own tax advisor regarding the particular U.S. federal, state, local, non-U.S. and other tax consequences of acquiring, owning and selling our securities.

General

Prior to the Reorganization on April 1, 2022, whereby the Company's predecessor, which had been known as Welltower Inc. until that date ("Old Welltower"), became a wholly owned subsidiary of WELL Merger Holdco Sub Inc. in a transaction intending to qualify as a reorganization under section 368(a)(1)(F) of the Internal Revenue Code of 1986, as amended (the "Code"). In connection with the Reorganization, Old Welltower changed its name to Welltower OP Inc., WELL Merger Holdco Sub Inc. changed its name to Welltower Inc. and Old Welltower became a "qualified REIT subsidiary" of the Company. Effective on May 24, 2022, Welltower OP Inc. converted from a Delaware corporation into a Delaware limited liability company named Welltower OP LLC (under both names, "Welltower OP"). Prior to the Reorganization, Old Welltower elected to be taxed as a REIT and was organized and operated in a manner intended to qualify as a REIT. As a result of the Reorganization, the Company is treated as a continuation of Old Welltower for U.S. federal income tax purposes and references in this summary to "the Company," "us," or "we" include references to Old Welltower unless otherwise specified or clearly required by the context.

We have been organized and operated in a manner intended to qualify as a REIT and we intend to continue to operate in such a manner as to qualify as a REIT, but there can be no assurance that we will qualify or remain qualified as a REIT. Qualification and taxation as a REIT depend upon our ability to meet a variety of qualification tests imposed under U.S. federal income tax law with respect to our income, assets, distributions and share ownership, as discussed below under "Qualification as a REIT."

In any year in which we qualify as a REIT, in general, we will not be subject to U.S. federal income tax on that portion of our REIT taxable income or capital gain that is distributed to stockholders. We may, however, be subject to tax at normal corporate rates on any taxable income or capital gain not distributed. If we elect to retain and pay income tax on our net capital gain, stockholders would be taxed on their proportionate shares of our undistributed net capital gain and would receive a refundable credit for their shares of any taxes paid by us on such gain.

Despite qualifying as a REIT, we may be subject to U.S. federal income and excise tax as follows:

- To the extent that we do not distribute all of our net capital gain or distribute at least 90%, but less than 100%, of our "REIT taxable income," as adjusted, we will be subject to tax on the undistributed amount at regular corporate tax rates;
- If we have net income from the sale or other disposition of "foreclosure property" that is held primarily for sale to customers in the ordinary course of business or other non-qualifying income from foreclosure property, such income will be taxed at the highest corporate rate;

- Any net income from prohibited transactions (which are, in general, sales or other dispositions of property held primarily for sale to customers in the ordinary course of business, other than dispositions of foreclosure property) will be subject to a 100% tax;
- If we fail to satisfy either the 75% or 95% gross income tests (as discussed below), but nonetheless maintain our qualification as a REIT because certain other requirements are met, we will be subject to a 100% tax on an amount equal to (1) the gross income attributable to the greater of (i) 75% of our gross income over the amount of qualifying gross income for purposes of the 75% gross income test (discussed below) or (ii) 95% of our gross income over the amount of qualifying gross income for purposes of the 95% gross income test (discussed below) multiplied by (2) a fraction intended to reflect our profitability;
- If we fail to distribute during each year at least the sum of (1) 85% of our REIT ordinary income for the year, (2) 95% of our REIT capital gain net income for such year (other than capital gain that we elect to retain and pay tax on) and (3) any undistributed taxable income from preceding periods, we will be subject to a 4% excise tax on the excess of such required distribution over amounts actually distributed; and
- We will be subject to a 100% tax on certain amounts from certain transactions involving our “taxable REIT subsidiaries” that are not conducted on an arm’s length basis. See “Investments in Taxable REIT Subsidiaries.”

We have acquired assets from “C” corporations in carryover basis transactions and may do so again in the future. A “C” corporation is generally defined as a corporation that is required to pay full corporate level U.S. federal income tax. If we recognize gain on the disposition of such assets during the five-year period beginning on the date on which the assets were acquired by us, then, to the extent of the assets’ “built-in gain” (e.g., the excess of the fair market value of the asset over the adjusted tax basis of the asset, in each case determined as of the beginning of the five-year period), we will be subject to tax on the gain at the highest regular corporate rate applicable. The results described in this paragraph with respect to the recognition of built-in gain assume that the “C” corporation did not make and was not treated as making an election to treat the built-in gain assets as sold to an unrelated party. For our assets that are subject to the built-in gains tax, the potential amount of built-in gains tax will be an additional factor when considering a possible sale of such assets within the five-year period beginning on the date on which the assets were acquired by us. See Note 19 to our consolidated financial statements for additional information regarding the built-in gains tax.

Qualification as a REIT

A REIT is defined as a corporation, trust or association:

- (1) which is managed by one or more trustees or directors;
- (2) the beneficial ownership of which is evidenced by transferable shares or by transferable certificates of beneficial interest;
- (3) which would be taxable as a domestic corporation but for the U.S. federal income tax law relating to REITs;
- (4) which is neither a financial institution nor an insurance company;
- (5) the beneficial ownership of which is held by 100 or more persons in each taxable year of the REIT except for its first taxable year;
- (6) not more than 50% in value of the outstanding stock of which is owned during the last half of each taxable year, excluding its first taxable year, directly, indirectly or constructively, by or for five or fewer individuals (which includes certain entities) (the “Five or Fewer Requirement”); and
- (7) which meets certain income and asset tests described below.

Conditions (1) to (4), inclusive, must be met during the entire taxable year and condition (5) must be met during at least 335 days of a taxable year of 12 months or during a proportionate part of a taxable year of less

than 12 months. For purposes of condition (6), pension funds and certain other tax-exempt entities are treated as individuals, subject to a “look-through” exception in the case of certain pension funds.

Based on publicly available information, we believe we have satisfied the share ownership requirements set forth in (5) and (6) above. In addition, Article VI of our by-laws provides for restrictions regarding ownership and transfer of shares. These restrictions are intended to assist us in continuing to satisfy the share ownership requirements described in (5) and (6) above but may not ensure that we will, in all cases, be able to satisfy such requirements.

We have complied with, and will continue to comply with, tax regulatory rules to send annual letters to certain of our stockholders requesting information regarding the actual ownership of our stock. If, despite sending the annual letters, we do not know, or after exercising reasonable diligence would not have known, whether we failed to meet the Five or Fewer Requirement, we will be treated as having met the Five or Fewer Requirement. If we fail to comply with these tax regulatory rules, we will be subject to a monetary penalty. If our failure to comply were due to intentional disregard of the requirement, the penalty would be increased. However, if our failure to comply were due to reasonable cause and not willful neglect, no penalty would be imposed.

For purposes of the REIT income and asset tests our assets and income will include any asset owned and any income earned directly or indirectly through a disregarded entity, including a “qualified REIT subsidiary,” and a proportionate share of the assets of, and any income earned through, any entity we own that is treated as a partnership for U.S. federal income tax purposes, including Welltower OP. A corporation will qualify as a “qualified REIT subsidiary” if 100% of its stock is owned by a REIT, and the REIT does not elect to treat the subsidiary as a taxable REIT subsidiary.

We will own substantially all of our assets and earn substantially all of our income through Welltower OP and its direct or indirect subsidiaries. Prior to the LLC Conversion, Welltower OP was treated as a “qualified REIT subsidiary,” provided that we continue to qualify as a REIT. After the LLC Conversion, Welltower OP became a disregarded entity for U.S. federal income tax purposes until the admission of additional regarded members, at which time Welltower OP became a regarded entity treated as a partnership for U.S. federal income tax purposes.

Although we intend for any partnership in which we have acquired or will acquire an interest, directly or indirectly (a “Subsidiary Partnership”), to operate in a manner consistent with the requirements for our qualification as a REIT, we will be an indirect limited partner or non-managing member in some of the Subsidiary Partnerships. Though we nonetheless expect that all such Subsidiary Partnerships will be required to operate in a manner consistent with the requirements for our qualification as a REIT, if a Subsidiary Partnership in which we own an interest but do not have control takes or expects to take actions that could jeopardize our status as a REIT or require us to pay tax, we may be forced to dispose of our interest in such entity. In addition, it is possible that a Subsidiary Partnership could take an action which could cause us to fail a gross income or asset test and that we would not become aware of such action in time for us to dispose of our interest in the Subsidiary Partnership or take other corrective action on a timely basis. In that case, we could fail to qualify as a REIT unless we were able to qualify for a statutory REIT “savings” provision, which could require us to pay a significant penalty tax to maintain our REIT qualification.

Income Tests There are two separate percentage tests relating to our sources of gross income that we must satisfy each taxable year:

- At least 75% of our gross income (excluding gross income from certain sales of property held primarily for sale) generally must be directly or indirectly derived each taxable year from “rents from real property,” dividends or other distributions on, and gain (other than gain from prohibited transactions) from the sale or other disposition of, REIT shares, mortgages on real property, other income from investments relating to real property or certain income from qualified temporary investments (the “75% gross income test”).
- At least 95% of our gross income (excluding gross income from certain sales of property held primarily for sale) generally must be directly or indirectly derived each taxable year from any of the sources qualifying for the 75% gross income test and from dividends (including dividends from taxable REIT subsidiaries) and interest (the “95% gross income test”).

Income from hedging and non-U.S. currency transactions is excluded from the 95% and 75% gross income tests if certain requirements are met but otherwise will constitute gross income which does not qualify under the 95% or 75% gross income tests.

Rents received by us will qualify as “rents from real property” for purposes of satisfying the gross income tests for a REIT only if several conditions are met:

- The amount of rent must not be based in whole or in part on the income or profits of any person, although rents generally will not be excluded merely because they are based on a fixed percentage or percentages of receipts or sales.
- Rents received from a tenant will not qualify as rents from real property if the REIT, or an owner of 10% or more of the REIT, directly or constructively owns 10% or more of the tenant, unless the tenant is our taxable REIT subsidiary and certain other requirements are met with respect to the real property being rented.
- If rent attributable to personal property leased in connection with a lease of real property is greater than 15% of the total rent received under the lease, then the portion of rent attributable to such personal property will not qualify as “rents from real property.”
- For rents to qualify as rents from real property, we generally must not furnish or render services to tenants, other than through a taxable REIT subsidiary or an “independent contractor” from whom we derive no income, except that we may directly provide services that are usually or customarily rendered in the geographic area in which the property is located in connection with the rental of real property for occupancy only or are not otherwise considered rendered to the occupant for the occupant’s convenience.
- We may lease “qualified health care properties” on an arm’s-length basis to a taxable REIT subsidiary if the property is operated on behalf of such subsidiary by a person that qualifies as an “independent contractor” and that is, or is related to a person that is, actively engaged in the trade or business of operating health care facilities for any person unrelated to us or our taxable REIT subsidiary (such person, an “eligible independent contractor”). If this is the case, the rent that the REIT receives from the taxable REIT subsidiary generally will be treated as “rents from real property.” A “qualified health care property” includes any real property and any personal property that is, or is necessary or incidental to the use of, a hospital, nursing facility, assisted living facility, congregate care facility, qualified continuing care facility, or other licensed facility that extends medical or nursing or ancillary services to patients and is operated by a provider of such services that is eligible for participation in the Medicare program with respect to such facility.

A REIT is permitted to render a de minimis amount of impermissible services to tenants of a property and still treat amounts received with respect to that property as rent from real property. The amount received or accrued by the REIT during the taxable year for the impermissible services with respect to a property may not exceed 1% of all amounts received or accrued by the REIT directly or indirectly from the property. The amount received for any service or management operation for this purpose shall be deemed to be not less than 150% of the direct cost of the REIT in furnishing or rendering the service or providing the management or operation. Furthermore, impermissible services may be furnished to tenants by a taxable REIT subsidiary subject to certain conditions, which would permit us to still treat rents received with respect to the property as rent from real property.

The term “interest” generally does not include any amount if the determination of the amount depends in whole or in part on the income or profits of any person, although an amount generally will not be excluded from the term “interest” solely by reason of being based on a fixed percentage of receipts or sales or by reason of being based on the income or profits of a debtor which derives substantially all of its income with respect to the property securing such debt from the leasing of substantially all of such property to tenants, to the extent that the rents paid by the tenants would qualify as rents from real property if the Company earned such amounts directly.

If we fail to satisfy one or both of the 75% or 95% gross income tests for any taxable year, we may nevertheless qualify as a REIT for such year if we are eligible for certain relief provisions provided by the

Internal Revenue Code. These relief provisions generally will be available if (1) following our identification of the failure, we file a schedule for such taxable year describing each item of our gross income, and (2) the failure to meet such tests was due to reasonable cause and not due to willful neglect. It is not now possible to determine the circumstances under which we may be entitled to the benefit of these relief provisions. If these relief provisions apply, a 100% tax is imposed on an amount equal to (1) the gross income attributable to (i) 75% of our gross income over the amount of qualifying gross income for purposes of the 75% gross income test and (ii) 95% of our gross income over the amount of qualifying gross income for purposes of the 95% gross income test, multiplied by (2) a fraction intended to reflect our profitability. The Secretary of the Treasury is given broad authority to determine whether particular items of income or gain qualify under the 75% and 95% gross income tests and to exclude items from the measure of gross income for such purposes.

Asset Tests Within 30 days after the close of each quarter of our taxable year, we must also satisfy several tests relating to the nature and diversification of our assets determined in accordance with generally accepted accounting principles. At least 75% of the value of our total assets must be represented by real estate assets (including interests in real property, interests in mortgages on real property or on interests in real property, shares in other REITs and debt instruments issued by publicly offered REITs), cash, cash items (including receivables arising in the ordinary course of our operation), government securities and qualified temporary investments (the “75% asset test”). Although the remaining 25% of our assets generally may be invested without restriction, we are prohibited from owning securities representing more than 10% of either the vote (the “10% vote test”) or value (the “10% value test”) of the outstanding securities of any issuer other than another REIT or a taxable REIT subsidiary. Further, no more than 20% of our total assets may be represented by securities of one or more taxable REIT subsidiaries (the “20% asset test”) and no more than 5% of the value of our total assets may be represented by securities of any nongovernmental issuer other than a qualified REIT subsidiary (the “5% asset test”), another REIT or a taxable REIT subsidiary. Each of the 10% vote test, the 10% value test and the 20% and 5% asset tests must be satisfied at the end of each quarter. There are special rules which provide relief if the value-related tests are not satisfied due to changes in the value of the assets of a REIT.

Certain items are excluded from the 10% value test, including: (1) straight debt securities meeting certain requirements; (2) any loan to an individual or an estate; (3) any rental agreement described in Section 467 of the Internal Revenue Code, other than with a “related person”; (4) any obligation to pay rents from real property; (5) certain securities issued by a state or any subdivision thereof, the District of Columbia, a non-U.S. government, or any political subdivision thereof, or the Commonwealth of Puerto Rico; (6) any security issued by a REIT; and (7) any other arrangement that, as determined by the Secretary of the Treasury, is excepted from the definition of security (“10% Value Excluded Securities”). If a REIT, or its taxable REIT subsidiary, holds (1) straight debt securities of a corporate or partnership issuer and (2) securities of such issuer that are not 10% Value Excluded Securities and have an aggregate value greater than 1% of such issuer’s outstanding securities, the straight debt securities will be included in the 10% value test.

A REIT’s interest as a partner in a partnership is not treated as a security for purposes of applying the 10% value test to securities issued by the partnership. Further, any debt instrument issued by a partnership that is not a 10% Value Excluded Security will not be a security for purposes of applying the 10% value test (1) to the extent of the REIT’s interest as a partner in the partnership or (2) if at least 75% of the partnership’s gross income (excluding gross income from prohibited transactions) would qualify for the 75% gross income test. For purposes of the 10% value test, a REIT’s interest in a partnership’s assets is determined by the REIT’s proportionate interest in any securities issued by the partnership (other than the excluded securities described in the preceding paragraph).

If a REIT or its “qualified business unit” uses a non-U.S. currency as its functional currency, the term “cash” includes such non-U.S. currency, but only to the extent such non-U.S. currency is (i) held for use in the normal course of the activities of the REIT or “qualified business unit” which give rise to items of income or gain that are included in the 95% and 75% gross income tests or are directly related to acquiring or holding assets qualifying under the 75% asset test, and (ii) not held in connection with dealing or engaging in substantial and regular trading in securities.

With respect to corrections of failures as to violations of the 10% vote test, the 10% value test or the 5% asset test, a REIT may avoid disqualification as a REIT by disposing of sufficient assets to cure a violation due to

the ownership of assets that do not exceed the lesser of 1% of the REIT's assets at the end of the relevant quarter or \$10,000,000, provided that the disposition occurs within six months following the last day of the quarter in which the REIT first identified the violation. For violations of any of the REIT asset tests due to reasonable cause and not willful neglect that exceed the thresholds described in the preceding sentence, a REIT can avoid disqualification as a REIT after the close of a taxable quarter by taking certain steps, including disposition of sufficient assets within the six month period described above to meet the applicable asset test, paying a tax equal to the greater of \$50,000 or the highest corporate tax rate multiplied by the net income generated by the non-qualifying assets during the period of time that the assets were held as non-qualifying assets and filing a schedule with the Internal Revenue Service that describes the non-qualifying assets.

Investments in Taxable REIT Subsidiaries REITs may own more than 10% of the voting power and value of securities in taxable REIT subsidiaries. Unlike a qualified REIT subsidiary, other disregarded entity or partnership, the income and assets of a taxable REIT subsidiary are not attributable to the REIT for purposes of satisfying the income and asset ownership requirements applicable to REIT qualification. We and any taxable corporate entity in which we own an interest, directly or indirectly, are allowed to jointly elect to treat such entity as a "taxable REIT subsidiary."

Certain of our subsidiaries have elected or will elect taxable REIT subsidiary status. Taxable REIT subsidiaries are subject to full corporate level U.S. federal taxation on their earnings but are permitted to engage in certain types of activities that cannot be performed directly by REITs without jeopardizing the REIT status of their parent REIT. The taxes to which our taxable REIT subsidiaries are subject will reduce the cash available for such taxable REIT subsidiaries to distribute as dividends to us.

The Internal Revenue Service may redetermine amounts from transactions between a REIT and its taxable REIT subsidiary where there is a lack of arm's-length dealing between the parties. Any taxable income allocated to, or deductible expenses allocated away, from a taxable REIT subsidiary would increase its tax liability. Further, certain amounts from certain transactions involving a REIT and its taxable REIT subsidiaries could be subject to a 100% tax if not conducted on an arm's length basis.

A taxable REIT subsidiary does not include any corporation that directly or indirectly operates or manages a lodging facility or a health care facility unless such facility is operated on behalf of such subsidiary by a person that is an independent contractor and certain other requirements are met. The failure of a subsidiary of ours to qualify as a taxable REIT subsidiary as a result of operating a lodging facility or a health care facility could have an adverse effect on the Company's ability to comply with the REIT income and asset tests, and thus could impair the Company's ability to qualify as a REIT unless the Company could avail itself of certain relief provisions under the Code.

For tax years beginning after December 31, 2022, the Inflation Reduction Act of 2022 ("IRA") imposes among other things, a 15% Corporate Alternative Minimum Tax ("Corporate AMT") on certain U.S. corporations with average adjusted financial statement income in excess of \$1 billion. Although, by its terms, the Corporate AMT is not applicable to REITs, it is not certain whether or how the Corporate AMT would apply to our TRSs.

In December 2022, Treasury issued Notice 2023-7, indicating its intention to propose regulations and provide other guidance regarding the Corporate AMT and issuing certain interim rules on which taxpayers may rely. Until further regulations and guidance from the IRS and Treasury are released, the impact of the Corporate AMT on our TRSs is uncertain and it is possible that our taxable REIT subsidiaries will be subject to material U.S. federal income taxes under the Corporate AMT.

Investments in REIT Subsidiaries The Company, through Welltower OP, owns and may acquire direct or indirect interests in one or more entities that have elected or will elect to be taxed as REITs under the Code (each, a "Subsidiary REIT"). A Subsidiary REIT is subject to the various REIT qualification requirements and other limitations described herein that are applicable to the Company. If a Subsidiary REIT were to fail to qualify as a REIT, then (i) that Subsidiary REIT would become subject to U.S. federal income tax and (ii) the Subsidiary REIT's failure to qualify could have an adverse effect on the Company's ability to comply with the REIT income and asset tests, and thus could impair the Company's ability to qualify as a REIT unless the Company could avail itself of certain relief provisions under the Code.

Annual Distribution Requirements In order to avoid being taxed as a regular corporation, we are required to make distributions (other than capital gain distributions) to our stockholders which qualify for the dividends paid deduction in an amount at least equal to (1) the sum of (i) 90% of our “REIT taxable income” (computed without regard to the dividends paid deduction and our net capital gain) and (ii) 90% of the after-tax net income, if any, from foreclosure property, minus (2) a portion of certain items of non-cash income. These distributions must be paid in the taxable year to which they relate, or in the following taxable year if declared before we timely file our tax return for that year and if paid on or before the first regular distribution payment after such declaration. Prior to 2014, with respect to all REITs the amount distributed could not be preferential. This means that every stockholder of the class of stock to which a distribution is made must be treated the same as every other stockholder of that class, and no class of stock may be treated otherwise than in accordance with its dividend rights as a class (the “preferential dividend rule”). The preferential dividend rule no longer applies to publicly offered REITs, however, the rule is still applicable to REITs which are not publicly offered, which would include several of our Subsidiary REITs. To the extent that we do not distribute all of our net capital gain or distribute at least 90%, but less than 100%, of our “REIT taxable income,” as adjusted, we will be subject to tax on the undistributed amount at regular corporate tax rates. As discussed above, we may be subject to an excise tax if we fail to meet certain other distribution requirements. Although we intend to make timely distributions sufficient to satisfy these annual distribution requirements for subsequent years, economic, market, legal, tax or other factors could limit our ability to meet those requirements.

It is also possible that, from time to time, we may not have sufficient cash or other liquid assets to meet the 90% distribution requirement, or to distribute such greater amount as may be necessary to avoid income and excise taxation, due to, among other things, (1) timing differences between (i) cash receipts and cash expenditures and (ii) the inclusion of income and deduction of expenses in arriving at our taxable income, or (2) the payment of expenditures that may not be deductible to us. In the event that timing differences occur, we may find it necessary to arrange for borrowings or, if possible, pay dividends in the form of taxable stock dividends in order to meet the distribution requirement.

Under certain circumstances, including in the event of a deficiency determined by the Internal Revenue Service, we may be able to rectify a resulting failure to meet the distribution requirement for a year by paying “deficiency dividends” to stockholders in a later year, which may be included in our deduction for distributions paid for the earlier year. Thus, we may be able to avoid being disqualified as a REIT and/or taxed on amounts distributed as deficiency dividends; however, we will be required to pay applicable penalties and interest based upon the amount of any deduction taken for deficiency dividend distributions.

Failure to Qualify as a REIT If we fail to qualify for taxation as a REIT in any taxable year, we will be subject to U.S. federal income tax on our taxable income at regular corporate rates. Distributions to stockholders in any year in which we fail to qualify as a REIT will not be deductible by us. As a result, we anticipate that our failure to qualify as a REIT would reduce the cash available for distribution by us to our stockholders. In addition, if we fail to qualify as a REIT, we will not be required to distribute any amounts to our stockholders, and all distributions to stockholders will be taxable as regular corporate dividends to the extent of our current and accumulated earnings and profits. In such event, corporate stockholders may be eligible for the dividends-received deduction. In addition, non-corporate stockholders, including individuals, may be eligible for the preferential tax rates on qualified dividend income. Non-corporate stockholders, including individuals, generally may deduct up to 20% of dividends from a REIT, other than capital gain dividends and dividends treated as qualified dividend income, for taxable years beginning before January 1, 2026 for purposes of determining their U.S. federal income tax, subject to certain holding period requirements and other limitations. If we fail to qualify as a REIT, such stockholders may not claim this deduction with respect to dividends paid by us. Unless entitled to relief under specific statutory provisions, we also will be disqualified from taxation as a REIT for the four taxable years following the year during which qualification was lost. It is not possible to state whether in all circumstances we would be entitled to statutory relief. Failure to qualify for even one year could result in our need to incur indebtedness or liquidate investments in order to pay potentially significant resulting tax liabilities.

In addition to the relief described above under “Income Tests” and “Asset Tests,” statutory relief is available in the event that we violate a provision of the Internal Revenue Code that would result in our failure to qualify as a REIT if: (1) the violation is due to reasonable cause and not due to willful neglect; (2) we pay a

penalty of \$50,000 for each failure to satisfy the provision; and (3) the violation does not include a violation described under “Income Tests” or “Asset Tests” above. It is not now possible to determine the circumstances under which we may be entitled to the benefit of these relief provisions.

Material U.S. Federal Income Tax Consequences to Holders of Our Stock and the Debt Securities of the Company and Welltower OP

The following discussion is a summary of the material U.S. federal income tax consequences to you of acquiring, owning and disposing of stock of the Company or debt securities of the Company or Welltower OP. This discussion is limited to holders who hold stock of the Company or debt securities of the Company or Welltower OP as “capital assets” within the meaning of Section 1221 of the Code (generally, property held for investment). This discussion does not address all U.S. federal income tax consequences relevant to a holder’s particular circumstances, including the alternative minimum tax. In addition, except where specifically noted, it does not address consequences relevant to holders subject to special rules, including, without limitation:

- U.S. expatriates and former citizens or long-term residents of the United States;
- U.S. holders (as defined below) whose functional currency is not the U.S. dollar;
- persons holding stock or debt securities as part of a hedge, straddle or other risk reduction strategy or as part of a conversion transaction or other integrated investment;
- banks, insurance companies, and other financial institutions;
- REITs or regulated investment companies;
- brokers, dealers or traders in securities;
- “controlled foreign corporations,” “passive foreign investment companies,” and corporations that accumulate earnings to avoid U.S. federal income tax;
- S corporations, partnerships or other entities or arrangements treated as partnerships for U.S. federal income tax purposes (and investors therein);
- tax-exempt organizations or governmental organizations;
- persons subject to special tax accounting rules as a result of any item of gross income with respect to stock or debt securities being taken into account in an applicable financial statement;
- persons deemed to sell stock or debt securities under the constructive sale provisions of the Code; and
- persons who hold or receive our stock pursuant to the exercise of any employee stock option or otherwise as compensation.

THIS DISCUSSION IS FOR INFORMATIONAL PURPOSES ONLY AND IS NOT INTENDED AS TAX ADVICE. INVESTORS SHOULD CONSULT THEIR TAX ADVISORS WITH RESPECT TO THE APPLICATION OF THE U.S. FEDERAL INCOME TAX LAWS TO THEIR PARTICULAR SITUATIONS AS WELL AS ANY TAX CONSEQUENCES OF THE ACQUISITION, OWNERSHIP AND DISPOSITION OF OUR STOCK OR DEBT SECURITIES ARISING UNDER OTHER U.S. FEDERAL TAX LAWS (INCLUDING ESTATE AND GIFT TAX LAWS), UNDER THE LAWS OF ANY STATE, LOCAL OR NON-U.S. TAXING JURISDICTION OR UNDER ANY APPLICABLE TAX TREATY.

For purposes of this discussion, a “U.S. holder” is a beneficial owner of stock of the Company or debt securities of the Company or Welltower OP that, for U.S. federal income tax purposes, is or is treated as:

- an individual who is a citizen or resident of the United States;
- an entity classified as a corporation created or organized under the laws of the United States, any state thereof or the District of Columbia;
- an estate the income of which is subject to U.S. federal income tax regardless of its source; or

- a trust that (1) is subject to the primary supervision of a U.S. court and the control of one or more “United States persons” (within the meaning of Section 7701(a)(30) of the Code) or (2) has a valid election in effect to be treated as a United States person for U.S. federal income tax purposes.

For purposes of this discussion, a “non-U.S. holder” is any beneficial owner of our stock or debt securities that is neither a U.S. holder nor an entity treated as a partnership for U.S. federal income tax purposes.

If an entity treated as a partnership for U.S. federal income tax purposes holds our stock or debt securities, the tax treatment of a partner in the partnership will depend on the status of the partner, the activities of the partnership and certain determinations made at the partner level. Accordingly, partnerships holding stock of the Company or debt securities of the Company or Welltower OP and the partners in such partnerships should consult their tax advisors regarding the U.S. federal income tax consequences to them.

Taxation of Taxable U.S. Holders of Our Stock

Distributions Generally Distributions out of our current or accumulated earnings and profits will be treated as dividends and, other than with respect to capital gain dividends and certain amounts which have previously been subject to corporate level tax, as discussed below, will be taxable to our taxable U.S. holders as ordinary income when actually or constructively received. See “Tax Rates” below. As long as we qualify as a REIT, these distributions will not be eligible for the dividends-received deduction in the case of U.S. holders that are corporations or, except to the extent described in “Tax Rates” below, the preferential rates on qualified dividend income applicable to non-corporate U.S. holders, including individuals. For purposes of determining whether distributions to holders of our stock are out of our current or accumulated earnings and profits, our earnings and profits will be allocated first to our outstanding preferred stock, if any, and then to our outstanding common stock.

To the extent that we make distributions on our stock in excess of our current and accumulated earnings and profits allocable to such stock, these distributions will be treated first as a tax-free return of capital to a U.S. holder to the extent of the U.S. holder’s adjusted tax basis in such shares of stock. This treatment will reduce the U.S. holder’s adjusted tax basis in such shares of stock by such amount, but not below zero. Distributions in excess of our current and accumulated earnings and profits and in excess of a U.S. holder’s adjusted tax basis in its shares will be taxable as capital gain. Such gain will be taxable as long-term capital gain if the shares have been held for more than one year. Dividends we declare in October, November, or December of any year and which are payable to a holder of record on a specified date in any of these months will be treated as both paid by us and received by the holder on December 31 of that year, provided we actually pay the dividend on or before January 31 of the following year. U.S. holders may not include in their own income tax returns any of our net operating losses or capital losses.

U.S. holders that receive taxable stock distributions, including distributions partially payable in our common stock and partially payable in cash, would be required to include the full amount of the distribution (i.e., the cash and the stock portion) as a dividend (subject to limited exceptions) to the extent of our current and accumulated earnings and profits for U.S. federal income tax purposes, as described above. The amount of any distribution payable in our common stock generally is equal to the amount of cash that could have been received instead of the common stock. Depending on the circumstances of a U.S. holder, the tax on the distribution may exceed the amount of the distribution received in cash, in which case such U.S. holder would have to pay the tax using cash from other sources. If a U.S. holder sells the common stock it received in connection with a taxable stock distribution in order to pay this tax and the proceeds of such sale are less than the amount required to be included in income with respect to the stock portion of the distribution, such U.S. holder could have a capital loss with respect to the stock sale that could not be used to offset such income. A U.S. holder that receives common stock pursuant to such distribution generally has a tax basis in such common stock equal to the amount of cash that could have been received instead of such common stock as described above, and has a holding period in such common stock that begins on the day immediately following the payment date for the distribution.

Capital Gain Dividends Dividends that we properly designate as capital gain dividends will be taxable to our taxable U.S. holders as a gain from the sale or disposition of a capital asset held for more than one year, to the extent that such gain does not exceed our actual net capital gain for the taxable year. U.S. holders that are corporations may, however, be required to treat up to 20% of certain capital gain dividends as ordinary income.

Retention of Net Capital Gains We may elect to retain, rather than distribute as a capital gain dividend, all or a portion of our net capital gains. If we make this election, we would pay tax on our retained net capital gains. In addition, to the extent we so elect, our earnings and profits (determined for U.S. federal income tax purposes) would be adjusted accordingly, and a U.S. holder generally would:

- include its pro rata share of our undistributed capital gain in computing its long-term capital gains in its U.S. federal income tax return for its taxable year in which the last day of our taxable year falls, subject to certain limitations as to the amount that is includable;
- be deemed to have paid its share of the capital gains tax imposed on us on the designated amounts included in the U.S. holder's income as long-term capital gain;
- receive a credit or refund for the amount of tax deemed paid by it; and
- increase the adjusted tax basis of its stock by the difference between the amount of includable gains and the tax deemed to have been paid by it.

In addition, a U.S. holder that is a corporation is required to appropriately adjust its earnings and profits for the retained capital gains in accordance with Treasury Regulations. These Treasury Regulations have not yet been promulgated so the appropriate method for making such adjustment is unclear.

Passive Activity Losses and Investment Interest Limitations Distributions we make and gain arising from the sale or exchange of our stock by a U.S. holder will not be treated as passive activity income. As a result, U.S. holders generally will not be able to apply any "passive losses" against this income or gain. A U.S. holder generally may elect to treat capital gain dividends, capital gains from the disposition of our stock and income designated as qualified dividend income, as described in "Tax Rates" below, as investment income for purposes of computing the investment interest limitation, but in such case, the holder will be taxed at ordinary income rates on such amount. Other distributions made by us, to the extent they do not constitute a return of capital, generally will be treated as investment income for purposes of computing the investment interest limitation.

Dispositions of Our Stock Except as described below under "Redemption or Repurchase by Us," if a U.S. holder sells or disposes of shares of our stock, it will recognize gain or loss for U.S. federal income tax purposes in an amount equal to the difference between the amount of cash and the fair market value of any property received on the sale or other disposition of the shares and the holder's adjusted tax basis in the shares. This gain or loss, except as provided below, will be long-term capital gain or loss if the holder has held such stock for more than one year. However, if a U.S. holder recognizes a loss upon the sale or other disposition of stock that it has held for six months or less, after applying certain holding period rules, the loss recognized will be treated as a long-term capital loss to the extent the U.S. holder received distributions from us which were required to be treated as long-term capital gains. The deductibility of capital losses is subject to limitations.

Redemption or Repurchase by Us A redemption or repurchase of shares of our stock will be treated under Section 302 of the Code as a distribution (and taxable as a dividend to the extent of our current and accumulated earnings and profits as described above under "Distributions Generally") unless the redemption or repurchase satisfies one of the tests set forth in Section 302(b) of the Code and is therefore treated as a sale or exchange of the redeemed or repurchased shares. The redemption or repurchase generally will be treated as a sale or exchange if it:

- is "substantially disproportionate" with respect to the U.S. holder,
- results in a "complete redemption" of the U.S. holder's stock interest in us, or
- is "not essentially equivalent to a dividend" with respect to the U.S. holder,

all within the meaning of Section 302(b) of the Code.

In determining whether any of these tests has been met, shares of our stock, including common stock and other equity interests in us, considered to be owned by the U.S. holder by reason of certain constructive ownership rules set forth in the Code, as well as shares of our stock actually owned by the U.S. holder, generally must be taken into account. Because the determination as to whether any of the alternative tests of Section 302(b)

of the Code will be satisfied with respect to the U.S. holder depends upon the facts and circumstances at the time that the determination must be made, U.S. holders are advised to consult their tax advisors to determine such tax treatment.

If a redemption or repurchase of shares of our stock is treated as a distribution, the amount of the distribution will be measured by the amount of cash and the fair market value of any property received. See “Distributions Generally.” A U.S. holder’s adjusted tax basis in the redeemed or repurchased shares generally will be transferred to the holder’s remaining shares of our stock, if any. If a U.S. holder owns no other shares of our stock, under certain circumstances, such basis may be transferred to a related person or it may be lost entirely. Prospective investors should consult their tax advisors regarding the U.S. federal income tax consequences of a redemption or repurchase of our stock.

If a redemption or repurchase of shares of our stock is not treated as a distribution, it will be treated as a taxable sale or exchange in the manner described under “Dispositions of Our Stock.”

Tax Rates Currently, the maximum tax rate for non-corporate taxpayers for (1) long-term capital gains, including certain “capital gain dividends,” generally is 20% (although depending on the characteristics of the assets which produced these gains and on designations which we may make, certain capital gain dividends may be taxed at a 25% rate) and (2) “qualified dividend income” generally is 20%. In general, dividends payable by REITs are not eligible for the reduced tax rate applicable to qualified dividend income, except to the extent that certain holding period requirements have been met and the REIT’s dividends are attributable to dividends received from taxable corporations (such as its taxable REIT subsidiaries) or to income that was subject to tax at the corporate/REIT level (for example, if the REIT distributed taxable income that it retained and paid tax on in the prior taxable year). Capital gain dividends will only be eligible for the rates described above to the extent that they are properly designated by us as “capital gain dividends.” As mentioned above, U.S. holders that are corporations may be required to treat up to 20% of some capital gain dividends as ordinary income. In addition, non-corporate U.S. holders, including individuals, generally may deduct up to 20% of dividends from a REIT, other than capital gain dividends and dividends treated as qualified dividend income, for taxable years beginning before January 1, 2026 for purposes of determining their U.S. federal income tax (but not for purposes of the 3.8% Medicare tax), subject to certain holding period requirements and other limitations.

Taxation of Tax-Exempt U.S. Holders of Our Stock

Dividend income from us and gain arising upon a sale of shares of our stock generally should not be unrelated business taxable income (“UBTI”) to a tax-exempt U.S. holder, except as described below. This income or gain will be UBTI, however, to the extent a tax-exempt U.S. holder holds its shares as “debt-financed property” within the meaning of the Code. Generally, “debt-financed property” is property the acquisition or holding of which was financed through a borrowing by the tax-exempt holder.

For tax-exempt U.S. holders that are social clubs, voluntary employee benefit associations or supplemental unemployment benefit trusts exempt from U.S. federal income taxation under Sections 501(c)(7), (c)(9) or (c)(17) of the Code, respectively, income from an investment in our shares will constitute UBTI unless the organization is able to properly claim a deduction for amounts set aside or placed in reserve for specific purposes so as to offset the income generated by its investment in our shares. These prospective investors should consult their tax advisors concerning these “set aside” and reserve requirements.

Notwithstanding the above, however, a portion of the dividends paid by a “pension-held REIT” may be treated as UBTI as to certain trusts that hold more than 10%, by value, of the interests in the REIT. A REIT will not be a “pension-held REIT” if it is able to satisfy the “not closely held” requirement without relying on the “look-through” exception with respect to certain trusts or if such REIT is not “predominantly held” by “qualified trusts.” As a result of restrictions on ownership and transfer of our stock contained in our charter, we do not expect to be classified as a “pension-held REIT,” and as a result, the tax treatment described above should be inapplicable to our holders. However, because our common stock is (and, we anticipate, will continue to be) publicly traded, we cannot guarantee that this will always be the case.

Taxation of Non-U.S. Holders of Our Stock

The following discussion addresses the rules governing U.S. federal income taxation of the acquisition, ownership and disposition of our stock by non-U.S. holders. These rules are complex, and no attempt is made herein to provide more than a brief summary of such rules. Accordingly, the discussion does not address all aspects of U.S. federal income taxation and does not address other federal, state, local or non-U.S. tax consequences that may be relevant to a non-U.S. holder in light of its particular circumstances. We urge non-U.S. holders to consult their tax advisors to determine the impact of U.S. federal, state, local and non-U.S. income and other tax laws and any applicable tax treaty on the acquisition, ownership and disposition of shares of our stock, including any reporting requirements.

Distributions Generally Distributions (including any taxable stock distributions) that are neither attributable to gains from sales or exchanges by us of United States real property interests (“USRPIs”) nor designated by us as capital gain dividends (except as described below) will be treated as dividends of ordinary income to the extent that they are made out of our current or accumulated earnings and profits. Such distributions ordinarily will be subject to withholding of U.S. federal income tax at a 30% rate or such lower rate as may be specified by an applicable income tax treaty, unless the distributions are treated as effectively connected with the conduct by the non-U.S. holder of a trade or business within the United States (and, if required by an applicable income tax treaty, the non-U.S. holder maintains a permanent establishment in the United States to which such dividends are attributable). Under certain treaties, however, lower withholding rates generally applicable to dividends do not apply to dividends from a REIT. Certain certification and disclosure requirements must be satisfied for a non-U.S. holder to be exempt from withholding under the effectively connected income exemption. Dividends that are treated as effectively connected with a U.S. trade or business generally will not be subject to withholding but will be subject to U.S. federal income tax on a net basis in the same manner as dividends paid to U.S. holders are subject to U.S. federal income tax. Any such dividends received by a non-U.S. holder that is a corporation may also be subject to an additional branch profits tax at a 30% rate (applicable after deducting U.S. federal income taxes paid on such effectively connected income) or such lower rate as may be specified by an applicable income tax treaty.

Except as otherwise provided below, we expect to withhold U.S. federal income tax at the rate of 30% on any distributions made to a non-U.S. holder unless:

(1) a lower treaty rate applies and the non-U.S. holder furnishes an Internal Revenue Service Form W-8BEN or W-8BEN-E (or other applicable documentation) evidencing eligibility for that reduced treaty rate; or

(2) the non-U.S. holder furnishes an Internal Revenue Service Form W-8ECI (or other applicable documentation) claiming that the distribution is income effectively connected with the non-U.S. holder’s trade or business.

Distributions in excess of our current and accumulated earnings and profits will not be taxable to a non-U.S. holder to the extent that such distributions do not exceed the adjusted tax basis of the holder’s stock, but rather will reduce the adjusted tax basis of such stock. To the extent that such distributions exceed the non-U.S. holder’s adjusted tax basis in such stock, they generally will give rise to gain from the sale or exchange of such stock, the tax treatment of which is described below. However, such excess distributions may be treated as dividend income for certain non-U.S. holders. For withholding purposes, we expect to treat all distributions as made out of our current or accumulated earnings and profits. However, amounts withheld may be refundable if it is subsequently determined that the distribution was, in fact, in excess of our current and accumulated earnings and profits, provided that certain conditions are met.

Capital Gain Dividends and Distributions Attributable to a Sale or Exchange of United States Real Property Interests Distributions to a non-U.S. holder that we properly designate as capital gain dividends, other than those arising from the disposition of a USRPI, generally should not be subject to U.S. federal income taxation, unless:

(1) the investment in our stock is treated as effectively connected with the conduct by the non-U.S. holder of a trade or business within the United States (and, if required by an applicable income tax treaty, the non-U.S. holder maintains a permanent establishment in the United States to which such dividends are attributable), in which case the non-U.S. holder will be subject to the same treatment as U.S. holders with respect to such gain,

except that a non-U.S. holder that is a corporation may also be subject to a branch profits tax of up to 30%, as discussed above; or

(2) the non-U.S. holder is a nonresident alien individual who is present in the United States for 183 days or more during the taxable year and certain other conditions are met, in which case the non-U.S. holder will be subject to U.S. federal income tax at a rate of 30% on the non-U.S. holder's capital gains (or such lower rate specified by an applicable income tax treaty), which may be offset by U.S. source capital losses of such non-U.S. holder (even though the individual is not considered a resident of the United States), provided the non-U.S. holder has timely filed U.S. federal income tax returns with respect to such losses.

Pursuant to the Foreign Investment in Real Property Tax Act, which is referred to as "FIRPTA," distributions to a non-U.S. holder that are attributable to gain from sales or exchanges by us of USRPIs, whether or not designated as capital gain dividends, will cause the non-U.S. holder to be treated as recognizing such gain as income effectively connected with a U.S. trade or business. Non-U.S. holders generally would be taxed at the regular rates applicable to U.S. holders, subject to any applicable alternative minimum tax and a special alternative minimum tax in the case of nonresident alien individuals. We also will be required to withhold and to remit to the Internal Revenue Service 21% of any distribution to non-U.S. holders attributable to gain from sales or exchanges by us of USRPIs. Distributions subject to FIRPTA may also be subject to a 30% branch profits tax in the hands of a non-U.S. holder that is a corporation. The amount withheld is creditable against the non-U.S. holder's U.S. federal income tax liability. However, any distribution with respect to any class of stock that is "regularly traded," as defined by applicable Treasury Regulations, on an established securities market located in the United States is not subject to FIRPTA, and therefore, not subject to the 21% U.S. withholding tax described above, if the non-U.S. holder did not own more than 10% of such class of stock at any time during the one-year period ending on the date of the distribution. Instead, such distributions generally will be treated as ordinary dividend distributions and subject to withholding in the manner described above with respect to ordinary dividends. Furthermore, distributions to "qualified foreign pension funds" or entities all of the interests of which are held by "qualified pension funds" are exempt from FIRPTA. Non-U.S. holders should consult their tax advisors regarding the application of these rules.

Retention of Net Capital Gains Although the law is not clear on the matter, it appears that amounts we designate as retained net capital gains in respect of our stock should be treated with respect to non-U.S. holders as actual distributions of capital gain dividends. Under this approach, the non-U.S. holders may be able to offset as a credit against their U.S. federal income tax liability their proportionate share of the tax paid by us on such retained net capital gains and to receive from the Internal Revenue Service a refund to the extent their proportionate share of such tax paid by us exceeds their actual U.S. federal income tax liability. If we were to designate any portion of our net capital gain as retained net capital gain, non-U.S. holders should consult their tax advisors regarding the taxation of such retained net capital gain.

Sale of Our Stock Except as described below under "Redemption or Repurchase by Us," gain realized by a non-U.S. holder upon the sale, exchange or other taxable disposition of our stock generally will not be subject to U.S. federal income tax unless such stock constitutes a USRPI. In general, stock of a domestic corporation that is a "United States real property holding corporation," or USRPHC, will constitute a USRPI. We believe that we are a USRPHC. Our stock will not, however, constitute a USRPI so long as we are a "domestically controlled qualified investment entity." A "domestically controlled qualified investment entity" includes a REIT in which at all times during a five-year testing period less than 50% in value of its stock is held directly or indirectly by non-United States persons, subject to certain rules. For purposes of determining whether a REIT is a "domestically controlled qualified investment entity," a person who at all applicable times holds less than 5% of a class of stock that is "regularly traded" is treated as a United States person unless the REIT has actual knowledge that such person is not a United States person. Because our common stock is (and, we anticipate, will continue to be) publicly traded, no assurance can be given that we are or will continue to be a "domestically controlled qualified investment entity."

Even if we do not qualify as a "domestically controlled qualified investment entity" at the time a non-U.S. holder sells our stock, gain realized from the sale or other taxable disposition by a non-U.S. holder of such stock would not be subject to U.S. federal income tax under FIRPTA as a sale of a USRPI if:

(1) such class of stock is "regularly traded," as defined by applicable Treasury Regulations, on an established securities market such as the New York Stock Exchange; and

(2) such non-U.S. holder owned, actually and constructively, 10% or less of such class of stock throughout the shorter of the five-year period ending on the date of the sale or other taxable disposition or the non-U.S. holder's holding period.

In addition, dispositions of our stock by "qualified foreign pension funds" or entities all of the interests of which are held by "qualified foreign pension funds" are exempt from FIRPTA. Non-U.S. holders should consult their tax advisors regarding the application of these rules.

Notwithstanding the foregoing, gain from the sale, exchange or other taxable disposition of our stock not otherwise subject to FIRPTA will be taxable to a non-U.S. holder if either (a) the investment in our stock is treated as effectively connected with the conduct by the non-U.S. holder of a trade or business within the United States (and, if required by an applicable income tax treaty, the non-U.S. holder maintains a permanent establishment in the United States to which such gain is attributable), in which case the non-U.S. holder will be subject to the same treatment as U.S. holders with respect to such gain, except that a non-U.S. holder that is a corporation may also be subject to the 30% branch profits tax (or such lower rate as may be specified by an applicable income tax treaty) on such gain, as adjusted for certain items, or (b) the non-U.S. holder is a nonresident alien individual who is present in the United States for 183 days or more during the taxable year and certain other conditions are met, in which case the non-U.S. holder will be subject to a 30% tax on the non-U.S. holder's capital gains (or such lower rate specified by an applicable income tax treaty), which may be offset by U.S. source capital losses of the non-U.S. holder (even though the individual is not considered a resident of the United States), provided the non-U.S. holder has timely filed U.S. federal income tax returns with respect to such losses. In addition, even if we are a domestically controlled qualified investment entity, upon disposition of our stock, a non-U.S. holder may be treated as having gain from the sale or other taxable disposition of a USRPI if the non-U.S. holder (1) disposes of such stock within a 30-day period preceding the ex-dividend date of a distribution, any portion of which, but for the disposition, would have been treated as gain from the sale or exchange of a USRPI and (2) acquires, or enters into a contract or option to acquire, or is deemed to acquire, other shares of that stock during the 61-day period beginning with the first day of the 30-day period described in clause (1), unless such class of stock is "regularly traded" and the non-U.S. holder did not own more than 10% of such class of stock at any time during the one-year period ending on the date of the distribution described in clause (1).

If gain on the sale, exchange or other taxable disposition of our stock were subject to taxation under FIRPTA or otherwise as a result of being effectively connected with the conduct by the non-U.S. holder of a trade or business within the United States, the non-U.S. holder would be required to file a U.S. federal income tax return and would be subject to regular U.S. federal income tax with respect to such gain in the same manner as a taxable U.S. holder (subject to any applicable alternative minimum tax and a special alternative minimum tax in the case of nonresident alien individuals). In addition, if the sale, exchange or other taxable disposition of our stock were subject to taxation under FIRPTA, and if shares of the applicable class of our stock were not "regularly traded" on an established securities market, the purchaser of such stock generally would be required to withhold and remit to the Internal Revenue Service 15% of the purchase price.

Redemption or Repurchase by Us A redemption or repurchase of shares of our stock will be treated under Section 302 of the Code as a distribution (and taxable as a dividend to the extent of our current and accumulated earnings and profits) unless the redemption or repurchase satisfies one of the tests set forth in Section 302(b) of the Code and is therefore treated as a sale or exchange of the redeemed or repurchased shares. See "Redemption or Repurchase by Us" under "Taxation of Taxable U.S. Holders of Our Stock" above. Qualified shareholders and their owners may be subject to different rules, and should consult their tax advisors regarding the application of such rules. If the redemption or repurchase of shares is treated as a distribution, the amount of the distribution will be measured by the amount of cash and the fair market value of any property received. See "Distributions Generally" above. If the redemption or repurchase of shares is not treated as a distribution, it will be treated as a taxable sale or exchange in the manner described above under "- Sale of Our Stock."

Taxation of Holders of Debt Securities of the Company or Welltower OP

The following summary describes the material U.S. federal income tax consequences of acquiring, owning and disposing of debt securities of the Company or Welltower OP. This discussion assumes the debt securities

will be issued with less than a statutory de minimis amount of original issue discount for U.S. federal income tax purposes. In addition, this discussion is limited to persons purchasing the debt securities for cash at original issue and at their original “issue price” within the meaning of Section 1273 of the Code (i.e., the first price at which a substantial amount of the debt securities is sold to the public for cash).

U.S. Holders

Payments of Interest. Interest on a debt security generally will be taxable to a U.S. holder as ordinary income at the time such interest is received or accrued, in accordance with such U.S. holder’s method of accounting for U.S. federal income tax purposes.

Sale or Other Taxable Disposition A U.S. holder will recognize gain or loss on the sale, exchange, redemption, retirement or other taxable disposition of a debt security. The amount of such gain or loss generally will be equal to the difference between the amount received for the debt security in cash or other property valued at fair market value (less amounts attributable to any accrued but unpaid interest, which will be taxable as interest to the extent not previously included in income) and the U.S. holder’s adjusted tax basis in the debt security. A U.S. holder’s adjusted tax basis in a debt security generally will be equal to the amount the U.S. holder paid for the debt security. Any gain or loss generally will be capital gain or loss, and will be long-term capital gain or loss if the U.S. holder has held the debt security for more than one year at the time of such sale or other taxable disposition. Otherwise, such gain or loss will be short-term capital gain or loss. Long-term capital gains recognized by certain non-corporate U.S. holders, including individuals, generally will be taxable at reduced rates. The deductibility of capital losses is subject to limitations.

Non-U.S. Holders

Payments of Interest. Interest paid on a debt security to a non-U.S. holder that is not effectively connected with the non-U.S. holder’s conduct of a trade or business within the United States generally will not be subject to U.S. federal income tax or withholding, provided that:

- the non-U.S. holder does not, actually or constructively, own 10% or more of the total combined voting power of all classes of our voting stock;
- the non-U.S. holder is not a controlled foreign corporation related to us through actual or constructive stock ownership; and
- either (1) the non-U.S. holder certifies in a statement provided to the applicable withholding agent under penalties of perjury that it is not a United States person and provides its name and address; (2) a securities clearing organization, bank or other financial institution that holds customers’ securities in the ordinary course of its trade or business and holds the debt security on behalf of the non-U.S. holder certifies to the applicable withholding agent under penalties of perjury that it, or the financial institution between it and the non-U.S. holder, has received from the non-U.S. holder a statement under penalties of perjury that such holder is not a United States person and provides the applicable withholding agent with a copy of such statement; or (3) the non-U.S. holder holds its debt security directly through a “qualified intermediary” (within the meaning of the applicable Treasury Regulations) and certain conditions are satisfied.

If a non-U.S. holder does not satisfy the requirements above, such non-U.S. holder will be subject to withholding tax of 30%, subject to a reduction in or an exemption from withholding on such interest as a result of an applicable tax treaty. To claim such entitlement, the non-U.S. holder must provide the applicable withholding agent with a properly executed Internal Revenue Service Form W-8BEN or W-8BEN-E (or other applicable documentation) claiming a reduction in or exemption from withholding tax under the benefit of an income tax treaty between the United States and the country in which the non-U.S. holder resides or is established.

If interest paid to a non-U.S. holder is effectively connected with the non-U.S. holder’s conduct of a trade or business within the United States (and, if required by an applicable income tax treaty, the non-U.S. holder maintains a permanent establishment in the United States to which such interest is attributable), the non-U.S. holder will be exempt from the U.S. federal withholding tax described above. To claim the exemption, the

non-U.S. holder must furnish to the applicable withholding agent a valid Internal Revenue Service Form W-8ECI, certifying that interest paid on a debt security is not subject to withholding tax because it is effectively connected with the conduct by the non-U.S. holder of a trade or business within the United States.

Any such effectively connected interest generally will be subject to U.S. federal income tax at the regular rates. A non-U.S. holder that is a corporation may also be subject to a branch profits tax at a rate of 30% (or such lower rate specified by an applicable income tax treaty) on such effectively connected interest, as adjusted for certain items.

The certifications described above must be provided to the applicable withholding agent prior to the payment of interest and must be updated periodically. Non-U.S. holders that do not timely provide the applicable withholding agent with the required certification, but that qualify for a reduced rate under an applicable income tax treaty, may obtain a refund of any excess amounts withheld by timely filing an appropriate claim for refund with the Internal Revenue Service. Non-U.S. holders should consult their tax advisors regarding their entitlement to benefits under any applicable income tax treaty.

Sale or Other Taxable Disposition A non-U.S. holder will not be subject to U.S. federal income tax on any gain realized upon the sale, exchange, redemption, retirement or other taxable disposition of a debt security (such amount excludes any amount allocable to accrued and unpaid interest, which generally will be treated as interest and may be subject to the rules discussed above in “Payments of Interest”) unless:

- the gain is effectively connected with the non-U.S. holder’s conduct of a trade or business within the United States (and, if required by an applicable income tax treaty, the non-U.S. holder maintains a permanent establishment in the United States to which such gain is attributable); or
- the non-U.S. holder is a nonresident alien individual present in the United States for 183 days or more during the taxable year of the disposition and certain other requirements are met.

Gain described in the first bullet point above generally will be subject to U.S. federal income tax on a net income basis at the regular rates. A non-U.S. holder that is a corporation also may be subject to a branch profits tax at a rate of 30% (or such lower rate specified by an applicable income tax treaty) on such effectively connected gain, as adjusted for certain items.

A non-U.S. holder described in the second bullet point above will be subject to U.S. federal income tax at a rate of 30% (or such lower rate specified by an applicable income tax treaty) on gain realized upon the sale or other taxable disposition of a debt security, which may be offset by U.S. source capital losses of the non-U.S. holder (even though the individual is not considered a resident of the United States), provided the non-U.S. holder has timely filed U.S. federal income tax returns with respect to such losses.

Non-U.S. holders should consult their tax advisors regarding any applicable income tax treaties that may provide for different rules.

Information Reporting and Backup Withholding

U.S. Holders A U.S. holder may be subject to information reporting and backup withholding when such holder receives payments on stock of the Company or debt securities of the Company or Welltower OP or proceeds from the sale or other taxable disposition of such stock or debt securities (including a redemption or retirement of a debt security). Certain U.S. holders are exempt from backup withholding, including corporations and certain tax-exempt organizations. A U.S. holder will be subject to backup withholding if such holder is not otherwise exempt and:

- the holder fails to furnish the holder’s taxpayer identification number, which for an individual is ordinarily his or her social security number;
- the holder furnishes an incorrect taxpayer identification number;
- the applicable withholding agent is notified by the Internal Revenue Service that the holder previously failed to properly report payments of interest or dividends; or

- the holder fails to certify under penalties of perjury that the holder has furnished a correct taxpayer identification number and that the Internal Revenue Service has not notified the holder that the holder is subject to backup withholding.

Backup withholding is not an additional tax. Any amounts withheld under the backup withholding rules may be allowed as a refund or a credit against a U.S. holder's U.S. federal income tax liability, provided the required information is timely furnished to the Internal Revenue Service. U.S. holders should consult their tax advisors regarding their qualification for an exemption from backup withholding and the procedures for obtaining such an exemption.

Non-U.S. Holders Payments of dividends on stock of the Company or interest on debt securities of the Company or Welltower OP generally will not be subject to backup withholding, provided the applicable withholding agent does not have actual knowledge or reason to know the holder is a United States person and the holder either certifies its non-U.S. status, such as by furnishing a valid Internal Revenue Service Form W-8BEN, W-8BEN-E or W-8ECI, or otherwise establishes an exemption. However, information returns are required to be filed with the Internal Revenue Service in connection with any distributions on stock of the Company or interest on debt securities of the Company or Welltower OP paid to the non-U.S. holder, regardless of whether such distributions constitute a dividend or whether any tax was actually withheld. In addition, proceeds of the sale or other taxable disposition of such stock or debt securities (including a retirement or redemption of a debt security) within the United States or conducted through certain U.S.-related brokers generally will not be subject to backup withholding or information reporting if the applicable withholding agent receives the certification described above and does not have actual knowledge or reason to know that such holder is a United States person, or the holder otherwise establishes an exemption. Proceeds of a disposition of such stock or debt securities conducted through a non-U.S. office of a non-U.S. broker generally will not be subject to backup withholding or information reporting.

Copies of information returns that are filed with the Internal Revenue Service may also be made available under the provisions of an applicable treaty or agreement to the tax authorities of the country in which the non-U.S. holder resides or is established.

Backup withholding is not an additional tax. Any amounts withheld under the backup withholding rules may be allowed as a refund or a credit against a non-U.S. holder's U.S. federal income tax liability, provided the required information is timely furnished to the Internal Revenue Service.

Medicare Contribution Tax on Unearned Income

Certain U.S. holders that are individuals, estates or trusts are required to pay an additional 3.8% tax on, among other things, dividends on stock, interest on debt obligations, and capital gains from the sale or other disposition of stock or debt obligations, subject to certain limitations. U.S. holders should consult their tax advisors regarding the effect, if any, of these rules on their ownership and disposition of our stock or debt securities.

Additional Withholding Tax on Payments Made to Non-U.S. Accounts

Withholding taxes may be imposed under Sections 1471 to 1474 of the Code (such sections commonly referred to as the Foreign Account Tax Compliance Act ("FATCA")) on certain types of payments made to non-U.S. financial institutions and certain other non-U.S. entities. Specifically, a 30% withholding tax may be imposed on dividends on stock of the Company, interest on debt securities of the Company or Welltower OP, in each case paid to a "foreign financial institution" or a "non-financial foreign entity" (each as defined in the Code), unless (1) the foreign financial institution undertakes certain diligence and reporting obligations, (2) the non-financial foreign entity either certifies it does not have any "substantial United States owners" (as defined in the Code) or furnishes identifying information regarding each substantial United States owner, or (3) the foreign financial institution or non-financial foreign entity otherwise qualifies for an exemption from these rules. If the payee is a foreign financial institution and is subject to the diligence and reporting requirements in clause (1) above, it must enter into an agreement with the U.S. Department of the Treasury requiring, among other things, that it undertake to identify accounts held by certain "specified United States persons" or "United States

owned foreign entities” (each as defined in the Code), annually report certain information about such accounts, and withhold 30% on certain payments to non-compliant foreign financial institutions and certain other account holders. Foreign financial institutions located in jurisdictions that have an intergovernmental agreement with the United States governing FATCA may be subject to different rules.

Under the applicable Treasury Regulations and administrative guidance, withholding under FATCA generally applies to payments of dividends on stock of the Company or interest on debt securities of the Company or Welltower OP. While withholding under FATCA would have applied also to payments of gross proceeds from the sale or other disposition of stock or debt securities on or after January 1, 2019, proposed Treasury Regulations eliminate FATCA withholding on payments of gross proceeds entirely. Taxpayers generally may rely on these proposed Treasury Regulations until final Treasury Regulations are issued. Because we may not know the extent to which a distribution is a dividend for U.S. federal income tax purposes at the time it is made, for purposes of these withholding rules we may treat the entire distribution as a dividend.

Non-U.S. holders should consult their tax advisors regarding the potential application of withholding under FATCA to their investment in stock of the Company or debt securities of the Company or Welltower OP.

Other Tax Consequences

State, local and non-U.S. income tax laws may differ substantially from the corresponding U.S. federal income tax laws, and this discussion does not purport to describe any aspect of the tax laws of any state, local or non-U.S. jurisdiction, or any U.S. federal tax other than income tax. You should consult your tax advisor regarding the effect of state, local and non-U.S. tax laws with respect to our tax treatment as a REIT and on an investment in our stock or debt securities.

In addition, the tax laws and regulations in non-U.S. jurisdictions may impose costs and expenses on the Company, its subsidiaries, and assets and investments of the Company held in non-U.S. jurisdictions (including the costs of compliance with and filings under applicable laws, rules and regulations). The Company has substantial assets, and will likely be subject to tax, reporting, legal, regulatory, and other obligations, in the U.K. and Canada. The treatment of an entity for U.S. federal income tax purposes may not be determinative of its treatment for certain state, local, or non-U.S. tax purposes.

Tax Aspects of Our Investments in Welltower OP and Subsidiary Partnerships

The following discussion summarizes certain U.S. federal income tax considerations applicable to our direct or indirect investments in subsidiary partnerships (including Welltower OP).

Classification as Partnerships We are required to include in our income our distributive share of Welltower OP’s and Subsidiary Partnerships’ income and are entitled to deduct our distributive share of Welltower OP’s and Subsidiary Partnerships’ losses only if the applicable partnership is classified for U.S. federal income tax purposes as a partnership rather than as a corporation or association taxable as a corporation. An organization will be classified as a partnership, rather than as a corporation, for U.S. federal income tax purposes if it (1) is treated as a partnership under Treasury regulations relating to entity classification (the “check-the-box regulations”) and (2) is not a “publicly traded partnership” taxable as a corporation.

Under the check-the-box regulations, an unincorporated entity with at least two members may elect to be classified either as an association taxable as a corporation or as a partnership. Generally, if such an entity fails to make an election, it generally will be treated as a partnership for U.S. federal income tax purposes. We believe that Welltower OP is classified as a partnership for U.S. federal income tax purposes.

A publicly traded partnership is a partnership whose interests are traded on an established securities market or are readily tradable on a secondary market (or the substantial equivalent thereof). While interests in Welltower OP and Subsidiary Partnership will not be traded on an established securities market, they could possibly be deemed to be traded on a secondary market or its equivalent due to the redemption rights enabling the limited members to dispose of their interests. A publicly traded partnership will not, however, be treated as a corporation for any taxable year if 90% or more of the partnership’s gross income for such year consists of certain passive-type income, including (as may be relevant here) real property rents, gains from the sale or other disposition of

real property, interest, and dividends (the “90% Passive Income Exception”). The income requirements applicable to us in order for us to qualify as a REIT under the Code and the definition of qualifying income under the Passive Income Exception are very similar. Although differences exist between these two income tests, we do not believe that these differences would cause Welltower OP or Subsidiary Partnerships not to satisfy the 90% Passive Income Exception applicable to publicly traded partnerships.

If for any reason Welltower OP or a Subsidiary Partnership were taxable as a corporation, rather than as a partnership, for U.S. federal income tax purposes, our ability to qualify as a REIT could be jeopardized. See “Income Tests” and “Asset Tests.” In addition, any change in Welltower OP’s or a Subsidiary Partnership’s status for tax purposes might be treated as a taxable event, in which case we might incur tax liability without any related cash distribution. See “Annual Distribution Requirements.” Further, items of income and deduction of Welltower OP or a Subsidiary Partnership would not pass through to its members, and its members would be treated as shareholders for tax purposes. Consequently, Welltower OP or a Subsidiary Partnership would be required to pay income tax at corporate tax rates on its net income, and distributions to its members would constitute dividends that would not be deductible in computing such Welltower OP’s or Subsidiary Partnership’s taxable income.

Members, Not Partnership, Subject to Tax Except as discussed below in “Revised Partnership Audit Rules,” a partnership itself is not a taxable entity for U.S. federal income tax purposes. Rather, we are required to take into account our allocable share of each partnership’s income, gains, losses, deductions and credits for any taxable year of the partnership ending during our taxable year, without regard to whether we have received or will receive any distribution from such partnership.

Partnership Allocations Although a partnership agreement generally will determine the allocation of income and losses among partners, such allocations will be disregarded for tax purposes if they do not comply with the provisions of Section 704(b) of the Code and the Treasury regulations promulgated thereunder. If an allocation is not recognized for U.S. federal income tax purposes, the item subject to the allocation will be reallocated in accordance with the partners’ interests in the partnership, which will be determined by considering all of the facts and circumstances relating to the economic arrangement of the partners with respect to such item. Welltower OP’s and each Subsidiary Partnerships’ allocations of taxable income, gain and loss are intended to comply with the requirements of Section 704(b) of the Code and the Treasury regulations promulgated thereunder.

Tax Allocations with Respect to Certain Properties Pursuant to Section 704(c) of the Code, income, gain, loss and deduction attributable to appreciated or depreciated property that is contributed to a partnership in exchange for an interest in the partnership must be allocated in a manner such that the contributing partner is charged with, or benefits from, respectively, the unrealized gain or unrealized loss associated with the property at the time of the contribution. The amount of such unrealized gain or unrealized loss is generally equal to the difference between the fair market value of contributed property at the time of contribution and the adjusted tax basis of such property at the time of contribution (a “Book-Tax Difference”). Such allocations are solely for U.S. federal income tax purposes and do not affect the book capital accounts or other economic or legal arrangements among the partners. Welltower OP’s partnership agreement requires such allocations to be made in a manner permitted under Section 704(c) of the Code.

In general, the members who contribute property to Welltower OP will be allocated depreciation deductions for tax purposes which are lower than such deductions would be if determined on a pro rata basis. In addition, in the event of the disposition of any of the contributed assets (including our properties) which have a Book-Tax Difference, all gain or loss attributable to such Book-Tax Difference (to the extent not previously taken into account) will generally be allocated to the contributing members, including us, and other members will generally be allocated only their share of income attributable to gain or loss, if any, occurring after such contribution. This will tend to eliminate the Book-Tax Difference over the life of Welltower OP. However, the special allocation rules of Section 704(c) do not always entirely eliminate the Book-Tax Difference on an annual basis or with respect to a specific taxable transaction such as a sale. Thus, the carryover basis of the contributed assets in the hands of Welltower OP may cause us to be allocated lower depreciation and other deductions, and possibly an amount of taxable gain in the event of a sale of such contributed assets in excess of the economic or book income allocated to us as a result of such sale.

A Book-Tax Difference may also arise as a result of the revaluation of property owned by a partnership in connection with certain types of transactions, including in connection with certain non-prorata contributions of assets to, or distributions of assets by, Welltower OP in exchange for, or in redemption of, interests in Welltower OP. In the event of such a revaluation, the members (including us) who were members in the partnership immediately prior to the revaluation will be required to take any Book-Tax Difference created as a result of such revaluation into account in substantially the same manner as under the Section 704(c) rules discussed above. This would result in us being allocated income, gain, loss and deduction for tax purposes in amounts different than the economic or book income allocated to us by the partnership.

The application of Section 704(c) to Welltower OP may cause us to recognize taxable income in excess of cash proceeds, which might adversely affect our ability to comply with the REIT distribution requirements. See “Annual Distribution Requirements.” The foregoing principles also apply in determining our earnings and profits for purposes of determining the portion of distributions taxable as dividend income. The application of these rules over time may result in a higher portion of distributions being taxed as dividends than would have occurred had we purchased the contributed or revalued assets at their agreed values.

Treasury has issued regulations requiring partnerships to use a “reasonable method” for allocating items affected by Section 704(c) of the Code and outlining several reasonable allocation methods. We have the discretion to determine which of the methods of accounting for Book-Tax Differences (specifically approved in the Treasury regulations) will be elected with respect to any properties contributed to or revalued by Welltower OP. We have not determined which method of accounting for Book-Tax Differences will be elected for properties contributed to or revalued by Welltower OP in the future.

Basis in Partnership Interest Our adjusted tax basis in a partnership interest generally is equal to:

- the amount of cash and the adjusted tax basis of any other property contributed (or deemed contributed) by us to the partnership;
- increased by our allocable share of the partnership’s income, and
- reduced, but not below zero, by
 - our allocable share of the partnership’s loss, and
 - the amount of cash and the basis of any property distributed (or deemed distributed) to us.

If the allocation of our distributive share of the partnership’s loss would reduce the adjusted tax basis of our partnership interest in the partnership below zero, the recognition of such loss will be deferred until such time as the recognition of such loss would not reduce our adjusted tax basis below zero. To the extent that the partnership’s distributions (including deemed distributions) would reduce our adjusted tax basis below zero, such distributions would constitute taxable gain to us, which could be treated as ordinary income or long-term or short-term capital gain.

Partnership Audit Rules A partnership (and not its partners) must pay any “imputed underpayments,” consisting of delinquent taxes, interest, and penalties deemed to arise out of an audit of the partnership, unless certain alternative methods are available and the partnership elects to utilize them. The Internal Revenue Service has issued regulations providing details on many of these provisions, but it is still not entirely clear how all of these rules will be implemented. Accordingly, it is possible that in the future, we and/or any partnership in which we are a partner could be subject to, or otherwise bear the economic burden of, U.S. federal income tax, interest, and penalties resulting from a U.S. federal income tax audit.

Internet Access to Our SEC Filings

Our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports, as well as our proxy statements and other materials that are filed with, or furnished to, the Securities and Exchange Commission (“SEC”) are made available, free of charge, on the Internet at www.welltower.com/investors, as soon as reasonably practicable after they are filed with, or furnished to, the SEC. We routinely post important information on our website at www.welltower.com in the “Investors” section,

including corporate and investor presentations and financial information. We intend to use our website as a means of disclosing material, non-public information and for complying with our disclosure obligations under Regulation FD. Such disclosures will be included on our website under the heading “Investors.” Accordingly, investors should monitor such portion of our website in addition to following our press releases, public conference calls, and filings with the SEC. The information on our website is not incorporated by reference in this Annual Report on Form 10-K, and our web address is included as an inactive textual reference only.

Cautionary Statement Regarding Forward-Looking Statements

This Annual Report on Form 10-K and the documents incorporated by reference contain statements that constitute “forward-looking statements,” within the meaning of the Private Securities Litigation Reform Act of 1995. When we use words such as “may,” “will,” “intend,” “should,” “believe,” “expect,” “anticipate,” “project,” “estimate” or similar expressions that do not relate solely to historical matters, we are making forward-looking statements. In particular, these forward-looking statements include, but are not limited to, those relating to our opportunities to acquire, develop or sell properties; our ability to close our anticipated acquisitions, investments or dispositions on currently anticipated terms, or within currently anticipated timeframes; the expected performance of our operators/tenants and properties; our expected occupancy rates; our ability to declare and to make distributions to stockholders; our investment and financing opportunities and plans; our continued qualification as a REIT; and our ability to access capital markets or other sources of funds.

Forward-looking statements are not guarantees of future performance and involve risks and uncertainties that may cause our actual results to differ materially from our expectations discussed in the forward-looking statements. This may be a result of various factors, including, but not limited to:

- the impact of the COVID-19 pandemic;
- uncertainty regarding the implementation and impact of the CARES Act and future stimulus or other COVID-19 relief legislation;
- status of the economy;
- the status of capital markets, including availability and cost of capital;
- issues facing the health care industry, including compliance with, and changes to, regulations and payment policies, responding to government investigations and punitive settlements and operators’/tenants’ difficulty in cost-effectively obtaining and maintaining adequate liability and other insurance;
- changes in financing terms;
- competition within the health care and seniors housing industries;
- negative developments in the operating results or financial condition of operators/tenants, including, but not limited to, their ability to pay rent and repay loans;
- our ability to transition or sell properties with profitable results;
- the failure to make new investments or acquisitions as and when anticipated;
- natural disasters and other acts of God affecting our properties;
- our ability to re-lease space at similar rates as vacancies occur;
- our ability to timely reinvest sale proceeds at similar rates to assets sold;
- operator/tenant or joint venture partner bankruptcies or insolvencies;
- the cooperation of joint venture partners;
- government regulations affecting Medicare and Medicaid reimbursement rates and operational requirements;
- liability or contract claims by or against operators/tenants;

- unanticipated difficulties and/or expenditures relating to future investments or acquisitions;
- environmental laws affecting our properties;
- changes in rules or practices governing our financial reporting;
- the movement of U.S. and foreign currency exchange rates;
- our ability to maintain our qualification as a REIT;
- key management personnel recruitment and retention; and
- the risks described under “Item 1A — Risk Factors.”

We undertake no obligation to update or revise publicly any forward-looking statements, whether because of new information, future events, or otherwise.

Item 1A. Risk Factors

Risk Factor Summary

The following summarizes the principal factors that make an investment in our company speculative or risky, all of which are more fully described in the Risk Factors section below. This summary should be read in conjunction with the Risk Factors section and should not be relied upon as an exhaustive summary of the material risks facing our business. The order of presentation is not necessarily indicative of the level of risk that each factor poses to us.

Risks Arising from Our Business:

Our business model and the operations of our business involve risks, including those related to:

- investments in and acquisitions of health care and seniors housing properties;
- unknown liability exposure related to acquired properties;
- competition for acquisitions may result in increased prices;
- our joint venture partners;
- Seniors Housing Operating properties operational risks;
- our ability to terminate our management agreements with Seniors Housing Operating managers;
- operational and legal risks with respect to our properties managed in RIDEA structures;
- the ability of operators and tenants to make payments to us;
- the impacts of severe cold and flu seasons or other widespread illnesses on occupancy;
- the insolvency or bankruptcy of our tenants, operators, borrowers, managers and other obligors;
- our ability to timely reinvest our sale proceeds on terms acceptable to us;
- any adverse developments in the business or financial condition of Sunrise Senior Living, LLC;
- ownership of property outside the U.S.;
- our ability to lease or sell properties on favorable terms;
- tenant, operator and manager insurance coverage;
- loss of properties owned through ground leases upon breach or termination of the ground leases;
- requirements of, or changes to governmental reimbursement programs, such as Medicare, Medicaid or government funding;
- controls imposed on certain of our tenants who provide health care services that are reimbursed by Medicare, Medicaid and other third-party payors to reduce admissions and length of stay;

- our operators' or tenants' failure to comply with federal, state, province, local, and industry-regulated licensure, certification and inspection laws, regulations, and standards;
- development, redevelopment and construction;
- losses caused by severe weather conditions, natural disasters or the physical effects of climate change;
- costs incurred to remediate environmental contamination at our properties;
- our reliance on data and technology systems and the increasing risks of cybersecurity incidents;
- our dependence on key personnel; and
- Welltower's holding company status.

Risks Arising from Our Capital Structure

Our capital structure involves exposure to risks, including those related to:

- our future leverage;
- the availability of cash for distributions to stockholders;
- covenants in our debt agreements;
- limitations on our ability to access capital;
- any downgrades in our credit ratings; and
- increases in interest rates.

Risks Arising from Our Status as a REIT

As a result of our status as a REIT, we are exposed to risks, including those related to:

- our ability to remain qualified as a REIT;
- Welltower OP's ability to maintain status of a partnership;
- the ability of our subsidiaries to qualify as a REIT;
- the impact of tax imposed on any net income from "prohibited transactions" may limit our ability to engage in transactions which would be treated as sales for federal income tax purposes;
- the impact of the 90% annual distribution requirement on our liquidity and ability to engage in otherwise beneficial transactions;
- our limited ability to use taxable REIT subsidiaries under the Code;
- special requirements applicable to the lease of qualified health care properties to a taxable REIT subsidiary;
- the tax imposed on any net income from "prohibited transactions";
- tax consequences if certain sale-leaseback transactions are not characterized by the IRS as "true leases";
- changes in our tax rate or exposure to additional tax liabilities; and
- the impact to our TRSs of the Corporate Alternative Minimum Tax imposed by the Inflation Reduction Act of 2022.

Risks Factors

This section highlights significant factors, events and uncertainties that could create risk with an investment in our securities. The events and consequences discussed in these risk factors could, in circumstances we may not

be able to accurately predict, recognize or control, have a material adverse effect on our business, growth, reputation, prospects, financial condition, operating results, cash flows, liquidity, ability to pay dividends and stock price. These risk factors do not identify all risks that we face: our operations could also be affected by factors, events or uncertainties that are not presently known to us or that we currently do not consider to present significant risks to our operations. We group these risk factors into three categories:

- Risks arising from our business;
- Risks arising from our capital structure; and
- Risks arising from our status as a REIT.

Risks Arising from Our Business

Our investments in and acquisitions of health care and seniors housing properties may be unsuccessful or fail to meet our expectations

Some of our acquisitions may not prove to be successful. We could encounter unanticipated difficulties and expenditures relating to any acquired properties, including contingent liabilities, and acquired properties might require significant management attention that would otherwise be devoted to our ongoing business. If we agree to provide construction funding to an operator/tenant and the project is not completed, we may need to take steps to ensure completion of the project. Such expenditures may negatively affect our results of operations. Investments in and acquisitions of seniors housing and health care properties entail risks associated with real estate investments generally, including risks that the investment will not achieve expected returns, that the cost estimates for necessary property improvements will prove inaccurate or that the tenant, operator or manager will fail to meet performance expectations. Furthermore, there can be no assurance that our anticipated acquisitions and investments, the completion of which is subject to various conditions, will be consummated in accordance with anticipated timing, on anticipated terms, or at all. We may be unable to obtain or assume financing for acquisitions on favorable terms or at all. Health care properties are often highly customizable and the development or redevelopment of such properties may require costly tenant-specific improvements. We have experienced delays and disruptions to property redevelopment as a result of supply chain issues and construction material and labor shortages and may experience additional or more significant such delays in the future. We also may be unable to quickly and efficiently integrate new acquisitions, particularly acquisitions of portfolios of properties, into our existing operations, and this could have an adverse effect on our results of operations and financial condition. Acquired properties may be located in new markets, either within or outside the United States, where we may face risks associated with a lack of market knowledge or understanding of the local economy, lack of business relationships in the area, costs associated with opening a new regional office and unfamiliarity with local governmental and permitting procedures. As a result, we cannot assure you that we will achieve the economic benefit we expect from acquisitions, investment, development and redevelopment opportunities and may lead to impairment of such assets.

Acquired properties may expose us to unknown liability

We may acquire properties or invest in joint ventures that own properties subject to liabilities and without any recourse, or with only limited recourse, against the prior owners or other third parties with respect to unknown liabilities. As a result, if a liability were asserted against us based upon ownership of those properties, we might have to pay substantial sums to settle or contest it, which could adversely affect our results of operations and cash flow. Unknown liabilities with respect to acquired properties might include: liabilities for clean-up of undisclosed environmental contamination, claims by tenants, vendors or other persons against the former owners of the properties, liabilities incurred in the ordinary course of business and claims for indemnification by general partners, directors and others indemnified by the former owners of the properties.

Competition for acquisitions may result in increased prices for properties

In order to maintain current revenues and continue generating attractive returns, we seek to reinvest cash available from the proceeds of sales of our securities, principal payments on our loans receivable or the sale of

properties, including non-elective dispositions in a timely manner. We face competition for acquisition opportunities from other well-capitalized investors, including publicly traded and privately held REITs, private real estate funds, domestic and foreign financial institutions, life insurance companies, sovereign wealth funds, pension trusts, partnerships and individual investors. In addition, limited development during the COVID-19 pandemic has reduced the number of new properties becoming available. This competition may adversely affect us by subjecting us to the following risks: we may be unable to acquire a desired property because of competition from other well-capitalized real estate investors and, even if we are able to acquire a desired property, competition from other real estate investors may significantly increase the purchase price.

Our investments in joint ventures could be adversely affected by our lack of exclusive control over these investments, our partners' insolvency or failure to meet their obligations, and disputes between us and our partners

We have entered into, and may continue in the future to enter into, partnerships or joint ventures with other persons or entities, including our 85/15 joint venture with Integra Healthcare Properties. Joint venture investments involve risks that may not be present with other methods of ownership, including the possibility that our partner might become insolvent, refuse to make capital contributions when due or otherwise fail to meet its obligations, which may result in certain liabilities to us for guarantees and other commitments; that our partner might at any time have economic or other business interests or goals that are or become inconsistent with our interests or goals; that we could become engaged in a dispute with our partner, which could require us to expend additional resources to resolve such dispute and could have an adverse impact on the operations and profitability of the joint venture; that our partner may be in a position to take action or withhold consent contrary to our instructions or requests; and that our joint venture partners may be structured differently than us for tax purposes, which could create conflicts of interest and risks to our REIT status. In some instances, we and/or our partner may have the right to trigger a buy-sell, put right or forced sale arrangement, which could cause us to sell our interest, acquire our partner's interest or sell the underlying asset at a time when we otherwise would not have initiated such a transaction. Our ability to acquire our partner's interest may be limited if we do not have sufficient cash, available borrowing capacity or other capital resources. In such event, we may be forced to sell our interest in the joint venture when we would otherwise prefer to retain it. On the other hand, our ability to transfer our interest in a joint venture to a third party may be restricted and the market for our interest may be limited and/or valued lower than fair market value. Joint ventures may require us to share decision-making authority with our partners, which could limit our ability to control the properties in the joint ventures. Even when we have a controlling interest, certain major decisions may require partner approval, such as the sale, acquisition or financing of a property.

We assume operational and legal risks with respect to our properties managed in RIDEA structures that could have a material adverse effect on our business, results of operations and financial condition

We have entered into various joint ventures that were structured under the provisions of the REIT Investment Diversification and Empowerment Act of 2007 ("RIDEA"), which permits REITs to own or partially own "qualified health care properties" in a structure through which we can participate directly in the cash flow of the properties' operations (as compared to receiving only contractual rent payments) in compliance with REIT requirements. A "qualified health care property" includes real property and any personal property that is, or is necessary or incidental to the use of, a hospital, nursing facility, assisted living facility, congregate care facility, qualified continuing care facility, or other licensed facility which extends medical or nursing or ancillary services to patients.

Under a RIDEA structure, we are required to rely on our operator to manage and operate the property, including complying with laws and providing resident care. However, as the owner of the property under a RIDEA structure, we are responsible for operational and legal risks and liabilities of the property, including, those relating to employment matters of our operators, compliance with health care fraud and abuse and other laws, governmental reimbursement matters, compliance with federal, state, local and industry-related licensure, certification and inspection laws, regulations, and standards, and litigation involving our properties or residents/patients, even though we have limited ability to control or influence our operators' management of these risks.

Further, our taxable REIT subsidiary (“TRS”) is generally required to hold the applicable health care license and enroll in the applicable government health care programs (e.g., Medicare- and Medicaid), which subjects us to potential liability under various health care laws. Penalties for failure to comply with applicable laws may include loss or suspension of licenses and certificates of need, certification or accreditation, exclusion from government health care programs (e.g., Medicare and Medicaid), administrative sanctions and civil monetary penalties. Although we have some general oversight approval rights and the right to review operational and financial reporting information, our operators are ultimately in control of the day-to-day business of the property, including clinical decision-making, and we rely on them to operate the properties in a manner that complies with applicable law.

We are exposed to operational risks with respect to our Seniors Housing Operating properties that could adversely affect our revenue and operations

We are exposed to various operational risks with respect to our Seniors Housing Operating properties that may increase our costs or adversely affect our ability to generate revenues. In addition to operational challenges that continue to impact us as a result of the COVID-19 pandemic, these risks include fluctuations in occupancy experienced during the normal course of business, Medicare and Medicaid reimbursement, if applicable, and private pay rates; economic conditions; the availability and increases in the cost of labor (as a result of unionization or otherwise); competition; federal, state, local, and industry-regulated licensure, certification and inspection laws, regulations, and standards; the availability and increases in cost of general and professional liability insurance coverage; increases in property taxes; state regulation and rights of residents related to entrance fees; and federal and state housing laws and regulations, including rent and eviction restrictions imposed during the COVID-19 pandemic. Any one or a combination of these factors may adversely affect our revenue and operations and could eventually lead to impairment of our properties.

We have rights to terminate our management agreements with operators, in whole or with respect to specific properties under certain circumstances, and we may be unable to replace operators if our management agreements are terminated or not renewed

We are party to long-term management agreements with our Seniors Housing Operating managers pursuant to which they provide comprehensive property management, accounting and other services with respect to our Seniors Housing Operating properties. We have the ability to terminate any of our management agreements upon the occurrence of certain events such as insolvency relating to such manager, and in some cases, the failure to meet specific NOI targets without curing, as well as the occurrence of other events or certain conditions.

We regularly monitor and review our rights and remedies under our management agreements. When determining if we will take significant action under those agreements, including terminating a manager, we consider numerous legal, contractual, regulatory, business and other relevant factors. In exercising our rights to terminate or not renew a management agreement, we would work with our existing seniors housing operators or potentially new operators to manage the properties; however, there is no assurance that we would be able to timely source a replacement or that any replacement manager would be effective. Any transition to a new manager would most likely require regulatory approval and potentially the approval of the holders of any liens on the property. The failure to replace on a timely basis, as well as the failure to receive these approvals, either at all or in a timely manner, could have an adverse effect on the properties and our revenue.

Decreases in our operators’ or tenants’ revenues or increases in our operators’ or tenants’ expenses, including as a result of increased labor costs, could affect their ability to make payments to us

We have very limited control over the success or failure of our operators’ or tenants’ businesses and, at any time, an operator or tenant may experience a downturn in their business that weakens their financial condition. Our operators’ and tenants’ revenues are primarily driven by occupancy, private pay rates, and Medicare and Medicaid reimbursement, if applicable. Expenses are primarily driven by the costs of labor, supplies, food, utilities, taxes, insurance and rent or debt service. Revenues from government reimbursement have, and may continue to, come under pressure due to reimbursement cuts and state budget shortfalls. Operating and borrowing costs have increased, and are expected to continue to increase, for our operators and tenants. In particular, our

operators' and tenants' businesses have experienced increases in labor costs resulting from shortages of medical and non-medical staff. A number of factors have adversely affected the labor force available to our operators and tenants or labor costs, including increased industry competition, high employment levels, increased wages offered by other employers, and government regulations. In many geographic areas the scarcity of specialized medical personnel, experienced senior care professionals and other workers has been a significant operating issue affecting a wide range of healthcare providers and senior care and housing facilities. Such shortages have and may continue to impact the operations of our operators and tenants, resulting in increased labor and operating costs. Continued labor shortages or cost inflation may impact our operators' and tenants' abilities to comply with minimum staffing requirements under applicable federal and state regulations. Failure to comply with these requirements can, among other things, jeopardize a facility's compliance with the conditions of participation under relevant state and federal healthcare programs. In addition, if a facility is determined to be out of compliance with these requirements, it may be subject to fines and other regulatory penalties, including the suspension of patient admissions, the termination of Medicaid participation or the suspension or revocation of licenses.

To the extent that any decrease in revenues and/or any increase in operating expenses result in an operator or tenant not generating enough cash to make payments to us, the credit of our operator or tenant and the value of other collateral would have to be relied upon. To the extent the value of such property is reduced, we may need to record an impairment for such asset. Furthermore, if we determine to dispose of an underperforming property, such sale may result in a loss. Any such impairment or loss on sale would negatively affect our financial results. These risks are magnified where we lease multiple properties to a single operator or tenant under a master lease, as a failure or default under a master lease would expose us to these risks across multiple properties. Although our lease agreements give us the right to exercise certain remedies in the event of default on the obligations owing to us, we may determine not to do so if we believe that enforcement of our rights would be more detrimental to our business than seeking alternative approaches.

Increased competition and oversupply may affect our operators' and managers' ability to meet their obligations to us

The operators and managers of our properties compete on a local and regional basis with operators and managers of properties and other health care providers that provide comparable services for residents and patients, including on the basis of the scope and quality of care and services provided, reputation and financial condition, physical appearance of the properties, price, and location. In addition, in light of labor shortages for medical and non-medical workers in many geographic areas, our operators and tenants increasingly compete to attract qualified and experienced employees. Our operators and managers are expected to encounter increased competition in the future that could limit their ability to attract residents and employees or expand their businesses. In addition, we expect that there will continue to be a more than adequate inventory of seniors housing facilities. We cannot be certain that the operators of all of our facilities will be able to achieve and maintain occupancy and rate levels that meet our expected yields and fulfill their obligations to us. If our operators and managers cannot compete effectively or if there is an oversupply of facilities, their financial performance could have a material adverse effect on our financial results.

A severe cold and flu season, epidemics or any other widespread illnesses could adversely affect the occupancy of our Seniors Housing Operating and Triple-net properties

Our business and operations were significantly impacted by the COVID-19 pandemic and are exposed to risks from COVID-19, severe cold and flu seasons or the occurrence of other epidemics or other widespread illnesses. Our revenues and our operators' revenues are dependent on occupancy and the occupancy of our Seniors Housing Operating and Triple-net properties could significantly decrease in the event of a severe cold and flu season, a resurgence of COVID-19 or other widespread illness. Such a decrease would affect the operating income of our Seniors Housing Operating properties and the ability of our Triple-net operators to make payments to us. As we experienced during the COVID-19 pandemic, a future flu or other pandemic could significantly increase the cost burdens faced by our operators, including if they are required to implement quarantines for residents or see a reduction in occupancy, and adversely affect their ability to meet their obligations to us, which would have a material adverse effect on our financial results.

In particular, the ongoing COVID-19 pandemic may continue to adversely affect our business, results of operations, growth, reputation, prospects, financial condition, operating results, cash flows, liquidity, ability to pay dividends and stock price. The COVID-19 pandemic has had adverse effects on our business, operations and financial condition, including:

- a decline in spot occupancy in our Seniors Housing Operating portfolio from 85.8% at February 29, 2020 to the pandemic-low of 72.6% on March 12, 2021 and a possibility of continued decline, which could affect the net operating income of our Seniors Housing Operating properties and the ability of our Triple-net operators to make contractual payments to us;
- increased operational costs incurred by us and our operators across all of our properties as a result of public health measures and other regulations affecting our properties and operations, as well as additional health and safety measures adopted by us and our operators and tenants, unique pressures on seniors housing and medical practice employees during the COVID-19 pandemic including labor shortages resulting from macroeconomic trends, decreased employee morale and productivity as a result of difficult conditions and stress related to the COVID-19 pandemic, and higher operator and tenant cost of insurance and such insurance may not cover certain claims related to COVID-19; and
- increased operational challenges and costs resulting from logistical challenges such as supply chain interruptions, business closures, restrictions on the movement of people and remote or hybrid work schedules, which adversely impact employee productivity and morale and introduce additional operations risk, including cybersecurity risks.

We remain subject to a number of other risks relating to COVID-19, including a decline in the rental income in our Outpatient Medical segment if our tenants do not renew leases or do not make timely or full lease payments as a result of medical practice closures or decreases in revenue due to government imposed restrictions on elective medical procedures or decisions by patients to delay treatments; concessions such as rent deferrals or rent abatements that we may offer certain tenants across our Triple-net and Outpatient Medical segments; and our increased exposure to COVID-19 related litigation and publicity risks if the operators or tenants of the relevant facilities are subject to bankruptcy or insolvency.

Although the COVID-19 pandemic has subsided from its peaks, any resurgence of the pandemic, outbreaks of new variants, changes in the effectiveness of vaccines, boosters and treatments, and adoptions of new public health measures may reintroduce the risks relating to the potential impact of the COVID-19 pandemic on us. Additionally, there remains uncertainty regarding the implementation and impact of COVID-19 relief legislation, such as the Coronavirus Aid Relief, and Economic Security Act and the Paycheck Protection Program and Health Care Enhancement Act, and possible government audits and investigations related to our receipt and use of such relief funds.

The insolvency or bankruptcy of our tenants, operators, borrowers, managers and other obligors may adversely affect our business, results of operations and financial condition

We are exposed to the risk that our tenants, operators, borrowers, managers or other obligors may not be able to meet the rent, principal and interest or other payments due us, which may result in a tenant, operator, borrower, manager or other obligor bankruptcy or insolvency, or that a tenant, operator, borrower, manager or other obligor might become subject to bankruptcy or insolvency proceedings for other reasons. Although our operating lease agreements provide us with the right to evict a tenant, demand immediate payment of rent and exercise other remedies, and our loans provide us with the right to terminate any funding obligation, demand immediate repayment of principal and unpaid interest, foreclose on the collateral and exercise other remedies, the bankruptcy and insolvency laws afford certain rights to a party that has filed for bankruptcy or reorganization. A tenant, operator, borrower, manager or other obligor in bankruptcy or subject to insolvency proceedings may be able to limit or delay our ability to collect unpaid rent in the case of a lease or to receive unpaid principal and interest in the case of a loan, and to exercise other rights and remedies. In addition, if a lease is rejected in a tenant bankruptcy, our claim against the tenant may be limited by applicable provisions of the bankruptcy law. We may be required to fund certain expenses (e.g., real estate taxes and maintenance) to preserve the value of an investment property, avoid the imposition of liens on a property and/or transition a property to a new tenant. In

some instances, we have terminated our lease with a tenant and relet the property to another tenant. In some of those situations, we have provided working capital loans to and limited indemnification of the new obligor. If we cannot transition a leased property to a new tenant, we may take possession of that property, which may expose us to certain successor liabilities. Publicity about the operator's financial condition and insolvency proceedings may also negatively impact their and our reputations, decreasing customer demand and revenues. Should such events occur, our revenue and operating cash flow may be adversely affected.

The properties managed by Sunrise Senior Living, LLC ("Sunrise") account for a significant portion of our revenues and net operating income and any adverse developments in its business or financial condition could adversely affect us

As of December 31, 2022, Sunrise managed 109 of our Seniors Housing Operating properties. These properties account for a significant portion of our revenues and net operating income. Under our management agreements, we rely on Sunrise's personnel, expertise, technical resources and information systems, proprietary information, good faith and judgment to manage our Seniors Housing Operating properties efficiently and effectively. We also rely on Sunrise to set appropriate resident fees, to provide accurate property-level financial results for our properties in a timely manner and to otherwise operate them in compliance with the terms of our management agreements and all applicable laws and regulations. Any adverse developments in Sunrise's business or financial condition could impair its ability to manage our properties efficiently and effectively, which could adversely affect our business, results of operations, and financial condition. For example, we depend on Sunrise's ability to attract and retain skilled management personnel who are responsible for the day-to-day operations of our Seniors Housing Operating properties. A shortage of nurses or other trained personnel or general inflationary pressures may force Sunrise to enhance its pay and benefits packages to compete effectively for such personnel, but it may not be able to offset these added costs by increasing the rates charged to residents. Any increase in labor costs and other property operating expenses, any failure by Sunrise to attract and retain qualified personnel, or significant changes in Sunrise's senior management or equity ownership could adversely affect the income we receive from our Seniors Housing Operating properties and have a material adverse effect on us. Also, if Sunrise experiences any significant financial, legal, accounting or regulatory difficulties, such difficulties could result in, among other things, acceleration of its indebtedness, impairment of its continued access to capital or the commencement of insolvency proceedings by or against it under the U.S. Bankruptcy Code, which, in turn, could adversely affect our business, results of operations and financial condition. If we determine to sell or transition properties currently managed by Sunrise, we may experience operational challenges and/or significantly declining financial performance for those properties.

Ownership of property outside the U.S. may subject us to different or greater risks than those associated with our domestic operations

We have operations in the U.K. and Canada which represent 9.5% and 7.9% of total Welltower revenues, respectively. As of December 31, 2022, Revera managed 78 of our Seniors Housing Operating properties in Canada, representing a significant portion of our revenues in Canada, and also owned a controlling interest in Sunrise. International development, ownership, and operating activities involve risks that are different from those we face with respect to our domestic properties and operations. These risks include, but are not limited to, any international currency gain or loss recognized with respect to changes in exchange rates, which may not qualify under the 75% gross income test or the 95% gross income test required for us to satisfy annually in order to qualify and maintain our status as a REIT; challenges with respect to the repatriation of foreign earnings and cash; impact from international trade disputes and the associated impact on our tenants' supply chain and consumer spending levels; changes in foreign political, regulatory, and economic conditions (regionally, nationally and locally) including, challenges in managing international operations; challenges of complying with a wide variety of foreign laws and regulations, including those relating to real estate, corporate governance, operations, taxes, employment and other civil and criminal legal proceedings; foreign ownership restrictions with respect to operations in foreign countries; local businesses and cultural factors that differ from our usual standards and practices; differences in lending practices and the willingness of domestic or foreign lenders to provide financing; regional or country-specific business cycles and political and economic instability; and failure to comply with applicable laws and regulations in the U.S. that affect foreign operations, including, but not limited to, the U.S. Foreign Corrupt Practices Act.

Further, our operations in the U.K. may be adversely impacted by global and local economic volatility experienced as a result of geopolitical tensions or conflicts, such as the ongoing conflict between Russia and Ukraine, rising inflation and interest rates, the energy crisis that has seen supply shortages and higher oil, gas and electricity prices, labor market challenges affecting the recruitment and retention of employees.

If our tenants do not renew their existing leases, or if we are required to sell properties for liquidity reasons, we may be unable to lease or sell the properties on favorable terms, or at all

We cannot predict whether our tenants will renew existing leases at the end of their lease terms, which expire at various times. If these leases are not renewed, we would be required to find other tenants to occupy those properties, or sell them. There can be no assurance that we would be able to identify suitable replacement tenants or enter into leases with new tenants on terms as favorable to us as the current leases or that we would be able to lease those properties at all. Our competitors may offer space at rental rates below current market rates or below the rental rates we currently charge our customers, we may lose potential customers, and we may be pressured to reduce our rental rates below those we currently charge to retain customers when leases expire. In addition, our ability to reposition our properties with a suitable replacement tenant or operator could be significantly delayed or limited by state licensing, receivership, CON or other laws, as well as by the Medicare and Medicaid change-of-ownership rules, and we could incur substantial additional expenses in connection with any licensing, receivership or change-of-ownership proceedings. Even if tenants decide to renew or lease new space, the terms of renewals or new leases, including the cost of required renovations or concessions to tenants, may be less favorable to us than current lease terms.

Real estate investments are relatively illiquid and most of the property we own is highly customized for specific uses. Our ability to quickly sell or exchange any of our properties in response to changes in operator, economic and other conditions will be limited. Although our properties are less affected by the commercial real estate market trends, this limitation could be exacerbated by the current decline of commercial real estate as a result of high interest rates, inflation and declining property values across sectors. No assurances can be given that we will recognize full value for any property that we are required to sell. Our inability to respond rapidly to changes in the performance of our investments could adversely affect our financial condition and results of operations. In addition, we are exposed to the risks inherent in concentrating investments in real estate, and in particular, the seniors housing and health care industries. A downturn in the real estate industry could adversely affect the value of our properties and our ability to sell properties for a price or on terms acceptable to us.

Our tenants, operators and managers may not have the necessary insurance coverage to insure adequately against losses

We maintain or require our tenants, operators and managers to maintain comprehensive insurance coverage on our properties and their operations with terms, conditions, limits and deductibles that we believe are customary for similarly situated companies in our industry and we frequently review our insurance programs and requirements. Our tenants, operators and managers may not be able to maintain adequate levels of insurance and required coverages. Also, we may not be able to require the same levels of insurance coverage under our lease, management and other agreements, which could adversely affect us in the event of a significant uninsured loss. We cannot make any guarantee as to the future financial viability of the insurers that underwrite our policies and the policies maintained by our tenants, operators and managers. Insurance may not be available at a reasonable cost in the future or policies may not be maintained at a level that will fully cover all losses on our properties upon the occurrence of a catastrophic event. This may be especially the case due to increases in property insurance costs. In addition, in recent years, long-term/post-acute care and seniors housing operators and managers have experienced substantial increases in both the number and size of patient care liability claims. As a result, general and professional liability costs have increased in some markets. Due to the uncertainty of the long term effects of the COVID-19 pandemic, general and professional liability insurance coverage may be restricted or very costly, which may adversely affect the tenants', operators' and managers' future operations, cash flows and financial conditions, and may have a material adverse effect on the tenants', operators' and managers' ability to meet their obligations to us. Finally, our use, and the usage by some of our tenants, operators and managers of self-insurance and/or use of a wholly owned captive insurance company, if not adequately funded, could have a material adverse effect on our liquidity and that of our tenants, operators and managers.

Our ownership of properties through ground leases exposes us to the loss of such properties upon breach or termination of the ground leases

We have acquired an interest in certain of our properties by acquiring a leasehold interest in the property on which the building is located, and we may acquire additional properties in the future through the purchase of interests in ground leases. Many of these ground leases impose significant limitations on our uses of the subject properties, restrict our ability to sell or otherwise transfer our interests in the properties or restrict the leasing of the properties. These restrictions may limit our ability to timely sell or exchange the properties, impair the properties' value or negatively impact our ability to find suitable tenants for the properties. As the lessee under a ground lease, we are exposed to the possibility of losing the property upon termination of the ground lease or an earlier breach of the ground lease by us.

The requirements of, or changes to, governmental reimbursement programs, such as Medicare, Medicaid or government funding, could have a material adverse effect on our obligors' liquidity, financial condition and results of operations, which could adversely affect our obligors' ability to meet their obligations to us

Some of our obligors' businesses are affected by government reimbursement. To the extent that an operator/tenant receives a significant portion of its revenues from government payors, primarily Medicare and Medicaid, such revenues may be subject to statutory and regulatory changes, retroactive rate adjustments, recovery of program overpayments or set-offs, court decisions, administrative rulings, policy interpretations, payment or other delays by fiscal intermediaries or carriers, change-of-ownership rules, government funding restrictions (at a program level or with respect to specific facilities), any lapse in Congressional funding of the Centers for Medicare and Medicaid Services and interruption or delays in payments due to any ongoing government investigations and audits at such property. Federal and state authorities may continue seeking to implement new or modified reimbursement methodologies that may negatively impact health care property operations. See "Item 1 — Business — Certain Government Regulations — United States — Reimbursement" above for additional information. Health care reimbursement will likely continue to be of paramount importance to federal and state authorities. We cannot make any assessment as to the ultimate timing or effect any future legislative reforms may have on the financial condition of our obligors and properties. There can be no assurance that adequate reimbursement levels will be available for services provided by any property operator, whether the property receives reimbursement from Medicare, Medicaid or private payors. Significant limits on the scope of services reimbursed and on reimbursement rates and fees could have a material adverse effect on an obligor's liquidity, financial condition and results of operations, which could adversely affect the ability of an obligor to meet its obligations to us. In addition, if a partial or total federal government shutdown were to occur for a prolonged period of time, federal government payment obligations, including its obligations under Medicaid and Medicare, may be delayed. Similarly, if state government shutdowns were to occur, state payment obligations may be delayed. If the federal or state governments fail to make payments under these programs on a timely basis, our business could suffer, and our financial position, results of operations or cash flows may be materially affected.

Since January 1, 2014, the Health Reform Laws have provided those states that expand their Medicaid coverage to otherwise ineligible state residents with incomes at or below 138% of the federal poverty level with an increased federal medical assistance percentage, effective January 1, 2014, when certain conditions are met. The federal government substantially funds the Medicaid expansion and as of December 2022, the number of states implementing expansion has grown to more than 75% of all states. The participation by states in the Medicaid expansion could have the dual effect of increasing our tenants' revenues, through new patients, but further straining state budgets and their ability to pay our tenants.

The status of the Health Reform Laws may be subject to change and other health reform measures could be implemented as a result of political, legislative, regulatory, and administrative developments and judicial proceedings. Further the impact that the recent change of control of the House and future changes in the federal government may have on health reform (including through new legislative, executive or regulatory efforts) remains uncertain, and any changes will likely take time to unfold and could have an impact on coverage and reimbursement for health care items and services covered by plans that were authorized by the Health Reform Laws. If the operations, cash flows or financial condition of our operators and tenants are materially adversely impacted by the Health Reform Laws or future legislation, our revenue and operations may be adversely affected

as well. More generally, and because of the dynamic nature of the legislative and regulatory environment for health care products and services, and in light of existing federal deficit and budgetary concerns, we cannot predict the impact that broad-based, far-reaching legislative or regulatory changes could have on the U.S. economy, our business, or that of our operators and tenants.

If controls imposed on certain of our tenants who provide health care services that are reimbursed by Medicare, Medicaid and other third-party payors to reduce admissions and length of stay affect inpatient volumes at our health care facilities, the financial condition or results of operations of those tenants could be adversely affected

Controls imposed by Medicare, Medicaid and commercial third-party payors designed to reduce admissions and lengths of stay, commonly referred to as “utilization reviews,” have affected and are expected to continue to affect certain of our health care facilities, specifically our acute care hospitals and post-acute facilities. Utilization review entails the review of the admission and course of treatment of a patient by managed care plans. Inpatient utilization, average lengths of stay and occupancy rates continue to be negatively affected by payor-required pre-admission authorization and utilization review and by payor pressures to maximize outpatient and alternative health care delivery services for less acutely ill patients. Efforts to impose more stringent cost controls and reductions are expected to continue, which could negatively impact the financial condition of our tenants who provide health care services in our hospitals and post-acute facilities. If so, this could adversely affect these tenants’ ability and willingness to comply with the terms of their leases with us and/or renew those leases upon expiration, which could have a material adverse effect on us.

Our operators’ or tenants’ failure to comply with federal, state, province, local, and industry-regulated licensure, certification and inspection laws, regulations, and standards could adversely affect such operators’ or tenants’ operations, which could adversely affect our operators’ and tenants’ ability to meet their obligations to us

Our operators and tenants generally are subject to or impacted by varying levels of federal, state, local, and industry-regulated licensure, certification and inspection laws, regulations, and standards. These laws and regulations include, among others: laws protecting consumers against deceptive practices; laws relating to the operation of our properties and how our tenants and operators conduct their business, such as fire, health and safety, data security and privacy laws; federal and state laws affecting hospitals, clinics and other health care communities that participate in both Medicare and Medicaid that specify reimbursement rates, pricing, reimbursement procedures and limitations, quality of services and care, background checks, food service and physical plants, and similar foreign laws regulating the health care industry; resident rights laws (including abuse and neglect laws) and fraud laws; anti-kickback and physician referral laws; the Americans with Disabilities Act of 1990 and similar state and local laws; and safety and health standards set by the Occupational Safety and Health Administration or similar foreign agencies. Our operators’ or tenants’ failure to comply with any of these laws, regulations, or standards could result in loss of accreditation, denial of reimbursement, imposition of fines, suspension, decertification or exclusion from federal and state health care programs, civil liability, and in certain limited instances, criminal penalties, material restrictions on or loss of license, closure of the facility and/or the incurrence of considerable costs arising from an investigation or regulatory action. The likelihood of these actions may increase due to the uncertainty of the long term effects of the COVID-19 pandemic. Such actions may have an effect on our operators’ or tenants’ ability to make lease payments to us and, therefore, adversely impact us. In addition, we may be directly subject to these laws, regulations and standards, as well as potential investigation or enforcement, as a result of our RIDEA-structured arrangements, and certain other arrangements we may pursue with healthcare entities who are directly subject to these laws. See “Item 1 — Business — Certain Government Regulations — United States — Fraud & Abuse Enforcement” and “Item 1 — Business — Certain Government Regulations — United States—Health Care Matters -Generally” above.

Many of our properties may require a license, registration, and/or CON to operate. Failure to obtain a license, registration, or CON, or loss of a required license, registration, or CON would prevent a facility from operating in the manner intended by the operators or tenants. These events could materially adversely affect our operators’ or tenants’ ability to make rent or other obligatory payments to us. State and local laws also may regulate the

expansion, including the addition of new beds or services or acquisition of medical equipment, and the construction or renovation of health care facilities, by requiring a CON or other similar approval from a state agency. See “Item 1 — Business — Certain Government Regulations — United States — Licensing and Certification” above.

In addition, we cannot assure you that future changes in government regulation will not adversely affect the health care industry, including our tenants and operators, nor can we be certain that our tenants and operators will achieve and maintain occupancy and rate levels or labor cost levels that will enable them to satisfy their obligations to us.

Unfavorable resolution of pending and future litigation matters and disputes could have a material adverse effect on our financial condition

From time to time, we are directly involved or named as a party in in legal proceedings, lawsuits and other claims that involve class actions, disputes regarding property damage, care matters and other issues. We also are named as defendants in lawsuits allegedly arising out of our actions or the actions of our operators/tenants or managers in which such operators/tenants or managers have agreed to indemnify, defend and hold us harmless from and against various claims, litigation and liabilities arising in connection with their respective businesses. Employment related class action lawsuits have increased in recent years, including class action lawsuits brought against our operators in certain states regarding employee and government requirements regarding wage and hour claims and fair housing complaints, as well as class action lawsuits related to COVID-19. There can be no assurance that we will be able to prevail in, or achieve a favorable settlement of, pending or future litigation. In addition, pending litigation or future litigation, government proceedings or environmental matters could lead to increased costs or interruption of our normal business operations. An unfavorable resolution of pending or future litigation or legal proceedings may have a material adverse effect on our business, results of operations and financial condition. Regardless of its outcome, litigation may result in substantial costs and expenses, significantly divert the attention of management, and could damage our reputation and our brand. In addition, any such resolution could involve our agreement to terms that restrict the operation of our business. We cannot guarantee losses incurred in connection with any current or future legal or regulatory proceedings or actions will not exceed any provisions we may have set aside in respect of such proceedings or actions or will not exceed any available insurance coverage.

Development, redevelopment and construction risks could affect our profitability

We invest in various development and redevelopment projects. In deciding whether to acquire or develop a particular property, we make assumptions regarding the expected future performance of that property. In particular, we estimate the return on our investment based on expected construction costs, lease up velocity, occupancy, rental rates, operating expenses, capital costs and future competition. If our financial projections with respect to a new property are inaccurate, the property may fail to perform as we expected in analyzing our investment. Our estimate of the costs of repositioning or redeveloping an acquired property may prove to be inaccurate, which may result in our failure to meet our profitability goals.

Our development/redevelopment and construction projects are vulnerable to the impact of material shortages and inflation. For example, shortages and fluctuations in the price of lumber or in other important raw materials have resulted in and could continue to result in delays in the start or completion of, or increase the cost of, developing one or more of our projects. Pricing for labor and raw materials can be affected by various national, regional, local, economic and political factors, including changes to immigration laws that impact the availability of labor or tariffs on imported construction materials.

In connection with our renovation, redevelopment, development and related construction activities, we may be unable to obtain, or suffer delays in obtaining, necessary zoning, land-use, building, occupancy and other required governmental permits and authorizations, or satisfactory tax rates, incentives or abatements. Operators of new facilities we construct may need to obtain Medicare and Medicaid certification and enter into Medicare and Medicaid provider agreements and/or third-party payor contracts. In the event that the operator is unable to obtain the necessary licensure, certification, provider agreements or contracts after the completion of construction, there is a risk that we will not be able to earn any revenues on the facility until either the initial operator obtains a license or

certification to operate the new facility and the necessary provider agreements or contracts or we find and contract with a new operator that is able to obtain a license to operate the facility for its intended use and the necessary provider agreements or contracts. We have experienced such delays in obtaining necessary licensing for constructed properties and may experience additional or more significant delays in the future.

We rely on our development managers, general contractors and subcontractors to oversee and manage day-to-day construction activities. If any such party underperforms or experiences financial or other problems during the construction process, we could experience significant delays, increased costs to complete the project and/or other negative impacts to our expected returns and may need to exercise contractual remedies against such party, which may include termination of the applicable underlying service contract. In the event such termination occurs mid-construction, we would likely need to engage a new service provider, which would likely result in additional costs and delays as the transition between providers occurs.

The above-described factors could result in increased costs or our abandonment of these projects. In addition, we may abandon opportunities we have begun to investigate, for a range of reasons, including changes in expected financing or construction costs, adverse changes in expected rents or expenses, adverse environmental and/or geotechnical findings, conditions to zoning approval, legal and regulatory hurdles, including moratoriums on development and redevelopment activities, changes in market and economic conditions, natural disasters and other catastrophic events; damage, vandalism or accidents, higher requirements for capital improvements; decreased demand due to competition or other market and economic conditions, or defects that we do not discover through the inspection processes, which would result in additional expenses beyond those originally expected. In addition, we may not be able to obtain financing on favorable terms, or at all, which may render us unable to proceed with our development activities. We may not be able to complete construction and lease-up of a property on budget and on schedule, which could result in increased debt service expense or construction costs. Additionally, the time frame required for development, construction and lease-up of these properties means that we may have to wait years for significant cash returns. Because we are required to make cash distributions to our stockholders, if the cash flow from operations or refinancing is not sufficient, we may be forced to borrow additional money to fund such distributions. Newly developed and acquired properties may not produce the cash flow that we expect, which could adversely affect our overall financial performance.

We may experience losses caused by severe weather conditions, natural disasters or the physical effects of climate change, which could result in an increase of our or our tenants' cost of insurance, unanticipated costs associated with evacuation, a decrease in our anticipated revenues or a significant loss of the capital we have invested in a property

We maintain or require our tenants to maintain comprehensive insurance coverage on our properties with terms, conditions, limits and deductibles that we believe are appropriate given the relative risk and costs of such coverage. However, a large number of our properties are located in areas particularly susceptible to revenue loss, cost increase or damage caused by severe weather conditions or natural disasters such as hurricanes, earthquakes, tornadoes and floods, as well as the effects of climate change. We believe, given current industry practice and analysis prepared by outside consultants, that our and our tenants' insurance coverage is appropriate to cover reasonably anticipated losses that may be caused by hurricanes, earthquakes, tornadoes, floods, wildfires and other severe weather conditions and natural disasters, including the effects of climate change. Nevertheless, we are always subject to the risk that such insurance will not fully cover all losses and, depending on the severity of the event and the impact on our properties, such insurance may not cover a significant portion of the losses including the costs associated with evacuation. Moreover, an increase in volatility and difficulty predicting adverse weather events, such as the changes in tornado patterns in recent years, may result in additional losses. These losses may lead to an increase of our and our tenants' cost of insurance, a decrease in our anticipated revenues from an affected property and a loss of all or a portion of the capital we have invested in an affected property. In addition, we or our tenants may not purchase insurance under certain circumstances if the cost of insurance exceeds, in our or our tenants' judgment, the value of the coverage relative to the risk of loss. Also, changes in federal and state legislation and regulation relating to climate change could result in increased capital expenditures to improve the energy efficiency and resiliency of our existing properties and could also necessitate us to spend more on our new development properties without a corresponding increase in revenue.

To the extent that significant changes in the climate occur in areas where our communities are located, we may experience extreme weather and changes in precipitation and temperature, all of which may result in physical damage to or a decrease in demand for properties located in these areas or affected by these conditions. Should the impact of climate change be material, including significant property damage to or destruction of our communities, or occur for lengthy periods of time, our financial condition or results of operations may be adversely affected. In addition, changes in federal, state and local legislation and regulation based on concerns about climate change could result in increased capital expenditures on our existing properties and our new development properties without a corresponding increase in revenue, resulting in adverse impacts to our net income.

We may incur costs to remediate environmental contamination at our properties, which could have an adverse effect on our or our obligors' business or financial condition

Under various laws, owners or operators of real estate may be required to respond to the presence or release of hazardous substances on the property and may be held liable for property damage, personal injuries or penalties that result from environmental contamination or exposure to hazardous substances. These laws often impose liability without regard to whether the owner or operator knew of the release of the substances or caused the release. We may become liable to reimburse the government for damages and costs it incurs in connection with the contamination. Generally, such liability attaches to a person based on the person's relationship to the property. Our tenants or borrowers are primarily responsible for the condition of the property. Moreover, we review environmental site assessments of the properties that we own or encumber prior to taking an interest in them. Those assessments are designed to meet the "all appropriate inquiry" standard, which we believe qualifies us for the innocent purchaser defense if environmental liabilities arise. Based upon such assessments, we do not believe that any of our properties are subject to material environmental contamination. However, environmental liabilities may be present in our properties and we may incur costs to remediate contamination, which could have a material adverse effect on our business or financial condition or the business or financial condition of our obligors.

Cybersecurity incidents could disrupt our business and result in the loss of confidential information and legal liability

Our business is at risk from and may be impacted by cybersecurity attacks, including attempts to gain unauthorized access to our confidential data through phishing or other malicious activity, attempts to interrupt our access to, or use of information technology systems through distributed denial-of-service or ransomware attacks, breaches related to our increased receipt and use of data from multiple sources, and other electronic security breaches or other cybersecurity incidents within our environment or our business partners' environments, including those resulting from human error, product defects and technology failures. Such cyber-attacks can range from individual attempts to gain unauthorized access to our or our business partners' information technology systems to more sophisticated security threats and may be specifically targeted to our business or more general industry wide risks. Our information technology networks, and those of our business partners are essential to our ability to perform day-to-day operations of our business. While we employ a number of measures to prevent, detect and mitigate these threats, there is no guarantee such efforts will be successful in preventing or detecting a cyber-attack. Even the most well-protected information, networks, systems and facilities remain vulnerable because the techniques used in such attempted cybersecurity breaches evolve and generally are not recognized until launched against a target, and in some cases are designed not to be detected and, in fact, may not be detected. Accordingly, we may be unable to anticipate these techniques, implement adequate cybersecurity barriers or other preventative measures, or respond, mitigate the risks from and recover from an attack without operational impact, and thus it is impossible for us to entirely mitigate this risk. We regularly defend against, respond to and mitigate risks from cybersecurity breaches, which to date have not had a material impact on our operations; however, there is no assurance that such impacts will not be material in the future. Cybersecurity incidents could disrupt our or our critical business partners' business, damage our reputation, cause us to incur significant remediation expense and have a materially adverse effect on our business, financial condition and results of operations. Cybersecurity breaches that compromise proprietary, personal identifying or confidential information of our employees, operators, tenants and partners, or result in operational disruptions, could result in legal claims or proceedings, including enforcement actions by regulators under data privacy regulations.

Evolving privacy regulations could expose our business to reputational harm and losses

Regulatory authorities around the world have implemented or are considering implementing a number of legislative changes or regulations concerning data protection, which have required or may require us to incur additional expenses and may expose us to additional risks. We are subject to numerous laws and regulations governing the protection of personal and confidential information of our clients or employees, including U.S. federal and state laws (including the State of California and HIPAA), and non- U.S. laws, such as the U.K. General Data Protection Regulation and the EU General Data Protection Regulation, which impose a number of obligations on us. These obligations vary from state to state and country to country, but generally have accountability and transparency including consent, detailed information and data removal and security requirements. Some jurisdictions impose the same requirements and restrictions on transfers of data from their jurisdictions to jurisdictions that they do not consider adequate. This may have implications for our cross-border data flows and may result in additional compliance costs.

Many jurisdictions assess fines, the magnitude of which may depend on the annual global revenue of the noncompliant company, the nature, gravity and duration of, and the violation. Additionally, in some jurisdictions, data subjects may have a right to compensation for financial or non-financial losses. Complying with these laws may cause us to incur substantial operational and compliance costs or require us to change our business practices. Despite efforts to bring our practices into compliance with these laws, we may not be successful either due to internal or external factors such as resource allocation limitations or a lack of cooperation among our business partners. Non-compliance could result in proceedings against us by governmental entities, regulators, our business partners, residents of our communities, data subjects, suppliers, vendors or other parties. Further, there is a risk that compliance measures we undertake will not be implemented correctly or that individuals within our business or that of our business partners will not be fully compliant with the new procedures. If there are breaches of these measures, we could face significant administrative and monetary sanctions, as well as reputational damage, which may have a material adverse effect on our operations, financial condition and prospects.

Our success and the success of our operators and managers depends on key personnel whose continued service is not guaranteed

Our success and the success of our operators and managers depends on the continued availability and service of key personnel, including executive officers and other highly qualified employees, and competition for their talents is intense. There is substantial competition for qualified personnel. We cannot assure you that we will retain our key personnel or that we will be able to recruit and retain other highly qualified employees in the future. Losing any key personnel could, at least temporarily, have a material adverse effect on our business and that of our operators and managers', financial position and results of operations.

Welltower is a holding company with no direct operations, and it relies on funds received from Welltower OP to pay its obligations and make distributions to stockholders

Welltower is a holding company with no direct operations. All of Welltower's property ownership, development and related business operations are conducted through Welltower OP and Welltower has no material assets or liabilities other than its investment in Welltower OP. As a result, Welltower relies on distributions from Welltower OP to make dividend payments and meet its obligations, including any tax liability on taxable income allocated to Welltower from Welltower OP. Welltower exercises exclusive control over Welltower OP, including the authority to cause Welltower OP to make distributions, subject to certain limited approval and voting rights of Welltower OP's other members as described in the Limited Liability Agreement. In addition, because Welltower is a holding company, your claims as stockholders are structurally subordinated to all existing and future liabilities and obligations to preferred equity holders of Welltower OP and its subsidiaries. Therefore, in the event of a bankruptcy, insolvency, liquidation or reorganization of Welltower OP or its subsidiaries, assets of Welltower OP or the applicable subsidiary will be available to satisfy any claims of our stockholders only after such liabilities and obligations have been satisfied in full.

Welltower is the initial member and majority owner of Welltower OP, with an approximate ownership interest of 99.751% as of December 31, 2022. In connection with our future acquisition activities or otherwise,

Welltower OP may issue additional Class A Common Units (“OP Units”) to third parties and admit additional members. Such issuances would reduce Welltower’s percentage ownership in Welltower OP.

Risks Arising from Our Capital Structure

We may become more leveraged

Permanent financing for our investments is typically provided through a combination of public offerings of debt and equity securities and the incurrence or assumption of secured debt. The incurrence or assumption of indebtedness may cause us to become more leveraged, which could (1) require us to dedicate a greater portion of our cash flow to the payment of debt service, (2) make us more vulnerable to a downturn in the economy, (3) limit our ability to obtain additional financing, (4) negatively affect our credit ratings or outlook by one or more of the rating agencies or (5) make us more vulnerable to increases in interest rates because of the variable interest rates on some of our borrowings to the extent we have not entirely hedged such variable rate debt. In addition, any changes to benchmark rates may have an uncertain impact on our cost of funds and our access to the capital markets, which could impact our results of operations and cash flows. Uncertainty as to the nature of such potential changes may also adversely affect the trading market for our securities. Additional financing, therefore, may be unavailable, more expensive or restricted by the terms of our outstanding indebtedness.

Cash available for distributions to stockholders may be insufficient to make dividend contributions at expected levels and are made at the discretion of the Board of Directors

If cash available for distribution generated by our assets decreases due to dispositions or otherwise, we may be unable to make dividend distributions at expected levels. Our inability to make expected distributions would likely result in a decrease in the market price of our common stock. All distributions are made at the discretion of our Board of Directors in accordance with Delaware law and depend on our earnings, our financial condition, debt and equity capital available to us, our expectation of our future capital requirements and operating performance, restrictive covenants in our financial and other contractual arrangements, maintenance of our REIT qualification, restrictions under Delaware law and other factors as our Board of Directors may deem relevant from time to time. Additionally, our ability to make distributions will be adversely affected if any of the risks described herein, or other significant adverse events, occur.

We are subject to covenants in our debt agreements that could have a material adverse effect on our business, results of operations and financial condition

Our debt agreements contain various covenants, restrictions and events of default. Among other things, these provisions require us to maintain certain financial ratios and minimum net worth and impose certain limits on our ability to incur indebtedness, create liens and make investments or acquisitions. Breaches of these covenants could result in defaults under the instruments governing the applicable indebtedness, in addition to any other indebtedness cross-defaulted against such instruments. These defaults could have a material adverse effect on our business, results of operations and financial condition.

Limitations on our ability to access capital could have an adverse effect on our ability to make future investments or to meet our obligations and commitments

We cannot assure you that we will be able to raise the capital necessary to make future investments or to meet our obligations and commitments as they mature. Our access to capital depends upon a number of factors over which we have little or no control, including rising interest rates, inflation and other general market conditions; the market’s perception of our growth potential and our current and potential future earnings and cash distributions; the market price of the shares of our common stock and the credit ratings of our debt securities; changes in the credit ratings on U.S. government debt securities; uncertainty from the transition to Secured Overnight Financing Rate (“SOFR”) or any other interest rate benchmark; and default or delay in payment by the U.S. of its obligations. We also rely on the financial institutions that are parties to our revolving credit facilities. If these institutions become capital constrained, tighten their lending standards or become insolvent or if they experience excessive volumes of borrowing requests from other borrowers within a short period of time, they may be unable or unwilling to honor

their funding commitments to us, which would adversely affect our ability to draw on our revolving credit facilities and, over time, could negatively impact our ability to consummate acquisitions, repay indebtedness as it matures, fund capital expenditures or make distributions to our stockholders. If our access to capital is limited by these factors or other factors, it could negatively impact our ability to acquire properties, repay or refinance our indebtedness, fund operations or make distributions to our stockholders.

Downgrades in our credit ratings could have a material adverse effect on our cost and availability of capital

We plan to manage the company to maintain a capital structure consistent with our current profile, but there can be no assurance that we will be able to maintain our current credit ratings. Any downgrades in terms of ratings or outlook by any or all of the rating agencies could have a material adverse effect on our cost and availability of capital, which could in turn have a material adverse effect on our results of operations, liquidity, cash flows, the trading/redemption price of our securities and our ability to satisfy our debt service obligations and to pay dividends and distributions to our equity holders.

Increases in interest rates could have a material adverse effect on our cost of capital, and our decision to hedge against interest rate risk might not be effective

The current high interest rate environment has been increasing interest cost on new and existing variable rate debt. Such increases in the cost of capital, and any further increases resulting from future interest rate hikes, could adversely impact our ability to finance operations, acquire and develop properties, and refinance existing debt. Additionally, increased interest rates may also result in less liquid property markets, limiting our ability to sell existing assets. Higher interest rates may also lead purchasers of our common stock to demand a greater annual dividend yield, which could adversely affect the market price of our common stock and could result in increased capitalization rates, which may lead to reduced valuation of our assets.

We may from time to time seek to manage our exposure to interest rate volatility with hedging arrangements, which involve additional risks, including the risks that counterparties may fail to honor their obligations under these arrangements, that these arrangements may not be effective in reducing our exposure to interest rate changes, that the amount of income we earn from hedging transactions may be limited by federal tax provisions governing REITs, and that these arrangements may reduce the benefits to us if interest rates decline. Developing and implementing an interest rate risk strategy is complex and no strategy can completely insulate us from risks associated with interest rate fluctuations and there can be no assurance that our hedging activities will be effective. Failure to hedge effectively against interest rate risk, if we choose to engage in such activities, could adversely affect our business, financial condition and results of operations.

Risks Arising from Our Status as a REIT

We might fail to qualify or remain qualified as a REIT

We intend to operate as a REIT under the Code, and believe we have operated and will continue to operate in such a manner. If we lose our status as a REIT, we will face serious income tax consequences that will substantially reduce the funds available for satisfying our obligations and for distribution to our stockholders because:

- Welltower would not be allowed a deduction for distributions to stockholders in computing our taxable income and would be subject to U.S. federal income tax at regular corporate rates;
- Welltower would be subject to increased state and local taxes; and
- unless Welltower is entitled to relief under statutory provisions, it could not elect to be subject to tax as a REIT for four taxable years following the year during which it was disqualified.

Since REIT qualification requires us to meet a number of complex requirements, it is possible that we may fail to fulfill them, and if we do, our earnings will be reduced by the amount of U.S. federal and other income taxes owed. A reduction in our earnings would affect the amount we could distribute to our stockholders. If we do not qualify as a REIT, we will not be required to make distributions to stockholders, since a non-REIT is not

required to pay dividends to stockholders in order to maintain REIT status or avoid an excise tax. In addition, if we fail to qualify as a REIT, all distributions to stockholders will continue to be treated as dividends to the extent of our current and accumulated earnings and profits, although corporate stockholders may be eligible for the dividends received deduction, and individual stockholders may be eligible for taxation at the rates generally applicable to long-term capital gains with respect to distributions.

As a result of all these factors, our failure to qualify as a REIT also could impair our ability to implement our business strategy and would adversely affect the value of our common stock. Qualification as a REIT involves the application of highly technical and complex Code provisions for which there are only limited judicial and administrative interpretations. The determination of various factual matters and circumstances not entirely within our control may affect our ability to remain qualified as a REIT. Although we believe that we qualify as a REIT, we cannot assure you that we will remain qualified as a REIT for U.S. federal income tax purposes.

Failure of Welltower OP to maintain status as a partnership for U.S. federal income tax purposes

We believe Welltower OP qualifies as a partnership for U.S. federal income tax purposes. As a partnership, Welltower OP is generally not subject to U.S. federal income tax on its income. Instead, each of the partners is allocated its share of Welltower OP's income. We cannot assure you, however, that the IRS will not challenge the status of Welltower OP as a partnership for U.S. federal income tax purposes. If the IRS were to successfully challenge the status of Welltower OP as a partnership, it would be taxable as a corporation. In such event, this would reduce the amount of distributions that Welltower OP could make. The treatment of Welltower OP as a corporation would also cause us to fail to qualify as a REIT. This would substantially reduce our cash available to pay distributions and the return on a unitholder and/or shareholder's investment.

Certain subsidiaries might fail to qualify or remain qualified as a REIT

We own interests in a number of entities which intend to operate as REITs for U.S. federal income tax purposes, some of which we consolidate for financial reporting purposes but each of which is treated as a separate REIT for federal income tax purposes (each a "Subsidiary REIT"). To qualify as a REIT, each Subsidiary REIT must independently satisfy all of the REIT qualification requirements under the Code, together with all other rules applicable to REITs. Provided that each Subsidiary REIT qualifies as a REIT, our interests in the Subsidiary REITs will be treated as qualifying real estate assets for purposes of the REIT asset tests. If a Subsidiary REIT fails to qualify as a REIT in any taxable year, such Subsidiary REIT would be subject to federal and state income taxes and would not be able to qualify as a REIT for the four subsequent taxable years following the year during which it was disqualified. Any such failure could have an adverse effect on our ability to comply with the REIT income and asset tests, and thus our ability to qualify as a REIT, unless we are able to avail ourselves of certain relief provisions.

The tax imposed on any net income from "prohibited transactions" may limit our ability to engage in transactions which would be treated as sales for federal income tax purposes

Any net income of a REIT from prohibited transactions (which are, in general, sales or other dispositions of property held primarily for sale to customers in the ordinary course of business, other than dispositions of foreclosure property) is subject to a 100% tax, unless certain safe harbor exceptions apply. Although we do not intend to hold any properties that would be characterized as held for sale to customers in the ordinary course of our business (other than through a TRS), such characterizations is a factual determination and no guarantee can be given that the IRS would agree with our characterization of our properties or that we will always be able to make use of the available safe harbors.

The 90% annual distribution requirement will decrease our liquidity and may limit our ability to engage in otherwise beneficial transactions

To comply with the 90% distribution requirement applicable to REITs and to avoid the nondeductible excise tax, we must make distributions to our stockholders. Although we anticipate that we generally will have sufficient cash or liquid assets to enable us to satisfy the REIT distribution requirement, it is possible that, from time to time, we may not have sufficient cash or other liquid assets to meet the 90% distribution requirement.

This may be due to timing differences between the actual receipt of income and actual payment of deductible expenses, on the one hand, and the inclusion of that income and deduction of those expenses in arriving at our taxable income, on the other hand. In addition, non-deductible expenses such as principal amortization or repayments or capital expenditures in excess of non-cash deductions may cause us to fail to have sufficient cash or liquid assets to enable us to satisfy the 90% distribution requirement. In the event that timing differences occur, or we deem it appropriate to retain cash, we may borrow funds, even if the then-prevailing market conditions are not favorable for these borrowings, issue additional equity securities (although we cannot assure you that we will be able to do so), pay taxable stock dividends, if possible, distribute other property or securities or engage in other transactions intended to enable us to meet the REIT distribution requirements. This may require us to raise additional capital to meet our obligations.

Our use of TRSs is limited under the Code

Under the Code, no more than 20% of the value of the gross assets of a REIT may be represented by securities of one or more TRSs. This limitation may affect our ability to increase the size of our TRSs' operations and assets, and there can be no assurance that we will be able to comply with the applicable limitation, or that such compliance will not adversely affect our business. Also, our TRSs may not, among other things, operate or manage certain health care facilities, which may cause us to forgo investments we might otherwise make. Finally, we may be subject to a 100% excise tax on the income derived from certain transactions with our TRSs that are not on an arm's-length basis. We believe our arrangements with our TRSs are on arm's-length terms and intend to continue to operate in a manner that allows us to avoid incurring the 100% excise tax described above, but there can be no assurance that we will be able to avoid application of that tax.

The lease of qualified health care properties to a TRS is subject to special requirements

We lease certain qualified health care properties to TRSs (or subsidiaries of TRSs), which lessees contract with managers (or related parties) to manage the health care operations at these properties. The rents from this TRS lessee structure are treated as qualifying rents from real property if (1) they are paid pursuant to an arm's-length lease of a qualified health care property with a TRS and (2) the manager qualifies as an eligible independent contractor (as defined in the Code). If any of these conditions are not satisfied, then the rents will not be qualifying rents.

If certain sale-leaseback transactions are not characterized by the Internal Revenue Service ("IRS") as "true leases," we may be subject to adverse tax consequences

We have purchased certain properties and leased them back to the sellers of such properties, and we may enter into similar transactions in the future. We intend for any such sale-leaseback transaction to be structured in such a manner that the lease will be characterized as a "true lease," thereby allowing us to be treated as the owner of the property for U.S. federal income tax purposes. However, depending on the terms of any specific transaction, the IRS might take the position that the transaction is not a "true lease" but is more properly treated in some other manner. In the event any sale-leaseback transaction is challenged and successfully re-characterized by the IRS, we would not be entitled to claim the deductions for depreciation and cost recovery generally available to an owner of property. Furthermore, if a sale-leaseback transaction were so re-characterized, we might fail to satisfy the REIT asset tests or income tests and, consequently, could lose our REIT status effective with the year of re-characterization. Alternatively, the amount of our REIT taxable income could be recalculated, which may cause us to fail to meet the REIT annual distribution requirements for a taxable year.

We could be subject to changes in our tax rates, the adoption of new U.S. or international tax legislation, or exposure to additional tax liabilities

We are subject to taxes in the U.S. and foreign jurisdictions. Because the U.S. maintains a worldwide corporate tax system, the foreign and U.S. tax systems are somewhat interdependent. Longstanding international norms that determine each country's jurisdiction to tax cross-border international trade are evolving and could reduce the ability of our foreign subsidiaries to deduct for foreign tax purposes the interest they pay on loans from us, thereby increasing the foreign tax liability of the subsidiaries; it is also possible that foreign countries could increase their withholding taxes on dividends and interest.

Our effective tax rates could be affected by changes in the mix of earnings in countries with differing statutory tax rates or changes in tax laws or their interpretation. We are also subject to the examination of our tax returns and other tax matters by the IRS and other tax authorities and governmental bodies. We regularly assess the likelihood of an adverse outcome resulting from these examinations to determine the adequacy of our provision for taxes. There can be no assurance as to the outcome of these examinations. If we were subject to review or examination by the IRS or applicable foreign jurisdiction as the result of any new tax law changes, the ultimate determination of which may change our taxes owed for an amount in excess of amounts previously accrued or recorded, our financial condition, operating results, and cash flows could be adversely affected.

The present federal income tax treatment of REITs may be modified, possibly with retroactive effect, by legislative, judicial or administrative action at any time, which could affect the federal income tax treatment of an investment in us. The federal income tax rules dealing with U.S. federal income taxation and REITs are constantly under review by persons involved in the legislative process, the IRS and the U.S. Treasury Department, which results in statutory changes as well as frequent revisions to regulations and interpretations.

We cannot predict how changes in the tax laws in the U.S. or foreign jurisdictions might affect our investors or us. Revisions in tax laws and interpretations thereof could significantly and negatively affect our ability to qualify as a REIT, as well as the tax considerations relevant to an investment in us, could cause us to change our investments and commitments, and adversely affect our earnings and cash flow.

The impact to our TRSs of the Corporate Alternative Minimum Tax imposed by the Inflation Reduction Act of 2022 is uncertain and may be adverse

For tax years beginning after December 31, 2022, the Inflation Reduction Act of 2022 (“IRA”) imposes among other things, a 15% Corporate Alternative Minimum Tax (“Corporate AMT”) on certain U.S. corporations with average adjusted financial statement income in excess of \$1 billion. Although, by its terms, the Corporate AMT is not applicable to REITs, it is not certain whether or how the Corporate AMT would apply to our TRSs.

In December 2022, the U.S. Department of the Treasury issued Notice 2023-7, indicating its intention to propose regulations and provide other guidance regarding the Corporate AMT and issuing certain interim rules on which taxpayers may rely. Until further regulations and guidance from the IRS and Treasury are released, the impact of the Corporate AMT on our TRSs is uncertain and it is possible that our TRSs will be subject to material U.S. federal income taxes under the Corporate AMT.

Item 1B. *Unresolved Staff Comments*

None.

Item 2. Properties

We lease our corporate headquarters located at 4500 Dorr Street, Toledo, Ohio 43615. We also lease corporate offices throughout the U.S., Canada and the United Kingdom and have ground leases relating to certain of our properties. The following table sets forth certain information regarding the properties that comprise our consolidated real property and real estate loan investments as of December 31, 2022 (dollars in thousands):

Property Location	Seniors Housing Operating			Triple-net			Outpatient Medical		
	Number of Properties	Total Investment	Annualized Revenues ⁽¹⁾	Number of Properties	Total Investment	Annualized Revenues ⁽¹⁾	Number of Properties	Total Investment	Annualized Revenues ⁽¹⁾

(1) Represents revenue for the month ended December 31, 2022 annualized.

The following table sets forth occupancy and average annualized revenues for certain property types (excluding investments in unconsolidated entities):

	Occupancy ⁽¹⁾		Average Annualized Revenues ⁽²⁾	
	2022	2021	2022	2021
Seniors Housing Operating ⁽³⁾	78.1%	76.4%	\$49,987	\$ 48,300 per unit
Triple-net ⁽⁴⁾	76.2%	73.0%	17,330	19,675 per bed/unit
Outpatient Medical ⁽⁵⁾	95.2%	95.4%	38	37 per sq. ft.

- (1) We use unaudited, periodic financial information provided solely by tenants/borrowers to calculate occupancy for properties other than Outpatient Medical buildings and have not independently verified the information.
- (2) Represents December annualized revenues divided by total beds, units or square feet in service, as presented in the tables above.
- (3) Occupancy represents average occupancy of properties in service for the three months ended December 31.
- (4) Occupancy represents average quarterly operating occupancy based on the quarters ended September 30 and excludes properties that are unstabilized, closed or for which data is not available or meaningful.
- (5) Occupancy represents the percentage of total rentable square feet leased and occupied (including month-to-month and holdover leases and excluding terminations) as of December 31.

The following table sets forth information regarding lease expirations for certain portions of our portfolio as of December 31, 2022 (dollars in thousands):

	Expiration Year ⁽¹⁾

- (1) Excludes investments in unconsolidated entities, developments, land parcels, loans receivable and sub-leases. Investments classified as held for sale are included in 2023.
- (2) The most recent monthly cash base rent annualized. Base rent does not include tenant recoveries or amortization of above and below market lease intangibles or other non-cash income.

Item 3. Legal Proceedings

From time to time, there are various legal proceedings pending against us that arise in the ordinary course of our business. Management does not believe that the resolution of any of these legal proceedings either individually or in the aggregate will have a material adverse effect on our business, results of operations or financial condition. Further, from time to time, we are party to certain legal proceedings for which third parties, such as tenants, operators and/or managers are contractually obligated to indemnify, defend and hold us harmless. In some of these matters, the indemnitors have insurance for the potential damages. In other matters, we are being defended by tenants and other obligated third parties and these indemnitors may not have sufficient insurance, assets, income or resources to satisfy their defense and indemnification obligations to us. The unfavorable resolution of such legal proceedings could, individually or in the aggregate, materially adversely affect the indemnitors' ability to satisfy their respective obligations to us, which, in turn, could have a material adverse effect on our business, results of operations or financial condition. It is management's opinion that there are currently no such legal proceedings pending that will, individually or in the aggregate, have such a material adverse effect. Despite management's view of the ultimate resolution of these legal proceedings, we may have significant legal expenses and costs associated with the defense of such matters. Further, management cannot predict the outcome of these legal proceedings and if management's expectation regarding such matters is not correct, such proceedings could have a material adverse effect on our business, results of operations or financial condition.

Item 4. *Mine Safety Disclosures*

None.

PART II

Item 5. *Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities*

Our common stock trades on the New York Stock Exchange (NYSE:WELL). There were 3,002 stockholders of record as of February 16, 2023.

Stockholder Return Performance Presentation

The graph and table below compares the yearly percentage change and the cumulative total stockholder return on our shares of common stock against the cumulative total return of the S&P Composite-500 Stock Index and the FTSE NAREIT Equity Index. The data are based on the closing prices as of December 31 for each of the five years presented. 2017 equals \$100 and dividends are assumed to be reinvested.

	12/31/2017	12/31/2018	12/31/2019	12/31/2020	12/31/2021	12/31/2022
S & P 500	\$100.00	\$ 95.62	\$125.72	\$148.85	\$191.58	\$156.88
Welltower Inc.	100.00	115.30	141.86	117.05	160.34	126.40
FTSE NAREIT Equity	100.00	95.38	120.17	110.56	158.36	119.78

Except to the extent that we specifically incorporate this information by reference, the foregoing Stockholder Return Performance Presentation shall not be deemed incorporated by reference by any general statement incorporating by reference this Annual Report on Form 10-K into any filing under the Securities Act of 1933, as amended, or under the Securities Exchange Act of 1934, as amended. This information shall not otherwise be deemed filed under such Acts.

During the three months ended December 31, 2022, we acquired shares of our common stock held by employees who tendered shares to satisfy tax withholding obligations upon the vesting of previously issued restricted stock awards. Specifically, the number of shares of common stock acquired from employees and the average prices paid per share for each month in the fourth quarter ended December 31, 2022 are shown in the table below:

Issuer Purchases of Equity Securities				
<u>Period</u>	<u>Total Number of Shares Purchased</u>	<u>Average Price Paid Per Share</u>	<u>Total Number of Shares Purchased as Part of Publicly Announced Repurchase Program</u>	<u>Maximum Dollar Value of Shares that May Yet Be Purchased Under the Repurchase Program</u>
October 1, 2022 through October 31, 2022	285	\$64.32	—	\$ —
November 1, 2022 through November 30, 2022	—	—	—	3,000,000,000
December 1, 2022 through December 31, 2022	—	—	—	3,000,000,000
Totals	285	\$64.32	—	\$3,000,000,000

On November 7, 2022, our Board of Directors approved a share repurchase program for up to \$3,000,000,000 of common stock (the “Stock Repurchase Program”). Under the Stock Repurchase Program, we are not required to purchase shares but may choose to do so in the open market or through privately-negotiated transactions, through block trades, by effecting a tender offer, by way of an accelerated share repurchase program, through the purchase of call options or the sale of put options, or otherwise, or by any combination of the foregoing. We expect to finance any share repurchases using available cash and may use proceeds from borrowings or debt offerings. The Stock Repurchase Program has no expiration date and does not obligate us to repurchase any specific number of shares. We did not repurchase any shares of our common stock through the Stock Repurchase Program during the three months ended December 31, 2022.

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis is based primarily on the consolidated financial statements of Welltower Inc. presented in conformity with U.S. generally accepted accounting principles (“U.S. GAAP”) for the periods presented and should be read together with the notes thereto contained in this Annual Report on Form 10-K. Other important factors are identified in “Item 1 — Business” and “Item 1A — Risk Factors” above.

On March 7, 2022, we announced our intent to complete an UPREIT reorganization. In February 2022, the company formerly known as Welltower Inc. (“Old Welltower”) formed WELL Merger Holdco Inc. (“New Welltower”) as a wholly owned subsidiary, and New Welltower formed WELL Merger Holdco Sub Inc. (“Merger Sub”) as a wholly owned subsidiary. On April 1, 2022, Merger Sub merged with and into Old Welltower, with Old Welltower continuing as the surviving corporation and a wholly owned subsidiary of New Welltower. In connection with the Merger, Old Welltower’s name was changed to “Welltower OP Inc.”, and New Welltower inherited the name “Welltower Inc.” Effective May 24, 2022, Welltower OP Inc. (“Welltower OP”) converted from a Delaware corporation into a Delaware limited liability company named Welltower OP LLC. Following the LLC Conversion, New Welltower’s business continues to be conducted through Welltower OP and New Welltower does not have substantial assets or liabilities, other than through its investment in Welltower OP.

Unless stated otherwise or the context otherwise requires, references to “Welltower” mean Welltower Inc. and references to “Welltower OP” mean Welltower OP LLC. References to “we,” “us” and “our” mean collectively Welltower, Welltower OP and those entities/subsidiaries owned or controlled by Welltower and/or Welltower OP.

Executive Summary

Company Overview

Welltower Inc. (NYSE:WELL), an S&P 500 company headquartered in Toledo, Ohio, is driving the transformation of health care infrastructure. The Company invests with leading seniors housing operators, post-acute providers and health systems to fund the real estate and infrastructure needed to scale innovative care delivery models and improve people’s wellness and overall health care experience. Welltower Inc., a real estate investment trust (“REIT”), owns interests in properties concentrated in major, high-growth markets in the United States (“U.S.”), Canada and the United Kingdom (“U.K.”), consisting of seniors housing and post-acute communities and outpatient medical properties.

Welltower Inc. is the initial member and majority owner of Welltower OP, with an approximate ownership interest of 99.751% as of December 31, 2022. All of our property ownership, development and related business operations are conducted through Welltower OP and Welltower Inc. has no material assets or liabilities other than its investment in Welltower OP. Welltower Inc. issues equity from time to time, the net proceeds of which it is obligated to contribute as additional capital to Welltower OP. All debt including credit facilities, senior notes and secured debt is incurred by Welltower OP, and Welltower Inc. has fully and conditionally guaranteed all existing and future senior unsecured notes.

The following table summarizes our consolidated portfolio for the year ended December 31, 2022 (dollars in thousands):

<u>Type of Property</u>	<u>NOI⁽¹⁾</u>	<u>Percentage of NOI</u>	<u>Number of Properties</u>
Seniors Housing Operating	\$ 953,372	41.2%	850
Triple-net	887,024	38.3%	570
Outpatient Medical	472,760	20.5%	323
Totals	<u>\$ 2,313,156</u>	<u>100.0%</u>	<u>1,743</u>

(1) Represents consolidated net operating income (“NOI”) and excludes our share of investments in unconsolidated entities. Entities in which we have a joint venture with a minority partner are shown at 100% of the joint venture amount. See Non-GAAP Financial Measures for additional information and reconciliation.

Item 7. *Management’s Discussion and Analysis of Financial Condition and Results of Operations*

The COVID-19 pandemic has had and may continue to have material and adverse effects on our financial condition, results of operations and cash flows in the future. The extent to which the COVID-19 pandemic impacts our operations and those of our operators and tenants will depend on future developments, which are highly uncertain and cannot be predicted with confidence, including the scope, severity and duration of the pandemic, the effectiveness of vaccines, the actions taken to contain the pandemic or mitigate its impact and the direct and indirect economic effects of the pandemic and containment measures, the overall pace of recovery, among others.

Our Seniors Housing Operating revenues are dependent on occupancy which has increased during the year ended December 31, 2022. As of December 31, 2022, nearly all communities are open for new admissions and allowing visitors, in-person tours and communal dining activities.

We have incurred increased operational costs as a result of public health measures and other regulations affecting our properties, as well as additional health and safety measures adopted by us and our operators related to the COVID-19 pandemic, including increases in labor, personal protective equipment and sanitation. We expect total Seniors Housing Operating expenses to remain elevated as many of these additional health and safety measures have become standard practice.

Our Triple-net operators are experiencing similar trends related to occupancy and operating costs as described above with respect to our Seniors Housing Operating properties. However, long-term/post-acute care facilities are generally experiencing a higher degree of occupancy declines. These factors may continue to impact the ability of our Triple-net operators to make contractual rent payments to us in the future. Many of our Triple-net operators received funds under the Coronavirus Aid Relief, and Economic Security Act (“CARES Act”) Paycheck Protection Program and Provider Relief Fund.

Business Strategy

Our primary objectives are to protect stockholder capital and enhance stockholder value. We seek to pay consistent cash dividends to stockholders and create opportunities to increase dividend payments to stockholders as a result of annual increases in NOI and portfolio growth. To meet these objectives, we invest across the full spectrum of seniors housing and health care real estate and diversify our investment portfolio by property type, relationship and geographic location.

Substantially all of our revenues are derived from operating lease rentals, resident fees and services and interest earned on outstanding loans receivable. These items represent our primary sources of liquidity to fund distributions and depend upon the continued ability of our obligors to make contractual rent and interest payments to us and the profitability of our operating properties. To the extent that our obligors/partners experience operating difficulties and become unable to generate sufficient cash to make payments or operating distributions to us, there could be a material adverse impact on our consolidated results of operations, liquidity and/or financial condition. To mitigate this risk, we monitor our investments through a variety of methods determined by the type of property. Our asset management process for seniors housing properties generally includes review of monthly financial statements and other operating data for each property, review of obligor/partner creditworthiness, property inspections and review of covenant compliance relating to licensure, real estate taxes, letters of credit and other collateral. Our internal property management division manages and monitors the outpatient medical portfolio with a comprehensive process including review of tenant relations, lease expirations, the mix of health service providers, hospital/health system relationships, property performance, capital improvement needs and market conditions among other things. We evaluate the operating environment in each property’s market to determine the likely trend in operating performance of the facility. When we identify unacceptable trends, we seek to mitigate, eliminate or transfer the risk. Through these efforts, we generally aim to intervene at an early stage to address any negative trends, and in so doing, support both the collectability of revenue and the value of our investment.

In addition to our asset management and research efforts, we also aim to structure our relevant investments to mitigate payment risk. Operating leases and loans are normally credit enhanced by guarantees and/or letters of

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

credit. In addition, operating leases are typically structured as master leases and loans are generally cross-defaulted and cross-collateralized with other real estate loans, operating leases or agreements between us and the obligor and its affiliates.

For the year ended December 31, 2022, resident fees and services and rental income represented 71% and 25%, respectively, of total revenues. Substantially all of our operating leases are designed with escalating rent structures. Leases with fixed annual rental escalators are generally recognized on a straight-line basis over the initial lease period, subject to a collectability assessment. Rental income related to leases with contingent rental escalators is generally recorded based on the contractual cash rental payments due for the period. Our yield on loans receivable depends upon a number of factors, including the stated interest rate, the average principal amount outstanding during the term of the loan and any interest rate adjustments.

Our primary sources of cash include resident fees and services, rent and interest receipts, borrowings under our unsecured revolving credit facility and commercial paper program, public issuances of debt and equity securities, proceeds from investment dispositions and principal payments on loans receivable. Our primary uses of cash include dividend distributions, debt service payments (including principal and interest), real property investments (including acquisitions, capital expenditures, construction advances and transaction costs), loan advances, property operating expenses, general and administrative expenses and other expenses. Depending upon the availability and cost of external capital, we believe our liquidity is sufficient to fund these uses of cash.

We also continuously evaluate opportunities to finance future investments. New investments are generally funded from temporary borrowings under our unsecured revolving credit facility and commercial paper program, internally generated cash and the proceeds from investment dispositions. Our investments generate cash from NOI and principal payments on loans receivable. Permanent financing for future investments, which replaces funds drawn under our unsecured revolving credit facility and commercial paper program, has historically been provided through a combination of the issuance of public debt and equity securities and the incurrence or assumption of secured debt.

Depending upon market conditions, we believe that new investments will be available in the future with spreads over our cost of capital that will generate appropriate returns to our stockholders. It is also likely that investment dispositions may occur in the future. To the extent that investment dispositions exceed new investments, our revenues and cash flows from operations could be adversely affected. We expect to reinvest the proceeds from any investment dispositions in new investments. To the extent that new investment requirements exceed our available cash on-hand, we expect to borrow under our unsecured revolving credit facility and commercial paper program. At December 31, 2022, we had \$631,681,000 of cash and cash equivalents, \$90,611,000 of restricted cash and \$4,000,000,000 of available borrowing capacity under our unsecured revolving credit facility.

Key Transactions

Capital The following summarizes key capital transactions that occurred during the year ended December 31, 2022:

- In March 2022, we completed the issuance of \$550,000,000 senior unsecured notes bearing interest at 3.85% with a maturity date of June 2032.
- In April 2022, we entered into an amended and restated ATM Program (as defined below) pursuant to which we may offer and sell up to \$3,000,000,000 of common stock from time to time. During 2022, we sold 37,905,638 shares of common stock under our current and previous ATM Programs via forward sale agreements, generating gross proceeds of approximately \$3,280,798,000. The sale of these shares and the settlement of outstanding forward sales from prior years resulted in gross proceeds of approximately \$3,715,971,000.
- In June 2022, we closed on an amended \$5,200,000,000 unsecured credit facility with improved pricing across our term loans. The credit facility includes \$4,000,000,000 of revolving credit capacity

Item 7. *Management’s Discussion and Analysis of Financial Condition and Results of Operations*

at a borrowing rate of 77.5 basis points over the adjusted SOFR rate, \$1,000,000,000 of USD term loan capacity at a borrowing rate of 85.0 basis points over the adjusted SOFR rate and \$250,000,000 CAD term loan capacity at 85.0 basis points over CDOR.

- We extinguished \$399,066,000 of secured debt at a blended average interest rate of 5.54% throughout 2022.

Investments The following summarizes property acquisitions and joint venture investments completed during the year ended December 31, 2022 (dollars in thousands):

	<u>Properties</u>	<u>Book Amount⁽¹⁾</u>	<u>Capitalization Rates⁽²⁾</u>
Seniors Housing Operating	77	\$2,511,408	4.7%
Triple-net	5	66,784	0.2%
Outpatient Medical	12	360,905	5.4%
Totals	<u>94</u>	<u>\$2,939,097</u>	<u>4.6%</u>

(1) Represents amounts recorded in net real estate investments including fair value adjustments pursuant to U.S. GAAP. See Note 3 to our consolidated financial statements for additional information.

(2) Represents annualized contractual or projected NOI to be received in cash divided by investment amounts.

Dispositions The following summarizes property dispositions completed during the year ended December 31, 2022 (dollars in thousands):

	<u>Properties</u>	<u>Proceeds⁽¹⁾</u>	<u>Book Amount⁽²⁾</u>	<u>Capitalization Rates⁽³⁾</u>
Seniors Housing Operating	5	\$ 88,815	\$ 85,413	—%
Triple-net	11	109,917	89,827	3.8%
Outpatient Medical	—	764	393	—%
Totals	<u>16</u>	<u>\$199,496</u>	<u>\$175,633</u>	<u>3.8%</u>

(1) Represents pro rata proceeds received upon disposition including any seller financing.

(2) Represents carrying value of net real estate assets at time of disposition. See Note 5 to our consolidated financial statements for additional information.

(3) Represents annualized contractual income that was being received in cash at date of disposition divided by stated purchase price. Excludes properties sold that were recent development conversions.

Dividends Our Board of Directors declared a cash dividend for the quarter ended December 31, 2022 of \$0.61 per share. On March 8, 2023, we will pay our 207th consecutive quarterly dividend payment to stockholders of record on February 28, 2023.

Key Performance Indicators, Trends and Uncertainties

We utilize several key performance indicators to evaluate the various aspects of our business. These indicators are discussed below and relate to operating performance, credit strength and concentration risk. Management uses these key performance indicators to facilitate internal and external comparisons to our historical operating results, in making operating decisions, and for budget planning purposes.

Operating Performance We believe that net income and net income attributable to common stockholders (“NICS”) per the Consolidated Statements of Comprehensive Income are the most appropriate earnings measures. Other useful supplemental measures of our operating performance include funds from operations attributable to common stockholders (“FFO”) and consolidated net operating income (“NOI”); however, these

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

supplemental measures are not defined by U.S. GAAP. Please refer to the section entitled “Non-GAAP Financial Measures” for further discussion and reconciliations. These earnings measures are widely used by investors and analysts in the valuation, comparison and investment recommendations of companies.

The following table reflects the recent historical trends of our operating performance measures for the periods presented (in thousands):

	Year Ended December 31,		
	2022	2021	2020
Net income	\$ 160,568	\$ 374,479	\$1,038,852
Net income attributable to common stockholders	141,214	336,138	978,844
Funds from operations attributable to common stockholders	1,478,072	1,220,722	1,102,562
Consolidated net operating income	2,301,845	1,967,553	2,008,144

Credit Strength We measure our credit strength both in terms of leverage ratios and coverage ratios. The leverage ratios indicate how much of our balance sheet capitalization is related to long-term debt, net of cash and restricted cash. The coverage ratios indicate our ability to service interest and fixed charges (interest and secured debt principal amortization). We expect to maintain capitalization ratios and coverage ratios sufficient to maintain a capital structure consistent with our current profile. The coverage ratios are based on earnings before interest, taxes, depreciation and amortization (“EBITDA”) and adjusted earnings before interest, taxes, depreciation and amortization (“Adjusted EBITDA”). Please refer to the section entitled “Non-GAAP Financial Measures” for further discussion and reconciliation of these measures. Leverage ratios and coverage ratios are widely used by investors, analysts and rating agencies in the valuation, comparison, investment recommendations and rating of companies. The following table reflects the recent historical trends for our credit strength measures for the periods presented:

	Year Ended December 31,		
	2022	2021	2020
Net debt to book capitalization ratio	39.5%	42.2%	40.8%
Net debt to undepreciated book capitalization ratio	32.1%	34.9%	33.8%
Net debt to market capitalization ratio	29.5%	25.9%	29.6%
Interest coverage ratio	3.73x	3.89x	5.04x
Fixed charge coverage ratio	3.37x	3.43x	4.49x
Adjusted interest coverage ratio	3.94x	3.89x	3.97x
Adjusted fixed charge coverage ratio	3.56x	3.43x	3.54x

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

Concentration Risk We evaluate our concentration risk in terms of NOI by property mix, relationship mix and geographic mix. Concentration risk is a valuable measure in understanding what portion of our NOI could be at risk if certain sectors were to experience downturns. Property mix measures the portion of our NOI that relates to our various property types. Relationship mix measures the portion of our NOI that relates to our current top five relationships. Geographic mix measures the portion of our NOI that relates to our current top five states (or international equivalents). The following table reflects our recent historical trends of concentration risk by NOI for the years indicated below:

	December 31, ⁽¹⁾		
	2022	2021	2020
Property mix:			
Seniors Housing Operating	41%	35%	38%
Triple-net	38%	43%	37%
Outpatient Medical	21%	22%	25%
Relationship mix:			
ProMedica	10%	12%	11%
Sunrise Senior Living	7%	10%	13%
Atria Senior Living ⁽²⁾	6%	2%	—%
HC-One Group	4%	3%	—%
Cogir Management Corporation	3%	2%	2%
Remaining	70%	71%	74%
Geographic mix:			
California	14%	13%	14%
United Kingdom	10%	13%	10%
Texas	8%	8%	9%
Canada	6%	6%	6%
New Jersey	6%	6%	5%
Remaining	56%	54%	56%

(1) Excludes our share of investments in unconsolidated entities and non-segment/corporate NOI. Entities in which we have a joint venture with a minority partner are shown at 100% of the joint venture amount.

(2) Year ended December 31, 2022 includes \$58,621,000 of income recognized upon termination of a lease. See Note 3 to our consolidated financial statements for further details.

In December 2022, ProMedica relinquished to Welltower its 15% interest in 147 skilled nursing facilities previously owned by the Welltower/ProMedica joint venture in exchange for a lease modification, which relieved ProMedica from its lease obligation on the 147 skilled nursing properties and amended the lease on the remaining 58 assisted living and memory care properties that continue to be held by the Welltower/ProMedica joint venture. The 58 assisted living and memory care assets continue to be operated by ProMedica and backed by the existing guaranty.

Concurrently with the above, Welltower and Integra Healthcare Properties (“Integra”) entered into master leases for the skilled nursing portfolio. Approximately 15 regional operators will enter into subleases with Integra to operate the properties. Also in December 2022, we sold to Integra a 15% ownership interest in 54 of those skilled nursing facilities for approximately \$73 million. This transaction represents the initial tranche of the newly formed joint venture owned 85% by Welltower and 15% by Integra, which is anticipated to include the 147 skilled nursing facilities. In January 2023, Integra acquired a 15% interest in 31 of the remaining 93 skilled nursing facilities for approximately \$74 million, representing the second tranche of the WELL/ Integra joint venture. Integra is expected to buy into the remaining 62 assets throughout 2023.

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

ProMedica NOI for the year ended December 31, 2022 was comprised of \$59,687,000 relating to the 58 assisted living and memory care properties (3% of total NOI) and \$180,441,000 relating to the 147 skilled nursing properties (8% of total NOI).

We evaluate our key performance indicators in conjunction with current expectations to determine if historical trends are indicative of future results. Our expected results may not be achieved and actual results may differ materially from our expectations. Factors that may cause actual results to differ from expected results are described in more detail in “Item 1 — Business — Cautionary Statement Regarding Forward-Looking Statements” and “Item 1A — Risk Factors” and other sections of this Annual Report on Form 10-K. Management regularly monitors economic and other factors to develop strategic and tactical plans designed to improve performance and maximize our competitive position. Our ability to achieve our financial objectives is dependent upon our ability to effectively execute these plans and to appropriately respond to emerging economic and company-specific trends. Please refer to “Item 1 — Business,” “Item 1A — Risk Factors” in this Annual Report on Form 10-K for further discussion of these risk factors.

Corporate Governance

Maintaining investor confidence and trust is important in today’s business environment. Our Board of Directors and management are strongly committed to policies and procedures that reflect the highest level of ethical business practices. Our corporate governance guidelines provide the framework for our business operations and emphasize our commitment to increase stockholder value while meeting all applicable legal requirements. These guidelines meet the listing standards adopted by the New York Stock Exchange and are available on the Internet at www.welltower.com/investors/governance. The information on our website is not incorporated by reference in this Annual Report on Form 10-K, and our web address is included as an inactive textual reference only.

Liquidity and Capital Resources

Sources and Uses of Cash

Our primary sources of cash include resident fees and services, rent and interest receipts, borrowings under our unsecured revolving credit facility and commercial paper program, public issuances of debt and equity securities, proceeds from investment dispositions and principal payments on loans receivable. Our primary uses of cash include dividend distributions, debt service payments (including principal and interest), real property investments (including acquisitions, capital expenditures, construction advances and transaction costs), loan advances, property operating expenses, general and administrative expenses and other expenses. These sources and uses of cash are reflected in our Consolidated Statements of Cash Flows and are discussed in further detail below. The following is a summary of our sources and uses of cash flows for the periods presented (dollars in thousands):

	Year Ended		One Year Change		Year Ended		One Year Change		Two Year Change	
	December 31, 2022	December 31, 2021	\$	%	December 31, 2020	\$	%	\$	%

Cash, cash equivalents and restricted cash at end of period	\$ 722,292	\$ 346,755	\$ 375,537	108%	\$ 2,021,043	\$(1,674,288)	-83%	\$(1,298,751)	-64%	

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

Operating Activities The changes in net cash provided from operating activities was immaterial. Please see “Results of Operations” for discussion of net income fluctuations. For the years ended December 31, 2022, 2021 and 2020, cash flows from operations exceeded cash distributions to stockholders.

Investing Activities The changes in net cash provided from/used in investing activities are primarily attributable to net changes in real property investments and dispositions, loans receivable and investments in unconsolidated entities, which are summarized above in “Key Transactions.” Please refer to Notes 3 and 5 of our consolidated financial statements for additional information. The following is a summary of cash used in non-acquisition capital improvement activities for the periods presented (dollars in thousands):

	Year Ended		One Year Change		Year Ended		One Year Change		Two Year Change	
	December 31, 2022	December 31, 2021	\$	%	December 31, 2020	\$	%	\$	%	
New development	\$ 631,737	\$417,963	\$ 213,774	51%	\$201,336	\$ 216,627	108%	\$ 430,401	214%	
Recurring capital expenditures, tenant improvements and lease commissions	198,576	99,994	98,582	99%	83,146	16,848	20%	115,430	139%	
Renovations, redevelopments and other capital improvements	277,440	182,594	94,846	52%	161,843	20,751	13%	115,597	71%	
Total	<u>\$ 1,107,753</u>	<u>\$700,551</u>	<u>\$ 407,202</u>	<u>58%</u>	<u>\$446,325</u>	<u>\$ 254,226</u>	<u>57%</u>	<u>\$ 661,428</u>	<u>148%</u>	

The change in new development is primarily due to the number and size of construction projects on-going during the relevant periods. Renovations, redevelopments and other capital improvements include expenditures to maximize property value, increase net operating income, maintain a market-competitive position and/or achieve property stabilization. The increase in overall development and recurring capital expenditures, tenant improvements and lease commissions is due primarily to portfolio growth and increased spending after a contraction during the pandemic.

Financing Activities The changes in net cash provided from/used in financing activities are primarily attributable to changes related to our long-term debt arrangements, the issuances of common stock and dividend payments which are summarized above in “Key Transactions.” Please refer to Notes 10, 11 and 14 of our consolidated financial statements for additional information.

In March 2022, we completed the issuance of \$550,000,000 senior unsecured notes with a maturity date of June 2032. In April 2022, we closed on an amended \$5,200,000,000 unsecured credit facility, increasing our term loan capacity by \$500,000,000. As of December 31, 2022, we have total near-term available liquidity of approximately \$4.7 billion.

Off-Balance Sheet Arrangements

At December 31, 2022, we had investments in unconsolidated entities with our ownership generally ranging from 10% to 88%. We use financial derivative instruments to hedge interest rate and foreign currency exchange rate exposure. At December 31, 2022, we had 21 outstanding letter of credit obligations. Please see Notes 8, 12 and 13 to our consolidated financial statements for additional information.

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

Contractual Obligations

The following table summarizes our payment requirements under contractual obligations as of December 31, 2022 (in thousands):

Contractual Obligations	Payments Due by Period				
	Total	2023	2024-2025	2026-2027	Thereafter
Senior unsecured notes and term credit facilities: ⁽¹⁾					
U.S. Dollar senior unsecured notes	\$ 9,900,000	\$ —	\$ 2,600,000	\$ 1,200,000	\$ 6,100,000
Canadian Dollar senior unsecured notes ⁽²⁾	221,697	—	—	221,697	—
Pounds Sterling senior unsecured notes ⁽²⁾	1,268,085	—	—	—	1,268,085

Unconsolidated secured debt ⁽²⁾	181,592	35,550	67,524	29,387	49,131
Finance lease liabilities ⁽⁴⁾	206,489	72,218	5,591	3,538	125,142
Operating lease liabilities ⁽⁴⁾	963,239	20,279	35,556	31,350	876,054
Purchase obligations ⁽⁵⁾	2,096,349	1,230,913	799,826	65,610	—
Total contractual obligations	<u>\$ 23,775,648</u>	<u>\$ 2,813,124</u>	<u>\$ 5,852,972</u>	<u>\$ 4,031,465</u>	<u>\$ 11,078,087</u>

(1) Amounts represent principal amounts due and do not reflect unamortized premiums/discounts or other fair value adjustments as reflected on the Consolidated Balance Sheets.

(2) Based on foreign currency exchange rates in effect as of balance sheet date.

(3) Based on variable interest rates in effect as of December 31, 2022.

(4) See Note 6 to our consolidated financial statements for additional information.

(5) See Note 13 to our consolidated financial statements for additional information.

Capital Structure

Please refer to “Credit Strength” above for a discussion of our leverage and coverage ratio trends. Our debt agreements contain various covenants, restrictions and events of default. Certain agreements require us to maintain financial ratios and minimum net worth and impose certain limits on our ability to incur indebtedness, create liens and make investments or acquisitions. As of December 31, 2022, we were in compliance in all material respects with the covenants under our debt agreements. None of our debt agreements contain provisions for acceleration which could be triggered by our debt ratings. However, under our primary unsecured credit facility, the ratings on our senior unsecured notes are used to determine the fees and interest charged. We plan to manage the company to maintain compliance with our debt covenants and with a capital structure consistent with our current profile. Any downgrades in terms of ratings or outlook by any or all of the rating agencies could have a material adverse impact on our cost and availability of capital, which could have a material adverse impact on our consolidated results of operations, liquidity and/or financial condition.

On April 1, 2022, Welltower Inc. and Welltower OP LLC jointly filed with the Securities and Exchange Commission (the “SEC”) an open-ended automatic or “universal” shelf registration statement on Form S-3 covering an indeterminate amount of future offerings of Welltower Inc.’s debt securities, common stock,

Item 7. *Management’s Discussion and Analysis of Financial Condition and Results of Operations*

preferred stock, depositary shares, guarantees of debt securities issued by Welltower OP LLC, warrants and units and Welltower OP LLC’s debt securities and guarantees of debt securities issued by Welltower Inc. to replace Old Welltower’s existing “universal” shelf registration statement filed with the SEC on May 4, 2021. On April 1, 2022, Welltower Inc. also filed with the SEC a registration statement in connection with its enhanced dividend reinvestment plan (“DRIP”) under which it may issue up to 15,000,000 shares of common stock to replace Old Welltower’s existing DRIP registration statement on Form S-3 filed with the SEC on May 4, 2021. As of February 16, 2023, 15,000,000 shares of common stock remained available for issuance under the DRIP registration statement. On April 4, 2022, Welltower Inc. entered into (i) a second amended and restated equity distribution agreement (the “EDA”) with (i) Robert W. Baird & Co. Incorporated, Barclays Capital Inc., BMO Capital Markets Corp., BNP Paribas Securities Corp., BNY Mellon Capital Markets, LLC, BofA Securities, Inc., BOK Financial Securities, Inc., Capital One Securities Inc., Citigroup Global Markets Inc., Comerica Securities, Inc., Credit Agricole Securities (USA) Inc., Deutsche Bank Securities Inc., Fifth Third Securities, Inc., Goldman Sachs & Co. LLC, Jefferies LLC, JMP Securities LLC, J.P. Morgan Securities LLC, KeyBanc Capital Markets Inc., Loop Capital Markets LLC, Mizuho Securities USA LLC, Morgan Stanley & Co. LLC, MUFG Securities Americas Inc., RBC Capital Markets, LLC, Regions Securities LLC, Scotia Capital (USA) Inc., SMBC Nikko Securities America, Inc., Synovus Securities, Inc., TD Securities (USA) LLC, Truist Securities, Inc. and Wells Fargo Securities, LLC as sales agents and forward sellers and (ii) the forward purchasers named therein relating to issuances, offers and sales from time to time of up to \$3,000,000,000 aggregate amount of common stock of Welltower Inc. (together with the existing master forward sale confirmations relating thereto, the “ATM Program”), amending and restating the ATM Program entered into on July 30, 2021 to, among other amendments, increase the total amount of shares of common stock that may be offered and sold under the ATM Program from \$2,500,000,000 to \$3,000,000,000, which amount excludes shares Old Welltower had previously sold pursuant to the prior program. The ATM Program also allows Welltower Inc. to enter into forward sale agreements. As of February 16, 2023, we had \$1,150,202,853 of remaining capacity under the ATM Program and there were no outstanding forward sales agreements. Depending upon market conditions, we anticipate issuing securities under our registration statements to invest in additional properties and to repay borrowings under our unsecured revolving credit facility and commercial paper program.

In connection with the filing of the new “universal” shelf registration statement, Welltower Inc. also filed with the SEC two prospectus supplements that will continue offerings that were previously covered by Old Welltower’s prospectus supplements and the accompanying prospectus to the prior registration statement relating to: (i) the registration of up to 620,731 shares of common stock of Welltower Inc. (the “DownREIT Shares”), that may be issued from time to time if, and to the extent that, certain holders of Class A units (the “DownREIT Units”) of HCN G&L DownREIT, LLC, a Delaware limited liability company (the “DownREIT”), tender such DownREIT Units for redemption by the DownREIT, and HCN DownREIT Member, LLC, a majority-owned indirect subsidiary of Welltower Inc. (including its permitted successors and assigns, the “Managing Member”), or a designated affiliate of the Managing Member, elects to assume the redemption obligations of the DownREIT and to satisfy all or a portion of the redemption consideration by issuing DownREIT Shares to the holders instead of or in addition to paying a cash amount; and (ii) the registration of up to 475,327 shares of common stock of Welltower Inc. (the “DownREIT II Shares”), that may be issued from time to time if, and to the extent that, certain holders of Class A units (the “DownREIT II Units,” and collectively with the DownREIT Units, the “Units”) of HCN G&L DownREIT II LLC, a Delaware limited liability company (the “DownREIT II”), tender such DownREIT II Units for redemption by the DownREIT II, and the Managing Member, or a designated affiliate of the Managing Member, elects to assume the redemption obligations of the DownREIT II and to satisfy all or a portion of the redemption consideration by issuing DownREIT II Shares to the holders instead of or in addition to paying a cash amount. On July 22, 2022, Welltower Inc. filed with the SEC a prospectus supplement relating to the registration of up to 300,026 shares of common stock of Welltower Inc. that may be issued from time to time if, and to the extent that, certain holders of Class A Common Units (the “OP Units”) of Welltower OP tender the OP Units for redemption by Welltower OP, and Welltower Inc. elects to assume the redemption obligations of Welltower OP and to satisfy all or a portion of the redemption consideration by issuing shares of its common stock to the holders instead of or in addition to paying a cash amount.

Item 7. *Management’s Discussion and Analysis of Financial Condition and Results of Operations*

Supplemental Guarantor Information

Welltower OP has issued the unsecured notes described in Note 11 to our Consolidated Financial Statements. All unsecured notes are fully and unconditionally guaranteed by Welltower, and Welltower OP is 99.751% owned by Welltower as of December 31, 2022. Effective January 4, 2021, the SEC adopted amendments to the financial disclosure requirements applicable to registered debt offerings that include certain credit enhancements. We have adopted these new rules, which permits subsidiary issuers of obligations guaranteed by the parent to omit separate financial statements if the consolidated financial statements of the parent company have been filed, the subsidiary obligor is a consolidated subsidiary of the parent company, the guaranteed security is debt or debt-like, and the security is guaranteed fully and unconditionally by the parent. Accordingly, separate consolidated financial statements of Welltower OP have not been presented. Furthermore, Welltower and Welltower OP have no material assets, liabilities, or operations other than financing activities and their investments in non-guarantor subsidiaries. Therefore, we meet the criteria in Rule 13-01 of Regulation S-X to omit the summarized financial information from our disclosures.

Results of Operations

Summary

Our primary sources of revenue include resident fees and services, rent and interest income. Our primary expenses include property operating expenses, depreciation and amortization, interest expense, general and administrative expenses, and other expenses. We evaluate our business and make resource allocations on our three business segments: Seniors Housing Operating, Triple-net and Outpatient Medical. The primary performance measures for our properties are NOI and same store NOI (“SSNOI”) and other supplemental measures include FFO and Adjusted EBITDA, which are further discussed below. Please see Non-GAAP Financial Measures for additional information and reconciliations related to these supplemental measures.

This section of this Form 10-K generally discusses 2022 and 2021 items and year-to-year comparisons between 2022 and 2021. Discussions of 2020 items and year-to-year comparisons between 2021 and 2020 that are not included in this Form 10-K can be found in “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in Part II, Item 7 of the Company’s Annual Report on Form 10-K for the fiscal year ended December 31, 2021.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following is a summary of our results of operations for the periods presented (dollars in thousands, except per share amounts):

	Year Ended		One Year Change		Year Ended		One Year Change		Two Year Change	
	December 31, 2022	December 31, 2021	Amount	%	December 31, 2020	Amount	%	Amount	%	
Net income	\$ 160,568	\$ 374,479	\$(213,911)	-57%	\$ 1,038,852	\$(664,373)	-64%	\$(878,284)	-85%	
NICS	141,214	336,138	(194,924)	-58%	978,844	(642,706)	-66%	(837,630)	-86%

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

A portion of our earnings are derived primarily from long-term investments with predictable rates of return. These investments are mainly financed with a combination of equity, senior unsecured notes, secured debt and borrowings under our primary unsecured credit facility. During inflationary periods, which generally are accompanied by rising interest rates, our ability to grow may be adversely affected because the yield on new investments may increase at a slower rate than new borrowing costs.

Seniors Housing Operating

(1) See Non-GAAP Financial Measures below.

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

Resident fees and services and property operating expenses for the year ended December 31, 2022 increased compared to the prior year primarily due to acquisitions and construction conversions, including the acquisition of the Holiday Retirement portfolio on July 30, 2021 for a total purchase price of \$1.6 billion. Additionally, our Seniors Housing Operating revenues are dependent on occupancy, which has steadily increased during 2022. As of December 31, 2022, nearly all communities are open for new admissions and allowing visitors, in-person tours and communal dining activities. Average occupancy is as follows:

	Three Months Ended ⁽¹⁾			
	March 31,	June 30,	September 30,	December 31,
2021	72.7%	73.0%	74.9%	76.3%
2022	76.3%	77.1%	78.0%	78.3%

(1) Average occupancy includes our minority ownership share related to unconsolidated properties and excludes the minority partners’ noncontrolling ownership share related to consolidated properties. Also excludes land parcels and properties under development.

Effective on April 1, 2022, our leasehold interest relating to the master lease with National Health Investors, Inc. (“NHI”) for 17 properties assumed in conjunction with the Holiday Retirement acquisition was terminated as a result of the transition or sale of the properties by NHI. The lease termination was part of an agreement to resolve outstanding litigation with NHI. In conjunction with the agreement, a wholly owned subsidiary and the lessee on the master lease agreed to release \$6,883,000 of cash to the landlord, which represents the net cash flow generated from the properties since we assumed the leasehold interest. Additionally, in conjunction with the lease termination, during the year ended December 31, 2022 we recognized \$58,621,000 in other income on our Consolidated Statements of Comprehensive Income, from the derecognition of the right of use asset and related lease liability.

Property-level operating expenses associated with the COVID-19 pandemic relating to our Seniors Housing Operating portfolio totaled \$33,099,000, \$63,681,000 and \$110,719,000 for the years ended December 31, 2022, 2021 and 2020, respectively. These expenses were incurred as a result of public health measures and other regulations affecting our properties, as well as additional health and safety measures adopted by us and our operators related to the COVID-19 pandemic, including increases in labor and property cleaning expenses and expenditures related to our efforts to procure personal protective equipment (“PPE”) and supplies. We expect total Seniors Housing Operating expenses to remain elevated as certain of these additional health and safety measures have become standard practice.

We received government grants under the CARES Act primarily to cover increased expenses and lost revenue during the COVID-19 pandemic, as well as under similar programs in the U.K. and Canada. We recognized \$38,607,000, \$97,933,000 and \$31,927,000 during the years ended December 31, 2022, 2021 and 2020, respectively. These grants represent a reduction to property operating expenses in our Consolidated Statements of Comprehensive Income. Additionally, during the years ended December 31, 2021 and 2020, we recognized \$4,642,000 and \$3,014,000, respectively, of government grant income in other income in our Consolidated Statements of Comprehensive Income.

The following is a summary of our SSNOI at Welltower’s Share for the Seniors Housing Operating segment (dollars in thousands):

	QTD Pool				YTD Pool			
	Three Months Ended		Change		Year Ended		Change

SSNOI ⁽¹⁾	\$ 184,716	\$ 155,608	\$ 29,108	18.7%	\$ 610,724	\$ 548,872	\$ 61,852	11.3%

(1) Relates to 654 properties for the QTD Pool and 514 properties for the YTD Pool. Please see Non-GAAP Financial Measures for additional information and reconciliations.

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

During the year ended December 31, 2022, we recorded impairment charges of \$13,146,000 related to one held for sale property in which the carrying value exceeded the estimated fair value less costs to sell. During the year ended December 31, 2021, we recorded impairment charges of \$22,317,000 related to two held for sale properties in which the carrying value exceeded the estimated fair value. Transaction costs related to asset acquisitions are capitalized as a component of the purchase price. The fluctuation in other expenses is primarily due to the timing of noncapitalizable transaction costs associated with acquisitions and operator transitions. Changes in the gain on sales of properties are related to the volume and timing of property sales and the sales prices.

Depreciation and amortization fluctuates as a result of acquisitions, disposition and transitions. To the extent we acquire or dispose of additional properties in the future, our provision for depreciation and amortization will change accordingly.

During the year ended December 31, 2022, we completed six Seniors Housing Operating construction projects representing \$227,796,000 or \$333,035 per unit. The following is a summary of our consolidated Seniors Housing Operating construction projects, excluding expansions, pending as of December 31, 2022 (dollars in thousands):

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

Interest expense represents secured debt interest expense, which fluctuates based on the net effect and timing of assumptions, segment transitions, fluctuations in foreign currency rates, extinguishments and principal amortizations. The fluctuations in loss (gain) on extinguishment of debt is primarily attributable to the volume of extinguishments and terms of the related secured debt. The following is a summary of our Seniors Housing Operating segment property secured debt principal activity (dollars in thousands):

	Year Ended December 31, 2022		Year Ended December 31, 2021		Year Ended December 31, 2020	
	Amount	Weighted Avg. Interest Rate	Amount	Weighted Avg. Interest Rate	Amount	Weighted Avg. Interest Rate
Beginning balance	\$ 1,599,522	2.81%	\$ 1,706,189	3.05%	\$ 2,115,037	3.54%

Ending balance	<u>\$ 1,701,939</u>	<u>4.32%</u>	<u>\$ 1,599,522</u>	<u>2.81%</u>	<u>\$ 1,706,189</u>	<u>3.05%</u>
Monthly averages	\$ 1,637,810	3.43%	\$ 1,649,485	2.88%	\$ 1,875,910	3.19%

The majority of our Seniors Housing Operating properties are formed through partnership interests. Income from unconsolidated entities recognized during the year ended December 31, 2021 includes a gain recognized from the sale of a home health business owned by one of our unconsolidated entities. Net income attributable to noncontrolling interests represents our partners’ share of net income (loss) related to joint ventures. The decrease compared to the year ended December 31, 2021 relates primarily to our partners’ share of reserves for previously recognized straight-line receivables.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Triple-net

The following is a summary of our results of operations for the Triple-net segment for the years presented (dollars in thousands):

(1) See Non-GAAP Financial Measures below.

Rental income has increased primarily due to the timing of the establishment of reserves for straight-line rent receivable balances relating to leases for which collection of substantially all contractual lease payments is no longer deemed probable. During the year ended December 31, 2021, we recorded reserves for previously recognized straight-line rent receivables of \$49,241,000 which resulted in reduced rental income for the period. Offsetting the impact of straight-line changes, we have disposed of ten properties with a book value of \$89,827,000 during 2022 and 51 properties with a book value of \$486,369,000 during 2021.

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

Certain of our leases contain annual rental escalators that are contingent upon changes in the Consumer Price Index and/or changes in the gross operating revenues of the tenant’s properties. These escalators are not fixed, so no straight-line rent is recorded; however, rental income is recorded based on the contractual cash rental payments due for the period. If gross operating revenues at our facilities and/or the Consumer Price Index do not increase, a portion of our revenues may not continue to increase. For the year ended December 31, 2022, we had 50 leases with rental rate increasers ranging from 0.26% to 57.76% in our Triple-net portfolio. Our Triple-net operators are experiencing similar impacts on occupancy and operating costs due to the COVID-19 pandemic as described above with respect to our Seniors Housing Operating properties. Long-term/post-acute facilities have generally experienced a higher degree of occupancy declines, which in some cases impacted the ability of our Triple-net operators to make contractual rent payments to us. However, many of our Triple-net operators received funds under the CARES Act Paycheck Protection Program and Provider Relief Fund.

The increase to interest income during the year ended December 31, 2022 is primarily driven by interest recognized on senior loan financings of £540,000,000 made to affiliates of Safanad as part of the recapitalization of its investment in HC-One Group during the second quarter of 2021. Additionally, during the year ended December 31, 2021, we recognized a provision for loan losses under the current expected credit losses accounting standard, primarily related to the initial recognition of that loan. The provision for loan loss recognized during the year ended December 31, 2022 is primarily related to \$11,714,000 of specific reserves recognized on a held to maturity debt security, offset by the release of previously established allowances for credit losses due to loan repayments.

The following is a summary of our SSNOI at Welltower’s Share for the Triple-net segment (dollars in thousands):

	December 31, 2022	December 31, 2021	\$	%	December 31, 2022	December 31, 2021	\$	%
SSNOI ⁽¹⁾	\$ 127,296	\$122,059	\$5,237	4.3%	\$455,823	\$433,826	\$21,997	5.1%

(1) Relates to 427 properties for the QTD Pool and 398 properties for the YTD Pool. Please see Non-GAAP Financial Measures for additional information and reconciliations.

Depreciation and amortization fluctuate as a result of the acquisitions, dispositions and transitions of triple-net properties. To the extent we acquire or dispose of additional properties in the future, our provision for depreciation and amortization will change accordingly.

During the year ended December 31, 2022, we recorded impairment charges of \$3,595,000 related to two held for use properties. During the year ended December 31, 2021, we recorded impairment charges of \$26,579,000 related to four held for sale or sold properties and two held for use properties. Transaction costs related to asset acquisitions are capitalized as a component of purchase price. The fluctuation in other expenses is primarily due to noncapitalizable transaction costs from acquisitions and segment transitions. Changes in the gain on sales of properties are related to the volume and timing of property sales and the sales prices.

During the year ended December 31, 2022, there were no Triple-net construction projects completed; however, four projects transitioned out of the Triple-net segment and into the Seniors Housing Operating segment. Additionally, one project transitioned from consolidated to unconsolidated. The following is a summary of our consolidated Triple-net construction projects, excluding expansions, pending as of December 31, 2022 (dollars in thousands):

Location	Units/Beds	Commitment	Balance	Est. Completion
Raleigh	191	\$154,142	\$120,011	2Q23

During the years ended December 31, 2022 and 2021, loss (gain) on derivatives and financial instruments, net is primarily attributable to the mark-to-market of the equity warrants received as part of the Safanad/HC-One transaction that closed in the second quarter of 2021. In addition, the mark-to-market adjustment on our Genesis Healthcare available-for-sale investment is reflected in all periods.

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

Interest expense represents secured debt interest expense and related fees. The change in secured debt interest expense is due to the net effect and timing of assumptions, segment transitions, fluctuations in foreign currency rates, extinguishments and principal amortizations. The following is a summary of our Triple-net secured debt principal activity for the periods presented (dollars in thousands):

	<u>Year Ended December 31, 2022</u>		<u>Year Ended December 31, 2021</u>		<u>Year Ended December 31, 2020</u>	
	<u>Amount</u>	<u>Weighted Avg. Interest Rate</u>	<u>Amount</u>	<u>Weighted Avg. Interest Rate</u>	<u>Amount</u>	<u>Weighted Avg. Interest Rate</u>
Beginning balance	\$ 72,536	4.57%	\$123,652	4.91%	\$ 306,038	3.60%
Debt assumed	39,574	16.68%	—	—%	—	—%

Ending balance	<u>\$ 39,179</u>	<u>4.39%</u>	<u>\$ 72,536</u>	<u>4.57%</u>	<u>\$ 123,652</u>	<u>4.91%</u>
Monthly averages	\$ 39,584	4.39%	\$117,966	4.90%	\$ 215,796	3.85%

A portion of our Triple-net properties were formed through partnerships. Income or loss from unconsolidated entities represents our share of net income or losses from partnerships where we are the noncontrolling partner. The increase in income from unconsolidated entities during the year ended December 31, 2022 is primarily related to the write off of a right of use asset and related lease liability on an unconsolidated joint venture that was restructured during the year. Net income attributable to noncontrolling interests represents our partners’ share of net income relating to those partnerships where we are the controlling partner. The decrease in net income attributable to noncontrolling interests for the year ended December 31, 2022 compared to 2021 is related to the increase in ownership in existing Triple-net joint ventures.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Outpatient Medical

The following is a summary of our results of operations for the Outpatient Medical segment for the periods presented (dollars in thousands):

	Year Ended		One Year Change		Year Ended		One Year Change		Two Year Change

(1) See Non-GAAP Financial Measures below.

Rental income has increased due primarily to acquisitions and construction conversions that occurred during 2021 and 2022. Certain of our leases contain annual rental escalators that are contingent upon changes in the Consumer Price Index. These escalators are not fixed, so no straight-line rent is recorded; however, rental income is recorded based on the contractual cash rental payments due for the period. If the Consumer Price Index does not increase, a portion of our revenues may not continue to increase. Our leases could renew above or below current rental rates, resulting in an increase or decrease in rental income. For the year ended December 31, 2022, our consolidated Outpatient Medical portfolio signed 435,000 square feet of new leases and 1,826,000 square feet of renewals. The weighted-average term of these leases was seven years, with a rate of \$38.19 per square foot and tenant improvement and lease commission costs of \$26.77 per square foot. Substantially all of these leases contain an annual fixed or contingent escalation rent structure ranging from 1.0% to 7.0%.

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

The decrease in interest income for the year ended December 31, 2022 is due primarily to a \$178,207,000 first mortgage initiated in August 2020, which was subsequently repaid in full in June of 2021, resulting in the reversal of the previously established allowance for credit losses.

The fluctuation in property operating expenses and depreciation and amortization are primarily attributable to acquisitions and construction conversions that occurred during 2021 and 2022. To the extent that we acquire or dispose of additional properties in the future, these amounts will change accordingly.

The following is a summary of our SSNOI at Welltower Share for the Outpatient Medical segment (dollars in thousands):

	QTD Pool				YTD Pool			
	Three Months Ended		Change		Year Ended		Change	
	December 31, 2022	December 31, 2021	\$	%	December 31, 2022	December 31, 2021	\$	%
SSNOI ⁽¹⁾	\$107,867	\$105,260	\$2,607	2.5%	\$403,520	\$395,379	\$8,141	2.1%

(1) Relates to 361 properties for the QTD Pool and 349 properties for the YTD Pool. Please see Non-GAAP Financial Measures for additional information and reconciliations.

During the year ended December 31, 2022, we recognized an impairment charge of \$761,000 related to one held for use property. During the year ended December 31, 2021, we recognized an impairment charge of \$2,211,000 related to one held for sale property. Transaction costs related to asset acquisitions are capitalized as a component of purchase price. The fluctuation in other expenses is primarily due to noncapitalizable transaction costs. Changes in gains/losses on sales of properties are related to volume of property sales and the sales prices.

During the year ended December 31, 2022, we completed two Outpatient Medical construction projects representing \$44,778,000 or \$383 per square foot. The following is a summary of our consolidated Outpatient Medical construction projects, excluding expansions, pending as of December 31, 2022 (dollars in thousands):

Location	Square Feet	Commitment	Balance	Est. Completion
Houston	16,835	\$ 9,935	\$ 5,796	1Q23

Item 7. *Management's Discussion and Analysis of Financial Condition and Results of Operations*

The change in interest expense on senior unsecured notes is due to the net effect of issuances and extinguishments, as well as the movement in foreign exchange rates and related hedge activity. Please refer to Note 11 to the consolidated financial statements for additional information. The change in interest expense on our unsecured revolving credit facility and commercial paper program is due primarily to the net effect and timing of draws, paydowns and variable interest rate changes. Please refer to Note 10 of our consolidated financial statements for additional information. Loan expenses represent the amortization of costs incurred in connection with senior unsecured notes issuances. The loss on extinguishment recognized during the year ended December 31, 2021 is due primarily to the early extinguishment of \$339,128,000 of our 3.75% senior unsecured notes due March 2023 and \$334,624,000 of our 3.95% senior unsecured notes due September 2023.

General and administrative expenses as a percentage of consolidated revenues for the years ended December 31, 2022, 2021 and 2020 were 2.57%, 2.67% and 2.79%, respectively. Other expenses includes non-capitalizable legal expenses, including related to our umbrella partnership REIT reorganization during 2022. The provision for income taxes primarily relates to state taxes, foreign taxes and taxes based on income generated by entities that are structured as TRSs.

Other

Non-GAAP Financial Measures

We believe that net income and net income attributable to common stockholders, as defined by U.S. GAAP, are the most appropriate earnings measurements. However, we consider FFO, NOI, SSNOI, EBITDA and Adjusted EBITDA to be useful supplemental measures of our operating performance. Historical cost accounting for real estate assets in accordance with U.S. GAAP implicitly assumes that the value of real estate assets diminishes predictably over time as evidenced by the provision for depreciation. However, since real estate values have historically risen or fallen with market conditions, many industry investors and analysts have considered presentations of operating results for real estate companies that use historical cost accounting to be insufficient. In response, the National Association of Real Estate Investment Trusts ("NAREIT") created funds from operations attributable to common stockholders ("FFO") as a supplemental measure of operating performance for REITs that excludes historical cost depreciation from net income. FFO, as defined by NAREIT, means NICS, computed in accordance with U.S. GAAP, excluding gains (or losses) from sales of real estate and impairment of depreciable assets, plus depreciation and amortization, and after adjustments for unconsolidated entities and noncontrolling interests.

NOI is used to evaluate the operating performance of our properties. We define NOI as total revenues, including tenant reimbursements, less property operating expenses. Property operating expenses represent costs associated with managing, maintaining and servicing tenants for our properties. These expenses include, but are not limited to, property-related payroll and benefits, property management fees paid to operators, marketing, housekeeping, food service, maintenance, utilities, property taxes and insurance. General and administrative expenses represent general overhead costs that are unrelated to property operations and unallocable to the properties. These expenses include, but are not limited to, payroll and benefits related to corporate employees, professional services, office expenses and depreciation of corporate fixed assets. Same store NOI ("SSNOI") is used to evaluate the operating performance of our properties using a consistent population which controls for changes in the composition of our portfolio. We believe the drivers of property level NOI for both consolidated properties and unconsolidated properties are generally the same and therefore, we evaluate SSNOI based on our ownership interest in each property ("Welltower Share"). To arrive at Welltower's Share, NOI is adjusted by adding our minority ownership share related to unconsolidated properties and by subtracting the minority partners' noncontrolling ownership interests for consolidated properties. We do not control investments in unconsolidated properties and while we consider disclosures at Welltower Share to be useful, they may not accurately depict the legal and economic implications of our joint venture arrangements and should be used with caution. As used herein, same store is generally defined as those revenue-generating properties in the portfolio for the relevant year-over-year reporting periods. Acquisitions and development conversions are included in SSNOI five full quarters or eight full quarters after acquisition or being placed into service for the QTD Pool and

Item 7. *Management's Discussion and Analysis of Financial Condition and Results of Operations*

the YTD Pool, respectively. Land parcels, loans and sub-leases, as well as any properties sold or classified as held for sale during the respective periods are excluded from SSNOI. Redeveloped properties (including major refurbishments of a Seniors Housing Operating property where 20% or more of units are simultaneously taken out of commission for 30 days or more or Outpatient Medical properties undergoing a change in intended use) are excluded from SSNOI until five full quarters or eight full quarters post completion of the redevelopment for the QTD Pool and YTD Pool, respectively. Properties undergoing operator transitions and/or segment transitions are also excluded from SSNOI until five full quarters or eight full quarters post completion of the transition for the QTD Pool and YTD Pool, respectively. In addition, properties significantly impacted by force majeure, acts of God, or other extraordinary adverse events are excluded from SSNOI until five full quarters or eight full quarters after the properties are placed back into service for the QTD Pool and YTD Pool, respectively. SSNOI excludes non-cash NOI and includes adjustments to present consistent ownership percentages and to translate Canadian properties and U.K. properties using a consistent exchange rate. We believe NOI and SSNOI provide investors relevant and useful information because they measure the operating performance of our properties at the property level on an unleveraged basis. We use NOI and SSNOI to make decisions about resource allocations and to assess the property level performance of our properties.

EBITDA is defined as earnings (net income) before interest, taxes, depreciation and amortization. Adjusted EBITDA is defined as EBITDA excluding unconsolidated entities and including adjustments for stock-based compensation expense, provision for loan losses, gains/losses on extinguishment of debt, gains/loss/impairments on properties, gains/losses on derivatives and financial instruments, other expenses, other impairment charges and other adjustments as deemed appropriate. We believe that EBITDA and Adjusted EBITDA, along with net income, are important supplemental measures because they provide additional information to assess and evaluate the performance of our operations. We primarily use these measures to determine our interest coverage ratio, which represents EBITDA and Adjusted EBITDA divided by total interest, and our fixed charge coverage ratio, which represents EBITDA and Adjusted EBITDA divided by fixed charges. Fixed charges include total interest and secured debt principal amortization. Covenants in our unsecured senior notes and primary credit facility contain financial ratios based on a definition of EBITDA and Adjusted EBITDA that is specific to those agreements. Our leverage ratios are defined as the proportion of net debt to total capitalization and include book capitalization, undepreciated book capitalization and market capitalization. Book capitalization represents the sum of net debt (defined as total long-term debt, excluding operating lease liabilities, less cash and cash equivalents and restricted cash), total equity and redeemable noncontrolling interests. Undepreciated book capitalization represents book capitalization adjusted for accumulated depreciation and amortization. Market capitalization represents book capitalization adjusted for the fair market value of our common stock.

Our supplemental reporting measures and similarly entitled financial measures are widely used by investors, equity and debt analysts and rating agencies in the valuation, comparison, rating and investment recommendations of companies. Management uses these financial measures to facilitate internal and external comparisons to our historical operating results and in making operating decisions. Additionally, these measures are utilized by the Board of Directors to evaluate management. None of our supplemental measures represent net income or cash flow provided from operating activities as determined in accordance with U.S. GAAP and should not be considered as alternative measures of profitability or liquidity. Finally, the supplemental measures, as defined by us, may not be comparable to similarly entitled items reported by other real estate investment trusts or other companies.

The table below reflects the reconciliation of FFO to NICS, the most directly comparable U.S. GAAP measure, for the periods presented. Noncontrolling interest and unconsolidated entity amounts represent adjustments to reflect our share of depreciation and amortization, gains/loss on real estate dispositions and impairment of assets. Amounts are in thousands except for per share data.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

	Year Ended December 31,		
	2022	2021	2020
FFO Reconciliation:

Adjusted fixed charge coverage ratio	3.56x	3.43x	3.54x

(1) Represents revenues and property operating expenses associated with a leasehold portfolio interest relating to 26 properties assumed by a wholly-owned affiliate in conjunction with the Holiday Retirement transaction. Subsequent to the initial transaction, we purchased eight of the leased properties and one of the properties was sold by the landlord and removed from the lease. No rent was paid in excess of net cash flow relating to the leasehold properties and therefore, the net impact has been excluded from Adjusted EBITDA. Additionally, in conjunction with the lease termination, during the year ended December 31, 2022, we recognized \$58,621,000 in other income from the derecognition of the right of use asset and related lease liability which has also been excluded from Adjusted EBITDA.

(2) Represents the changes in the reserve for straight-line rent receivables balances relating to leases placed on cash recognition.

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

Our leverage ratios include book capitalization, undepreciated book capitalization and market capitalization. Book capitalization represents the sum of net debt (defined as total long-term debt less cash and cash equivalents and restricted cash), total equity and redeemable noncontrolling interests. Undepreciated book capitalization represents book capitalization adjusted for accumulated depreciation and amortization. Market capitalization represents book capitalization adjusted for the fair market value of our common stock. Our leverage ratios are defined as the proportion of net debt to total capitalization. The table below reflects the reconciliation of our leverage ratios to our balance sheets for the periods presented. Amounts are in thousands, except share price.

	Year Ended December 31,		
	2022	2021	2020

Net debt to market capitalization ratio	<u>29.5%</u>	<u>25.9%</u>	<u>29.6%</u>

(1) Amounts include senior unsecured notes, secured debt and lease liabilities related to finance leases, as reflected on our Consolidated Balance Sheets. Operating lease liabilities related to the ASC 842 adoption are excluded.

(2) Includes amounts attributable to both redeemable noncontrolling interests and noncontrolling interests as reflected on our Consolidated Balance Sheets.

Item 7. *Management's Discussion and Analysis of Financial Condition and Results of Operations*

Critical Accounting Policies & Estimates

Our consolidated financial statements are prepared in accordance with U.S. GAAP, which requires us to make estimates and assumptions. Management considers an accounting estimate or assumption critical if:

- the nature of the estimates or assumptions is material due to the levels of subjectivity and judgment necessary to account for highly uncertain matters or the susceptibility of such matters to change; and
- the impact of the estimates and assumptions on financial condition or operating performance is material.

Management has discussed the development and selection of its critical accounting policies and estimates with the Audit Committee of the Board of Directors. Management believes the current assumptions and other considerations used to estimate amounts reflected in our consolidated financial statements are appropriate and are not reasonably likely to change in the future. However, since these estimates require assumptions to be made that were uncertain at the time the estimate was made, they bear the risk of change. If actual experience differs from the assumptions and other considerations used in estimating amounts reflected in our consolidated financial statements, the resulting changes could have a material adverse effect on our consolidated results of operations, liquidity and/or financial condition. Please refer to Note 2 to our consolidated financial statements for further information on significant accounting policies that impact us and for the impact of new accounting standards, including accounting pronouncements that were issued but not yet adopted by us.

The following table presents information about our critical accounting policies and estimates:

<u>Nature of Critical Accounting Estimate</u>	<u>Assumptions/ Approach Used</u>
<u><i>Impairment of Real Property</i></u> Assessing impairment of real property involves subjectivity in determining if indicators of impairment are present and in estimating the future undiscounted cash flows or estimated fair value of an asset. In estimating the undiscounted cash flows or fair value, key assumptions that would be made are the estimation of future rental revenues, operating expenses, capitalization rates and the ability and intent to hold the respective asset, all of which are affected by our expectations of future market or economic conditions. These estimates can have a significant impact on the undiscounted cash flows or estimated fair value of an asset.	Quarterly, we evaluate our real estate investments on a property by property basis to determine if there are indicators of impairment. These indicators may include expected operational performance, the tenant's ability to make rent payments, a decision to dispose of an asset before the end of its estimated useful life and changes in the market that may permanently reduce the value of the property. If indicators of impairment exist, an undiscounted cash flow analysis will be prepared to determine if the value of the real property will be recoverable. If the real property will not be recoverable, the carrying value of the property is reduce to its estimated fair value and an impairment charge is recognized for the difference between the carrying value and the fair value. This analysis requires us to use judgment in determining whether indicators of impairment exist and to estimate the expected future undiscounted cash flows or estimated fair values of the property. Properties that meet the held for sale criteria are recorded at the lesser of the fair value less costs to sell or carrying value. At December 31, 2022, our net real property owned was approximately \$32,925,033,000. During the year ended December 31, 2022, we recorded impairment charges of \$13,146,000 related to one Seniors Housing Operating property which was classified as held for sale for which the carrying values exceeded the fair values less costs to sell. Additionally, we recorded \$4,356,000 of impairment charges related to two Triple-net properties and one Outpatient Medical property that were held for use in which the carrying values exceeded the estimated fair values.

Item 7. *Management's Discussion and Analysis of Financial Condition and Results of Operations*

<u>Nature of Critical Accounting Estimate</u>	<u>Assumptions/ Approach Used</u>
<p><u>Real Estate Acquisitions</u></p> <p>We believe that substantially all of our real estate acquisitions are considered asset acquisitions for which we record the related real estate acquired (tangible assets and identifiable intangible assets and liabilities) at cost on a relative fair value basis. Liabilities assumed and any associated noncontrolling interests are reflected at fair value. Tangible assets consist primarily of land, building and improvements. Identifiable intangible assets and liabilities primarily consist of the above or below market component of in-place leases and the value of in-place leases. The total amount of other intangible assets acquired is further allocated to in-place lease values and customer relationship values based on management's evaluation of the specific characteristics of each tenant's lease and our overall relationship with respect to that tenant.</p>	<p>The allocation of the purchase price to the related real estate acquired (tangible assets and intangible assets and liabilities) involves subjectivity as such allocations are based on a relative fair value analysis. In determining the fair values that drive such analysis, we estimate the fair value of each component of the real estate acquired which generally includes land, buildings and improvements, the above or below market component of in-place leases and the value of in-place leases. Significant assumptions used to determine such fair values include comparable land sales, capitalization rates, discount rates, market rental rates and property operating data, all of which can be impacted by expectations about future market or economic conditions. Our estimates of the values of these components affect the amount of depreciation and amortization we record over the estimated useful life of the property or the term of the lease.</p> <p>During the year ended December 31, 2022, we completed \$2,306,020,000 of real estate acquisitions. These transactions were accounted for as asset acquisitions and the purchase price of each was allocated based on the relative fair values of the assets acquired and liabilities assumed.</p>
<p><u>Principles of Consolidation</u></p> <p>The consolidated financial statements include our accounts, the accounts of our wholly-owned subsidiaries, and the accounts of joint venture entities in which we own a majority voting interest with the ability to control operations and where no substantive participating rights or substantive kick out rights have been granted to the noncontrolling interests. In addition, we consolidate those entities deemed to be variable interest entities ("VIEs") in which we are determined to be the primary beneficiary. All material intercompany transactions and balances have been eliminated in consolidation.</p>	<p>We make judgments about which entities are VIEs based on an assessment of whether (i) the equity investors as a group, if any, do not have a controlling financial interest, or (ii) the equity investment at risk is insufficient to finance that entity's activities without additional subordinated financial support. We make judgments with respect to our level of influence or control of an entity and whether we are (or are not) the primary beneficiary of a VIE. Consideration of various factors include, but is not limited to, our ability to direct the activities that most significantly impact the entity's economic performance, our form of ownership interest, our representation on the entity's governing body, the size and seniority of our investment, our ability and the rights of other investors to participate in policy making decisions, replace the manager and/or liquidate the entity, if applicable. Our ability to correctly assess our influence or control over an entity at inception of our involvement or on a continuous basis when determining the primary beneficiary of a VIE affects the presentation of these entities in our consolidated financial statements. If we perform a primary beneficiary analysis at a date other than at inception of the VIE, our assumptions may be different and may result in the identification of a different primary beneficiary.</p>
<p><u>Allowance for Credit Losses on Loans Receivable</u></p> <p>The allowance for credit losses is maintained at a level believed adequate to absorb potential losses in our loans receivable. The determination of the credit allowance is based on a quarterly evaluation of all outstanding loans, including general economic conditions and estimated collectability of loan payments.</p>	<p>The determination of the allowance for credit losses is based on a quarterly evaluation of all outstanding loans, including general economic conditions and estimated collectability of loan payments. We evaluate the collectability of our loans receivable based on a combination of factors, including, but not limited to, payment status, historical loan charge-offs, financial strength of the borrower and guarantors, and nature, extent and value of the underlying collateral. A loan is considered to have deteriorated credit quality when, based on current information and events, it is probable that we will be unable to collect all amounts due as scheduled according to the contractual terms of the loan agreement. For those loans we identified as having deteriorated credit quality, we determine the amount of credit loss on an individual basis. Placement on non-accrual status may be required. Consistent with this definition, all loans on nonaccrual are deemed to have deteriorated credit quality. To the extent circumstances improve and the risk of collectability is diminished, we may return these loans to income accrual status. While a loan is on non-accrual status, any cash receipts are applied against the outstanding principal balance. For the remaining loans, we assess credit loss on</p>

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

Assumptions/ Approach Used

a collective pool basis and use our historical loss experience for similar loans to determine the reserve for credit losses.

During the year ended December 31, 2022, we recognized provision for loan losses of \$10,320,000, which includes a specific reserve for a Triple-net held to maturity debt security, offset by changes in the reserve based on our historical loss experience.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to various market risks, including the potential loss arising from adverse changes in interest rates and foreign currency exchange rates. We seek to mitigate the underlying foreign currency exposures with gains and losses on derivative contracts hedging these exposures. We seek to mitigate the effects of fluctuations in interest rates by matching the terms of new investments with new long-term fixed rate borrowings to the extent possible. We may or may not elect to use financial derivative instruments to hedge interest rate exposure. These decisions are principally based on our policy to match our variable rate investments with comparable borrowings, but are also based on the general trend in interest rates at the applicable dates and our perception of the future volatility of interest rates. This section is presented to provide a discussion of the risks associated with potential fluctuations in interest rates and foreign currency exchange rates. For more information, see Notes 12 and 17 to our consolidated financial statements.

We historically borrow on our unsecured revolving credit facility and commercial paper program to acquire, construct or make loans relating to health care and seniors housing properties. Then, as market conditions dictate, we will issue equity or long-term fixed rate debt to repay the borrowings under our unsecured revolving credit facility and commercial paper program. We are subject to risks associated with debt financing, including the risk that existing indebtedness may not be refinanced or that the terms of refinancing may not be as favorable as the terms of current indebtedness. The majority of our borrowings were completed under indentures or contractual agreements that limit the amount of indebtedness we may incur. Accordingly, in the event that we are unable to raise additional equity or borrow money because of these limitations, our ability to acquire additional properties may be limited.

A change in interest rates will not affect the interest expense associated with our fixed rate debt. Interest rate changes, however, will affect the fair value of our fixed rate debt. Changes in the interest rate environment upon maturity of this fixed rate debt could have an effect on our future cash flows and earnings, depending on whether the debt is replaced with other fixed rate debt, variable rate debt or equity or repaid by the sale of assets. To illustrate the impact of changes in the interest rate markets, we performed a sensitivity analysis on our fixed rate debt instruments after considering the effects of interest rate swaps, whereby we modeled the change in net present values arising from a hypothetical 1% increase in interest rates to determine the instruments’ change in fair value. The following table summarizes the analysis performed as of the dates indicated (in thousands):

	December 31, 2022		December 31, 2021	
	Principal balance	Change in fair value	Principal balance	Change in fair value
Senior unsecured notes	\$10,839,782	\$(488,159)	\$11,002,297	\$(1,059,031)
Secured debt	1,448,567	(36,654)	1,490,708	(44,222)
Totals	<u>\$12,288,349</u>	<u>\$(524,813)</u>	<u>\$12,493,005</u>	<u>\$(1,103,253)</u>

Our variable rate debt, including our unsecured revolving credit facility and commercial paper program, is reflected at fair value. At December 31, 2022, we had \$2,426,134,000 outstanding related to our variable rate debt after considering the effects of interest rate swaps. Assuming no changes in outstanding balances, a 1% increase in interest rates would result in increased annual interest expense of \$24,261,000. At December 31, 2021, we had \$1,742,268,000 of outstanding variable rate debt. Assuming no changes in outstanding balances, a 1% increase in interest rates would have resulted in increased annual interest expense of \$17,423,000.

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

We are subject to currency fluctuations that may, from time to time, affect our financial condition and results of operations. Increases or decreases in the value of the Canadian Dollar or British Pounds Sterling relative to the U.S. Dollar impact the amount of net income we earn from our investments in Canada and the United Kingdom. Based solely on our results for the year ended December 31, 2022, including the impact of existing hedging arrangements, if these exchange rates were to increase or decrease by 10%, our net income from these investments would increase or decrease, as applicable, by less than \$8,000,000. We will continue to mitigate these underlying foreign currency exposures with non-U.S. denominated borrowings and gains and losses on derivative contracts. If we increase our international presence through investments in, or acquisitions or development of, seniors housing and health care properties outside the U.S., we may also decide to transact additional business or borrow funds in currencies other than U.S. Dollars, Canadian Dollars or British Pounds Sterling. To illustrate the impact of changes in foreign currency markets, we performed a sensitivity analysis on our derivative portfolio whereby we modeled the change in net present values arising from a hypothetical 1% increase in foreign currency exchange rates to determine the instruments’ change in fair value. The following table summarizes the results of the analysis performed (dollars in thousands):

	December 31, 2022		December 31, 2021	
	Carrying value	Change in fair value	Carrying value	Change in fair value
Foreign currency exchange contracts	\$ 190,418	\$14,238	\$ 32,280	\$19,740
Debt designated as hedges	1,452,832	14,528	1,613,164	16,132
Totals	<u>\$1,643,250</u>	<u>\$28,766</u>	<u>\$1,645,444</u>	<u>\$35,872</u>

Item 8. *Financial Statements and Supplementary Data*

Report of Independent Registered Public Accounting Firm

To the Stockholders and the Board of Directors of Welltower Inc.

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Welltower Inc. and subsidiaries (the Company) as of December 31, 2022 and 2021, the related consolidated statements of comprehensive income, equity and cash flows for each of the three years in the period ended December 31, 2022, and the related notes and financial statement schedules listed in the Index at Item 15(a) (collectively referred to as the “consolidated financial statements”). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company at December 31, 2022 and 2021 and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2022, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company’s internal control over financial reporting as of December 31, 2022, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) and our report dated February 21, 2023 expressed an unqualified opinion thereon.

Basis for Opinion

These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on the Company’s financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matters

The critical audit matters communicated below are matters arising from the current period audit of the financial statements that were communicated or required to be communicated to the audit committee and that: (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

Impairment of Real Property

Description of the Matter

At December 31, 2022, the Company's net real property owned was approximately \$32.9 billion. As discussed in Note 2 to the consolidated financial statements, the Company reviews its real property quarterly on a property-by-property basis to determine if facts and circumstances suggest that the real property may be impaired. If the undiscounted cash flows indicate that the real property will not be recoverable, the carrying value of the real property is reduced to its estimated fair value and an impairment charge is recognized for the difference between the carrying value and the fair value.

Auditing the Company's process to evaluate real property owned for impairment was complex due to the high degree of subjectivity in determining whether indicators of impairment were present for certain properties, and in determining the future undiscounted cash flows and estimated fair values, if necessary, of properties where indicators of impairment were determined to be present. In particular, the undiscounted cash flows and fair value estimates were sensitive to significant assumptions, including future rental revenues and operating expenses, capitalization rates, and anticipated hold period, which are affected by expectations about future market or economic conditions.

How We Addressed the Matter in Our Audit

We obtained an understanding, evaluated the design, and tested the operating effectiveness of controls over the Company's process to evaluate real property owned for impairment. This included testing controls over the Company's review of impairment indicators by property and management's review and approval of the significant assumptions described above.

To test the Company's evaluation of real property for impairment, we performed audit procedures that included, among others, assessing the methodologies used by management, evaluating the significant assumptions discussed above and testing the completeness and accuracy of the underlying data used by the Company in its analyses. We compared the significant assumptions used by management to current industry and economic trends and evaluated whether changes to the Company's business and other relevant factors would affect the significant assumptions. In addition, we assessed the historical accuracy of the Company's estimates and performed sensitivity analyses of the significant assumptions to evaluate the changes in the undiscounted future cash flows and estimated fair values of the property that would result from changes in the significant assumptions.

Real Estate Acquisitions

Description of the Matter

During the year ended December 31, 2022, the Company completed approximately \$2.3 billion of real estate acquisitions. As disclosed in Note 3 of the consolidated financial statements, the total purchase price for all properties acquired has been allocated to the related real estate acquired (tangible assets and identifiable intangible assets and liabilities) based upon their relative fair values.

Auditing the fair values allocated by management to the real estate acquired was complex because the fair value estimates were sensitive to significant assumptions, including comparable land sales, capitalization rates, discount rates, market rental rates and property operating data, which can be impacted by expectations about future market or economic conditions.

How We Addressed the Matter in Our Audit

We obtained an understanding, evaluated the design, and tested the operating effectiveness of controls over the Company's process to account for real estate acquisitions, including controls over the Company's review of the significant assumptions discussed above.

To test the fair values allocated to the real estate acquired, we performed audit procedures that included, among others, assessing the methodologies used by management and evaluating the significant assumptions used by the Company discussed above. We compared certain of management's assumptions to external market data for similar properties and tested the clerical accuracy of the valuation models. We involved our valuation specialist in our evaluation of the significant assumptions used by the Company and the review of the valuation models.

/s/ Ernst & Young LLP

We have served as the Company's auditor since 1970.

WELLTOWER INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Business

Welltower Inc., an S&P 500 company headquartered in Toledo, Ohio, is driving the transformation of health care infrastructure. We invest with leading seniors housing operators, post-acute providers and health systems to fund the real estate and infrastructure needed to scale innovative care delivery models and improve people's wellness and overall health care experience. Welltower Inc., a real estate investment trust ("REIT"), owns interests in properties concentrated in major, high-growth markets in the United States ("U.S."), Canada and the United Kingdom ("U.K."), consisting of seniors housing and post-acute communities and outpatient medical properties.

As of May 24, 2022, we are structured as an umbrella partnership REIT under which substantially all of our business is conducted through Welltower OP LLC, the day-to-day management of which is exclusively controlled by Welltower Inc. For additional information on the UPREIT reorganization, please see our Current Reports on Form 8-K filed with the SEC on March 7, 2022, April 1, 2022 and May 25, 2022. Unless stated otherwise or the context otherwise requires, references to "Welltower" mean Welltower Inc. and references to "Welltower OP" mean Welltower OP LLC. References to "we," "us" and "our" mean collectively Welltower, Welltower OP and those entities/subsidiaries owned or controlled by Welltower and/or Welltower OP. Welltower's weighted average ownership in Welltower OP was 99.855% during the period ended December 31, 2022. As of December 31, 2022, Welltower owned 99.751% of the issued and outstanding units of Welltower OP, with other investors owning the remaining 0.249% of outstanding units. We adjust the noncontrolling members' interest at the end of each period to reflect their interest in the net assets of Welltower OP.

2. Accounting Policies and Related Matters

Use of Estimates

The preparation of the consolidated financial statements in conformity with U.S. generally accepted accounting principles ("U.S. GAAP") requires us to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Actual results could differ from those estimates.

Principles of Consolidation

The consolidated financial statements include the accounts of our wholly-owned subsidiaries and joint venture entities that we control, through voting rights or other means. All material intercompany transactions and balances have been eliminated in consolidation. At inception of transactions, we identify entities for which control is achieved through means other than voting rights ("variable interest entities" or "VIEs") and determine which business enterprise is the primary beneficiary of its operations. A VIE is broadly defined as an entity where either (i) the equity investors as a group, if any, do not have a controlling financial interest, or (ii) the equity investment at risk is insufficient to finance that entity's activities without additional subordinated financial support. We consolidate investments in VIEs when we are determined to be the primary beneficiary. Accounting Standards Codification Topic 810, Consolidations ("ASC 810"), requires enterprises to perform a qualitative approach to determining whether or not a VIE will need to be consolidated. This evaluation is based on an enterprise's ability to direct and influence the activities of a VIE that most significantly impact that entity's economic performance and the rights held by limited partners or non-managing members.

Revenue Recognition

For our Triple-net and Outpatient Medical segments, a significant source of our revenue is generated through leasing arrangements and accounted for under ASC 842, Leases ("ASC 842"). Leases with fixed annual rental escalators are generally recognized on a straight-line basis over the initial lease period, subject to a

WELLTOWER INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

collectability assessment. Rental income related to leases with contingent rental escalators is generally recorded based on the contractual cash rental payments due for the period. Leases in our Outpatient Medical portfolio typically include some form of operating expense reimbursement by the tenant. Certain payments made to operators are treated as lease incentives and amortized as a reduction of revenue over the lease term.

For our Seniors Housing Operating segment, revenue from resident fees and services is predominantly service-based, and generally is recognized monthly as services are provided under ASC 606, Revenue from Contracts with Customers. Agreements with residents generally have varying terms and are cancellable by the resident with 30 days' notice. Within that reportable segment, we also recognize revenue from residential seniors apartment leases in accordance with ASC 842. Management contracts are present in some of our joint venture agreements to provide asset and property management, leasing, marketing and other services and are recognized monthly as services are provided.

Our Seniors Housing Operating segment also contains continuing care retirement communities, which operate as entrance fee communities. The entrance fee communities offer different contracts which vary in terms of how much of the entrance fee is considered to be refundable upon move-out, temporarily refundable until a period of time has passed, or nonrefundable. Refundable entrance fees are recorded as a payable within the accrued expenses and other liabilities line item of our Consolidated Balance Sheets. Nonrefundable entrance fees are recorded as deferred revenue within the same line item and are recognized into revenue over the estimated remaining stay of the resident. We use a third party actuarial expert to determine the estimated remaining stay of each resident based on demographic data.

Interest income on loans is recognized as earned based upon the principal amount outstanding, subject to an evaluation of collectability risk.

We recognize gains on the disposition of real estate when control transfers to the buyer, generally when consideration and title are exchanged and the risks and rewards of ownership transfer. We recognize losses from dispositions of real estate when known.

Cash and Cash Equivalents

Cash and cash equivalents consist of all highly liquid investments with an original maturity of three months or less.

Restricted Cash

Restricted cash primarily consists of amounts held by lenders to provide future payments for real estate taxes, insurance, tenant and capital improvements, amounts held in escrow relating to transactions we are entitled to receive over a period of time as outlined in the escrow agreement and net proceeds from property sales that were executed as tax-deferred dispositions under Internal Revenue Code ("IRC") Section 1031.

Deferred Loan Expenses

Deferred loan expenses are costs incurred by us in connection with the issuance, assumption and amendments of debt arrangements. Deferred loan expenses related to debt instruments, excluding the primary unsecured credit facility, are recorded as a reduction of the related debt liability. Deferred loan expenses related to the primary unsecured credit facility are included in receivables and other assets. We amortize these costs over the term of the debt using the straight-line method, which approximates the effective interest method.

Investments in Unconsolidated Entities

Investments in entities that we do not consolidate but have the ability to exercise significant influence over operating and financial policies are reported under the equity method of accounting. Under the equity method,

WELLTOWER INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

our share of the investee's earnings or losses is included in our consolidated results of operations. The initial carrying value of investments in unconsolidated entities is based on the amount paid to purchase the entity interest inclusive of transaction costs. To the extent that our cost basis is different from the basis reflected at the entity level, the basis difference is generally amortized over the lives of the related assets and liabilities, and such amortization is included in our share of equity in earnings of the entity. For earnings of equity method investments with pro rata distribution allocations, net income or loss is allocated between the partners in the joint venture based upon their respective stated ownership. In other instances, net income or loss may be allocated between the partners in the joint venture based on the hypothetical liquidation at book value method ("HLBV method"). Under the HLBV method, we recognize income and loss in each period based on the change in liquidation proceeds we would receive from a hypothetical liquidation of the underlying investment at book value.

We evaluate our equity method investments for impairment based upon a comparison of the estimated fair value of the equity method investment to its carrying value. When we determine a decline in the estimated fair value of such an investment below its carrying value is other-than-temporary, an impairment is recorded.

Equity Securities

Equity securities are measured at fair value with gains and losses recognized in loss (gain) on derivatives and financial instruments, net in the Consolidated Statements of Comprehensive Income.

Welltower OP Noncontrolling Interests

Members of Welltower OP other than Welltower have the right under the limited liability company agreement to redeem their Class A Common Units ("OP Units") for shares of Welltower common stock or cash, at Welltower's sole discretion, as the initial member. Accordingly, we classify the non-Welltower OP Units held by such other members in permanent equity because Welltower may elect to issue shares of Welltower common stock to the non-Welltower members who choose to redeem their OP Units rather than using cash.

Redeemable Noncontrolling Interests

Certain noncontrolling interests are redeemable at fair value. Accordingly, we record the carrying amount of the noncontrolling interests at the greater of (i) the initial carrying amount, increased or decreased for the noncontrolling interest's share of net income or loss and its share of other comprehensive income or loss, and dividends or (ii) the redemption value. If the interests are redeemable in the future, we accrete the carrying value to the redemption value over the period until expected redemption, currently a weighted-average period of approximately four years. In accordance with ASC 810, the redeemable noncontrolling interests are classified outside of permanent equity, as a mezzanine item, on the balance sheet. At December 31, 2022, the current redemption value of redeemable noncontrolling interests exceeded the carrying value of \$384,443,000 by \$65,575,000.

We entered into certain DownREIT partnerships which give a real estate seller the ability to exchange its property on a tax deferred basis for equity membership interests ("DownREIT Units"). The DownREIT Units may be redeemed any time following the first anniversary of the date of issuance at the election of the holders for one share of our common stock per unit or, at our option, cash.

Real Property Owned

Real estate acquisitions are generally classified as asset acquisitions for which we record tangible assets and identifiable intangible assets and liabilities at cost on a relative fair value basis. Liabilities assumed and any associated noncontrolling interests are reflected at fair value. Tangible assets primarily consist of land, buildings and improvements.

WELLTOWER INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Identifiable intangible assets and liabilities consist primarily of the above or below market component of in-place leases and the value associated with the presence of in-place leases. The value allocable to the above or below market component of the acquired in-place lease is determined based upon the present value (using a discount rate which reflects the risks associated with the acquired leases) of the difference between (i) the contractual amounts to be paid pursuant to the lease over its remaining term, and (ii) management's estimate of the amounts that would be paid using fair market rates over the remaining term of the lease. The amounts allocated to above market leases are included in acquired lease intangibles and below market leases are included in other liabilities on the balance sheet and are amortized to rental income over the remaining terms of the respective leases or lease-up period.

The total amount of other intangible assets acquired is further allocated to in-place lease values and customer relationship values for in-place tenants based on management's evaluation of the specific characteristics of each tenant's lease and our overall relationship with that respective tenant. Characteristics considered by management in allocating these values include the nature and extent of our existing business relationships with the tenant, growth prospects for developing new business with the tenant, the tenant's credit quality and expectations of lease renewals, among other factors. The total amount of other intangible assets acquired is further allocated to in-place lease values for in-place residents with such value representing (i) value associated with lost revenue related to tenant reimbursable operating costs that would be incurred in an assumed re-leasing period, and (ii) value associated with lost rental revenue from existing leases during an assumed re-leasing period. This intangible asset is amortized over the remaining life of the lease or the assumed re-leasing period.

Real property developed by us is recorded at cost, including the capitalization of construction period interest. These properties are depreciated on a straight-line basis over their estimated useful lives which range from 15 to 40 years for buildings and 5 to 15 years for improvements. We consider costs incurred in conjunction with re-leasing properties, including tenant improvements and lease commissions, to represent the acquisition of productive assets and, accordingly, such costs are reflected as investment activities in our Consolidated Statement of Cash Flows.

The net book value of long-lived assets is reviewed quarterly on a property by property basis to determine if facts and circumstances suggest that the assets may be impaired or that the depreciable life may need to be changed. We consider external factors relating to each asset and the existence of a master lease which may link the cash flows of an individual asset to a larger portfolio of assets leased to the same tenant. If these factors and the projected undiscounted cash flows of the assets over the remaining depreciation period indicate that the assets will not be recoverable, the carrying value is reduced to the estimated fair market value. In addition, we are exposed to the risks inherent in concentrating investments in real estate, and in particular, the seniors housing and health care industries. A downturn in the real estate industry could adversely affect the value of our properties and our ability to sell properties for a price or on terms acceptable to us. Additionally, properties that meet the held for sale criteria are recorded at the lesser of fair value less costs to sell or the carrying value.

Expenditures for repairs and maintenance are expensed as incurred.

Capitalization of Construction Period Interest

We capitalize interest costs associated with funds used for the construction of properties owned by us. The amount capitalized is based upon the balance outstanding during the construction period using the rate of interest which approximates our company-wide cost of financing. Our interest expense reflected in the Consolidated Statements of Comprehensive Income has been reduced by the amounts capitalized.

Loans Receivable

Loans receivable are recorded on our Consolidated Balance Sheets in real estate loans receivable, net of credit allowance, or for non-real estate loans receivable, in receivables and other assets. Real estate loans

WELLTOWER INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

receivable consists of mortgage loans and other real estate loans which are primarily collateralized by a first, second or third mortgage lien, a leasehold mortgage on, or an assignment or pledge of the partnership interest in, the related properties, corporate guarantees and/or personal guarantees. Non-real estate loans are generally corporate loans with no real estate backing. Interest income on loans is recognized as earned based upon the principal amount outstanding subject to an evaluation of the risk of credit loss.

In Substance Real Estate Investments

We provide loans to third parties for the acquisition, development and construction of real estate. Under these arrangements, it is possible that we will participate in the expected residual profits of the project through the sale, refinancing or acquisition of the property. We evaluate the characteristics of each arrangement, including its risks and rewards, to determine whether they are more similar to those associated with a loan or an investment in real estate. Arrangements with characteristics implying loan classification are presented as real estate loans receivable and result in the recognition of interest income. Arrangements with characteristics implying real estate joint ventures are treated as in substance real estate investments and presented as investments in unconsolidated entities and are accounted for using the equity method. The classification of each arrangement as either a real estate loan receivable or investment in unconsolidated entity involves judgment and relies on various factors, including market conditions, amount and timing of expected residual profits, credit enhancements in the form of guarantees, estimated fair value of the collateral, and significance of borrower equity in the project, among others. The classification of such arrangements is performed at inception, and periodically reassessed when significant changes occur in the circumstances or conditions described above.

Allowance for Credit Losses on Loans Receivable

The allowance for credit losses on loans receivable is maintained at a level believed adequate to absorb potential losses in our loans receivable. The determination of the credit allowance is based on a quarterly evaluation of all outstanding loans, including general economic conditions and estimated collectability of loan payments. We evaluate the collectability of our loans receivable based on a combination of credit quality indicators, including, but not limited to, payment status, historical loan charge-offs, financial strength of the borrower and guarantors, and nature, extent, and value of the underlying collateral. A loan is considered to have deteriorated credit quality when, based on current information and events, it is probable that we will be unable to collect all amounts due as scheduled according to the contractual terms of the loan agreement. For those loans we identified as having deteriorated credit quality, we determine the amount of credit loss on an individual basis. Placement on non-accrual status may be required. Consistent with this definition, all loans on non-accrual status are deemed to have deteriorated credit quality. To the extent circumstances improve and the risk of collectability is diminished, we may return these loans to income accrual status. While a loan is on non-accrual status, any cash receipts are applied against the outstanding principal balance. For the remaining loans we assess credit loss on a collective pool basis and use our historical loss experience for similar loans to determine the reserve for credit losses.

Goodwill

Goodwill is tested annually for impairment and is tested for impairment more frequently if events and circumstances indicate that the asset might be impaired. An impairment loss is recognized to the extent that the carrying amount, including goodwill, exceeds the reporting unit's fair value and the implied fair value of goodwill is less than the carrying amount of that goodwill. We have not had any goodwill impairments.

Fair Value of Derivative Instruments

Derivatives are recorded at fair value on the balance sheet as assets or liabilities. The valuation of derivative instruments requires us to make estimates and judgments that affect the fair value of the instruments. Fair values

WELLTOWER INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

of our derivatives are estimated by pricing models that consider the forward yield curves and discount rates. The fair value of our forward exchange contracts are estimated by pricing models that consider foreign currency spot rates, forward trade rates and discount rates. Such amounts and the recognition of such amounts are subject to estimates that may change in the future. See Note 12 for additional information.

Accrued Expenses and Other Liabilities

Accrued expenses and other liabilities consist of the following (in thousands):

	Year Ended December 31,	
	2022	2021
Unearned revenue	\$ 432,941	\$ 335,891
Other liabilities	311,506	180,663
Accounts payable	216,732	174,798
Taxes payable	144,021	117,013
Other accrued expenses	135,944	135,042
Accrued payroll	120,713	141,694
Accrued interest	117,741	111,157
Derivative liabilities	55,727	39,296
Total	<u>\$1,535,325</u>	<u>\$1,235,554</u>

Federal Income Tax

We have elected to be treated as a REIT under the applicable provisions of the IRC, commencing with our first taxable year, and made no provision for U.S. federal income tax purposes prior to our acquisition of our taxable REIT subsidiaries (“TRSs”). As a result of these, as well as subsequent acquisitions, we now record income tax expense or benefit with respect to certain of our entities that are taxed as TRSs under provisions similar to those applicable to regular corporations and not under the REIT provisions. We account for deferred income taxes using the asset and liability method and recognize deferred tax assets and liabilities for the expected future tax consequences of events that have been included in our consolidated financial statements or tax returns. Under this method, we determine deferred tax assets and liabilities based on the differences between the financial reporting and tax bases of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to reverse. Any increase or decrease in the deferred tax liability that results from a change in circumstances, and that causes a change in our judgment about expected future tax consequences of events, is included in the tax provision when such changes occur. Deferred income taxes also reflect the impact of operating loss and tax credit carryforwards. A valuation allowance is provided if we believe it is more likely than not that all or some portion of the deferred tax asset will not be realized. Any increase or decrease in the valuation allowance that results from a change in circumstances, and that causes a change in our judgment about the realizability of the related deferred tax asset, is included in the tax provision when such changes occur. See Note 19 for additional information.

Foreign Currency

Certain of our subsidiaries’ functional currencies are the local currencies of their respective countries. We translate the results of operations of our foreign subsidiaries into U.S. Dollars using average rates of exchange in effect during the period, and we translate balance sheet accounts using exchange rates in effect at the end of the period. We record resulting currency translation adjustments in accumulated other comprehensive income, a component of stockholders’ equity, on our Consolidated Balance Sheets.

WELLTOWER INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Earnings Per Share

Basic earnings per share is computed by dividing net income available to common stockholders by the weighted-average number of shares outstanding for the period adjusted for non-vested shares of restricted stock. The computation of diluted earnings per share is similar to basic earnings per share, except that the number of shares is increased to include the number of additional common shares that would have been outstanding if the potentially dilutive common shares had been issued. Additionally, net income (loss) allocated to OP Units and DownREIT Units (discussed above) has been included in the numerator and redeemable common stock related to the OP Units and DownREIT Units have been included in the denominator for the purpose of computing diluted earnings per share.

Reclassifications

Certain amounts in prior years have been reclassified to conform to current year presentation.

Impact of COVID-19 Pandemic & Government Assistance

The extent to which the COVID-19 pandemic impacts our operations and those of our operators and tenants will depend on future developments, which are highly uncertain and cannot be predicted with confidence, including the scope, severity and duration of the pandemic, the actions taken to contain the pandemic or mitigate its impact, the direct and indirect economic effects of the pandemic and containment measures, the impact of new variants, the effectiveness of vaccines, and the overall pace of recovery, among others. The COVID-19 pandemic could have material and adverse effects on our financial condition, results of operations and cash flows in the future.

Our Seniors Housing Operating revenues are dependent on occupancy. As of December 31, 2022, nearly all communities are open for new admissions and allowing visitors, in-person tours and communal dining and activities. Average occupancy is as follows (unaudited):

	Three Months Ended ⁽¹⁾			
	March 31,	June 30,	September 30,	December 31,
2021	72.7%	73.0%	74.9%	76.3%
2022	76.3%	77.1%	78.0%	78.3%

(1) Average occupancy includes our minority ownership share related to unconsolidated properties and excludes the minority partners' noncontrolling ownership share related to consolidated properties. Also excludes land parcels and properties under development.

Property-level operating expenses associated with the COVID-19 pandemic related to our Seniors Housing Operating portfolio totaled \$33,099,000, \$63,681,000 and \$110,719,000 for the years ended December 31, 2022, 2021 and 2020, respectively. These expenses were incurred as a result of public health measures and other regulations affecting our properties, as well as additional health and safety measures adopted by us and our operators related to the COVID-19 pandemic, including increases in labor and property cleaning expenses and expenditures related to our efforts to procure personal protective equipment and supplies. We expect total Seniors Housing Operating expenses to remain elevated during the pandemic and potentially beyond as these additional health and safety measures become standard practice.

On March 27, 2020, the federal government enacted the Coronavirus Aid, Relief, and Economic Security Act ("CARES Act") to provide financial aid to individuals, businesses, and state and local governments. During the years ended December 31, 2022, 2021 and 2020, we received government grants under the CARES Act

WELLTOWER INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

primarily to cover increased expenses and lost revenue during the COVID-19 pandemic, as well as under similar programs in the U.K. and Canada. Grant income is recognized when there is reasonable assurance that the grant will be received and the Company will comply with all conditions attached to the grant. For the years ended December 31, 2022, 2021 and 2020 we recognized \$38,607,000, \$97,933,000 and \$31,927,000, respectively, of government grant income as a reduction to property operating expenses in our Consolidated Statements of Comprehensive Income. Additionally, for the years ended December 31, 2021 and 2020, we recognized \$4,642,000 and \$3,014,000, respectively, of government grant income in other income in our Consolidated Statements of Comprehensive Income. The amount of qualifying expenditures and lost revenue exceeded grant income recognized and we believe we have complied and will continue to comply with all grant conditions. In the event of non-compliance, all such amounts received are subject to recapture.

Our Triple-net operators have experienced similar occupancy trends as our Seniors Housing Operating properties. Additionally, long-term/post-acute care facilities have generally experienced a higher degree of occupancy declines. These factors may continue to impact the ability of our Triple-net operators to make contractual rent payments to us in the future. Many of our Triple-net operators received funds under the CARES Act Paycheck Protection Program and Provider Relief Fund.

New Accounting Standards

- In August 2020, the FASB issued ASU 2020-06, Debt-Debt with Conversion and Other Options (Subtopic 470-20) and Derivatives and Hedging-Contracts in Entity's Own Equity (Subtopic 815-40) Accounting for Convertible Instruments and Contracts in an Entity's Own Equity. This ASU simplifies accounting for convertible instruments and removes certain settlement conditions that are required for equity contracts to qualify for the derivative scope exception. This ASU also simplifies the diluted earnings per share calculation in certain areas and provides updated disclosure requirements. The ASU is effective for public business entities beginning after December 15, 2021, including interim periods within those fiscal years. The adoption of this standard did not have a significant impact on our consolidated financial statements.
- In November 2021, the FASB issued ASU 2021-10, Government Assistance (Topic 832): Disclosures by Business Entities about Government Assistance, which increases the transparency of government assistance including the disclosure of the types of assistance, an entity's accounting for assistance and the effect of the assistance on an entity's financial statements. The adoption of this standard did not have a material impact on our consolidated financial statements or disclosures.
- In March 2020, the FASB issued ASU 2020-04, Reference Rate Reform (Topic 848): Facilitation of the Effects of Reference Rate Reform on Financial Reporting, which provides the option for a limited period of time to ease the potential burden in accounting for, or recognizing the effects of, reference rate reform on contract modifications and hedge accounting. An example of such reform is the expected market transition from the London Interbank Offered Rate ("LIBOR") and other interbank offered rates to alternative reference rates. Entities that make this optional expedient election would not have to remeasure the contracts at the modification date or reassess the accounting treatment if certain criteria are met and would continue applying hedge accounting for relationships affected by reference rate reform. In December 2022, the FASB extended the date for which this guidance can be applied from December 31, 2022 to December 31, 2024. We continue to monitor developments related to the LIBOR transition and identification of an alternative, market-accepted rate.

3. Real Property Acquisitions and Development

The total purchase price for all properties acquired has been allocated to the tangible and identifiable intangible assets and liabilities at cost on a relative fair value basis. Liabilities assumed and any associated

WELLTOWER INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

noncontrolling interests are reflected at fair value. The results of operations for these acquisitions have been included in our consolidated results of operations since the date of acquisition and are a component of the appropriate segments. Transaction costs primarily represent costs incurred with acquisitions, including due diligence costs, fees for legal and valuation services, termination of pre-existing relationships computed based on the fair value of the assets acquired, lease termination fees and other acquisition-related costs. Transaction costs related to asset acquisitions are capitalized as a component of purchase price and all other non-capitalizable costs are reflected in other expenses on our Consolidated Statements of Comprehensive Income.

The following is a summary of our real property investment activity by segment for the periods presented (in thousands):

	Year Ended December 31, 2022			
	Seniors Housing Operating	Triple-net	Outpatient Medical	Total
Land and land improvements	\$ 206,618	\$ 7,536	\$ 68,379	\$ 282,533

Holiday Retirement Acquisition

On July 30, 2021, we acquired a portfolio of 85 seniors housing properties owned by Holiday Retirement for \$1,576,600,000, which are included in our Seniors Housing Operating segment and in the table above for the year ended December 31, 2021. Atria Senior Living assumed operations of the portfolio following its acquisition of the Holiday Retirement management company pursuant to an incentive-based management agreement. As part of this transaction, a wholly owned subsidiary assumed the leasehold interest in a 26 property portfolio and subsequently purchased eight of the leased properties and one of the properties was sold by the landlord, National Health Investors (“NHI”), and removed from the master lease. Effective April 1, 2022, our leasehold interest related to the remaining 17 properties was terminated as a result of the transition or sale of the properties by NHI as part of an agreement to resolve outstanding litigation. In conjunction with the agreement, a wholly owned subsidiary and the lessee on the master lease agreed to release \$6,883,000 of cash to the landlord, which represents the net cash flow generated from the properties since we assumed the leasehold interest. Additionally, in conjunction with the lease termination, during the year ended December 31, 2022, we recognized \$58,621,000 in other income on our Consolidated Statements of Comprehensive Income from the derecognition of the right of use asset and related liability.

5. Dispositions, Real Property Held for Sale and Impairment

We periodically sell properties for various reasons, including favorable market conditions, the exercise of tenant purchase options or reduction of concentrations (e.g. property type, relationship or geography). At December 31, 2022, three Seniors Housing Operating, seven Triple-net and one Outpatient Medical properties, with an aggregate net real estate balance of \$133,058,000, were classified as held for sale. In addition to the real property balances, lease liabilities of \$66,711,000 and net other assets and (liabilities) of \$(4,136,000) were included in the Consolidated Balance Sheets related to the held for sale properties. Expected gross sales proceeds related to the held for sale properties are approximately \$198,954,000.

During the year ended December 31, 2022, we recorded impairment charges of \$13,146,000 related to one Seniors Housing Operating property which was classified as held for sale for which the carrying value exceeded the estimated fair values less costs to sell. Additionally, during 2022 we recorded impairment charges of \$4,356,000 related to two Triple-net properties and one Outpatient Medical property, which were held for use for which the carrying value exceeded the fair values. During the year ended December 31, 2021, we recorded impairment charges of \$19,567,000 related to four Triple-net properties and one Outpatient Medical property, which were disposed of or classified as held for sale. Additionally, we recorded \$31,540,000 of impairment charges related to two Seniors Housing Operating properties and two Triple-net properties that were held for use. During the year ended December 31, 2020, we recorded impairment charges of \$87,873,000 related to 15 Seniors Housing Operating and one Triple-net properties, which were disposed of or classified as held for sale. Additionally, during the year ended December 31, 2020, we recorded \$47,735,000 of impairment charges related to six Seniors Housing Operating and four Triple-net properties that were held for use.

6. Leases

We lease land, buildings, office space and certain equipment. Many of our leases include a renewal option to extend the term from one to 25 years or more. Renewal options that we are reasonably certain to exercise are recognized in our right-of-use assets and lease liabilities. As most of our leases do not provide a rate implicit in the lease agreement, we generally use our incremental borrowing rate available at lease commencement, underlying collateral for the lease and the ability to borrow against that collateral on a secured basis to determine the present value of lease payments. The incremental borrowing rates were determined using our longer term borrowing rates (actual pricing through 30 years, as well as other longer-term market rates).

We sublease certain real estate to a third party. Our sublease portfolio consists of a finance lease for seven buildings which are subleased to a long-term/ post-acute care operator.

(1) At December 31, 2022, financing leases at seven properties were classified as held for sale.

Supplemental cash flow information related to leases was as follows for the periods indicated (in thousands):

<u>Cash paid for amounts included in the measurement of lease liabilities:</u>	<u>Classification</u>	<u>Year Ended December 31,</u>		
		<u>2022</u>	<u>2021</u>	<u>2020</u>
Operating cash flows from operating leases	Decrease (increase) in receivables and other assets	\$ 8,805	\$9,081	\$9,323
Operating cash flows from operating leases	Increase (decrease) in accrued expenses and other liabilities	(5,570)	(6,008)	(3,918)
Operating cash flows from financing leases	Decrease (increase) in receivables and other assets	8,672	8,336	8,263
Financing cash flows from financing leases	Other financing activities	(2,255)	(3,578)	(3,568)

Substantially all of our operating leases in which we are the lessor contain escalating rent structures. Leases with fixed annual rental escalators are generally recognized on a straight-line basis over the initial lease period, subject to a collectability assessment. Rental income related to leases with contingent rental escalators is generally recorded based on the contractual cash rental payments due for the period. During the years ended December 31, 2021 and 2020, we reserved for previously recognized straight-line rent receivable balances of

WELLTOWER INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

\$49,241,000 and \$146,508,000 through rental income, relating to leases for which collection of substantially all contractual lease payments was no longer deemed probable. Included in the 2020 amount was \$91,025,000 related to Genesis Healthcare (“Genesis”) whom noted substantial doubt as to their ability to continue as a going concern.

Leases in our Triple-net and Outpatient Medical portfolios typically include some form of operating expense reimbursement by the tenant. Rental income related to operating leases and the corresponding variable lease payments, which primarily represents the reimbursement of operating costs such as common area maintenance expenses, utilities, insurance and real estate taxes for the periods indicated were as follows (in thousands):

	Year Ended December 31,		
	2022	2021	2020
Fixed income from operating leases	\$1,258,238	\$1,193,837	\$1,240,012
Variable lease income	193,548	180,858	203,348

For the majority of our Seniors Housing Operating segment, revenue from resident fees and services is predominantly service-based, and as such, resident agreements are accounted for under ASC 606. Within that reportable segment, we also recognize revenue from residential seniors apartment leases in accordance with ASC 842. The amount of revenue related to these leases was \$410,749,000, \$194,078,000 and \$58,053,000 for the years ended December 31, 2022, 2021 and 2020, respectively.

The following table sets forth the future minimum lease payments receivable for leases in effect at December 31, 2022 (excluding properties in our Seniors Housing Operating portfolio and excluding any operating expense reimbursements) (in thousands):

2023	\$ 1,176,306
2024	1,150,604
2025	1,118,044
2026	1,074,809
2027	1,018,400
Thereafter	8,802,365
Totals	\$14,340,528

Net cash advances (receipts) on loans receivable	\$ (40,265)	\$654,189	\$215,995

During the year ended December 31, 2021, we provided £540 million (approximately \$750,330,000 based on the Sterling/ U.S. Dollar exchange rate as of the date of funding) of senior loan financing and a £30 million delayed facility for working capital and capital expenditures to affiliates of Safanad, a global real estate and private equity firm, as part of the recapitalization of its investment in HC-One Group. The loan has a five-year term and is fully collateralized by the shares and assets of the HC-One Group, including its underlying portfolio of owned assets across the U.K. As part of the transaction, we received equity warrants which provide us the right to participate in the capital appreciation of HC-One Group above a designated price upon liquidation. See Note 12 for additional details.

WELLTOWER INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The following is a summary of our loans by credit loss category (in thousands):

<u>Loan category</u>	<u>December 31, 2022</u>

Total loans		<u>\$1,344,261</u>	<u>\$(164,249)</u>	<u>\$1,180,012</u>	<u>73</u>

In 2020, we recognized a provision for loan losses of \$88,201,000 as a result of the current collateral estimates for loans with deteriorated credit, primarily relating to our outstanding loans to Genesis Healthcare (“Genesis”). During the year ended December 31, 2021, we entered into definitive agreements to substantially exit our operating relationship with Genesis primarily through the transition of 51 properties to other operators. To effectuate this transition, we agreed to provide Genesis a lease termination fee of \$86 million upon successful transition of all properties, which will be used to immediately repay indebtedness to us. Additionally, upon achievement of certain restructuring milestones, we will reduce Genesis’ indebtedness by an additional \$170 million in exchange for an equity interest in Genesis. Upon conclusion of the aforementioned loan transactions, Genesis will have \$167 million of indebtedness to us, exclusive of additional paid in kind interest, which will carry a maturity date of January 1, 2024. As of December 31, 2022, our total carrying value of Genesis loans receivable, net of allowances for credit losses, was \$168,949,000.

The total allowance for credit losses is deemed to be sufficient to absorb expected losses relating to our loan portfolio. The following is a summary of the allowance for credit losses on loans receivable for the periods presented (in thousands):

(1) Excludes \$11,714,000 related to the provision for loss on held-to-maturity debt securities.

(2) Includes \$64,075,000 related to the Genesis lease terminations for the twelve months ended December 31, 2021.

(3) During the year ended December 31, 2020, two loans originated in 2016 to Genesis with an aggregate carrying value of \$62,753,000 were transferred to the deteriorated loan pool. In addition, deferred gains of \$62,819,000 previously recorded in accrued expenses and other liabilities were reclassified to the allowance for credit losses.

(1) Represents cash interest recognized in the period.

8. Investments in Unconsolidated Entities

We participate in a number of joint ventures, which generally invest in seniors housing and health care real estate. Our share of the results of operations for these properties has been included in our consolidated results of operations from the date of acquisition by the joint ventures and are reflected in our Consolidated Statements of Comprehensive Income as income or loss from unconsolidated entities. The following is a summary of our investments in unconsolidated entities (dollars in thousands):

	Percentage Ownership ⁽¹⁾	December 31, 2022	December 31, 2021
Seniors Housing Operating	10% to 65%	\$1,171,307	\$ 830,647
Triple-net	10% to 88%	111,812	44,814
Outpatient Medical	15% to 50%	<u>216,671</u>	<u>163,582</u>
Total		<u>\$1,499,790</u>	<u>\$1,039,043</u>

(1) As of December 31, 2022 and includes ownership of investments classified as liabilities and excludes ownership of in-substance real estate.

We own 34% of Sunrise Senior Living Management, Inc. (“Sunrise”), who provides comprehensive property management and accounting services with respect to certain of our Seniors Housing Operating properties that Sunrise operates. We pay Sunrise annual management fees pursuant to long-term management agreements. The majority of our management agreements have initial terms expiring in 2028, plus, if applicable, optional renewal periods ranging from an additional 3 to 15 years depending on the property. The management fees payable to Sunrise under the management agreements include a fee based on a percentage of revenues generated by the applicable properties plus, if applicable, positive or negative adjustments based on specified performance targets. For the years ended December 31, 2022, 2021 and 2020, we recognized fees to Sunrise of \$27,660,000, \$37,052,000 and \$37,569,000, respectively, which are reflected within property operating expenses in our Consolidated Statements of Comprehensive Income.

At December 31, 2022, the aggregate unamortized basis difference of our joint venture investments of \$131,746,000 is primarily attributable to the difference between the amount for which we purchased our interest in the entity, including transaction costs, and the historical carrying value of the net assets of the joint venture. This difference is being amortized over the remaining useful life of the related properties and included in the reported amount of income from unconsolidated entities.

We have made loans related to 21 properties as of December 31, 2022 for the development and construction of certain properties which are classified as in substance real estate investments and have a carrying value of \$649,267,000. We believe that such borrowers typically represent VIEs in accordance with ASC 810. VIEs are

WELLTOWER INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

required to be consolidated by their primary beneficiary, which is the enterprise that has both: (i) the power to direct the activities of the VIE that most significantly impacts the entity’s economic performance; and (ii) the obligation to absorb losses or the right to receive benefits of the VIE that could be significant to the entity. We have concluded that we are not the primary beneficiary of such borrowers, therefore, the loan arrangements were assessed based on among other factors, the amount and timing of expected residual profits, the estimated fair value of the collateral and the significance of the borrower’s equity in the project. Based on these assessments the arrangements have been classified as in substance real estate investments. We expect to fund an additional \$171,851,000 related to these investments.

9. Credit Concentration

We use consolidated net operating income (“NOI”) as our credit concentration metric. See Note 18 for additional information and reconciliation. The following table summarizes certain information about our credit concentration for the year ended December 31, 2022, excluding our share of NOI in unconsolidated entities (dollars in thousands):

	<u>Number of Properties</u>	<u>Total NOI</u>	<u>Percent of NOI⁽²⁾</u>
Concentration by relationship: ⁽¹⁾			
ProMedica	58	\$ 240,128	10%
Sunrise Senior Living ⁽³⁾	109	158,576	7%
Atria Senior Living ⁽⁴⁾	97	145,252	6%
HC-One Group ⁽⁵⁾	1	86,667	4%
Cogir Management Corporation	48	77,115	3%
Remaining portfolio	<u>1,430</u>	<u>1,594,107</u>	<u>70%</u>
Totals	<u>1,743</u>	<u>\$2,301,845</u>	<u>100%</u>

- (1) ProMedica and HC-One Group are in our Triple-net segment. Sunrise Senior Living (“Sunrise”), Atria Senior Living and Cogir Management Corporation are in our Seniors Housing Operating segment.
- (2) NOI with our top five relationships comprised 34% of total NOI for the year ending December 31, 2021.
- (3) For the year ended December 31, 2022, we recognized \$836,713,000 of revenue from properties managed by Sunrise.
- (4) Inclusive of \$58,621,000 of income recognized upon termination of a lease. See Note 3 for further details.
- (5) In addition to the one property, HC-One Group is the borrower on a loan with a principal balance of £517,099,000 as of December 31, 2022. See Note 7 for further detail.

In December 2022, ProMedica relinquished to Welltower its 15% interest in 147 skilled nursing facilities previously owned by the Welltower/ProMedica joint venture in exchange for a lease modification, which relieved ProMedica from its lease obligation on the properties and amended the lease on the remaining 58 assisted living and memory care properties that continue to be held by the Welltower/ProMedica joint venture. The reduction of ProMedica’s noncontrolling interest of \$273,504,000 resulting from its relinquishment of the interest in the joint venture previously holding the 147 skilled nursing facilities is a non-cash financing activity excluded from our Consolidated Statement of Cash Flows. The 58 assisted living and memory care assets continue to be operated by ProMedica and backed by the existing guaranty.

Concurrently with the above, Welltower and Integra Healthcare Properties (“Integra”) entered into master leases for the skilled nursing portfolio. Approximately 15 regional operators will enter into subleases with Integra to operate the properties. Also in December 2022, we sold to Integra a 15% ownership interest in 54 of those skilled nursing facilities for approximately \$73 million, with no gain recognized as the properties continue to be consolidated following the transaction. This transaction represents the initial tranche of the newly formed joint

WELLTOWER INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

venture owned 85% by Welltower and 15% by Integra, which is anticipated to include the 147 skilled nursing facilities. In January 2023, Integra acquired a 15% interest in 31 of the remaining 93 skilled nursing facilities for approximately \$74 million, representing the second tranche of the WELL/Integra joint venture.

ProMedica NOI for the year ended December 31, 2022 was comprised of \$59,687,000 relating to the 58 assisted living and memory care properties (3% of total NOI) and \$180,441,000 relating to the 147 skilled nursing properties (8% of total NOI).

10. Borrowings Under Credit Facilities and Commercial Paper Program

At December 31, 2022, we had a primary unsecured credit facility with a consortium of 31 banks that included a \$4,000,000,000 unsecured revolving credit facility, a \$1,000,000,000 unsecured term credit facility and a \$250,000,000 Canadian-denominated unsecured term credit facility. The unsecured revolving credit facility is comprised of a \$1,000,000,000 tranche that matures on June 4, 2026 (none outstanding at December 31, 2022) and a \$3,000,000,000 tranche that matures on June 4, 2025 (none outstanding at December 31, 2022). The term credit facilities mature on July 19, 2026. Each tranche of the revolving facility and term loans may be extended for two successive terms of six months at our option. We have an option, through an accordion feature, to upsize the unsecured revolving credit facility and the \$1,000,000,000 unsecured term credit facility by up to an additional \$1,250,000,000, in the aggregate, and the \$250,000,000 Canadian-denominated unsecured term credit facility by up to an additional \$250,000,000. The primary unsecured credit facility also allows us to borrow up to \$1,000,000,000 in alternate currencies (none outstanding at December 31, 2022). Borrowings under the unsecured revolving credit facility are subject to interest payable at the applicable margin over the secured overnight financing rate (“SOFR”) interest rate. Based on our current credit ratings, the loans under the unsecured revolving credit facility currently bear interest at 0.775% over the adjusted SOFR rate at December 31, 2022. In addition, we pay a facility fee quarterly to each bank based on the bank’s commitment amount. The facility fee depends on our debt ratings and was 0.15% at December 31, 2022.

Under the terms of our commercial paper program, we may issue unsecured commercial paper notes with maturities that vary, but do not exceed 397 days from the date of issue, up to a maximum aggregate face or principal amount outstanding at any time of \$1,000,000,000 (none outstanding at December 31, 2022).

The following information relates to aggregate borrowings under the unsecured revolving credit facility and commercial paper program for the periods presented (dollars in thousands):

	Year Ended December 31,		
	2022	2021	2020
Balance outstanding at year end	\$ —	\$325,000	\$ —
Maximum amount outstanding at any month end	\$1,565,000	\$994,000	\$2,100,000
Average amount outstanding (total of daily principal balances divided by days in period)	\$ 766,167	\$384,418	\$ 497,014
Weighted-average interest rate (actual interest expense divided by average borrowings outstanding)	1.75%	0.33%	2.09%

11. Senior Unsecured Notes and Secured Debt

We may repurchase, redeem or refinance senior unsecured notes from time to time, taking advantage of favorable market conditions when available. We may purchase senior notes for cash through open market purchases, privately negotiated transactions, a tender offer or, in some cases, through the early redemption of such securities pursuant to their terms. The senior unsecured notes are redeemable at our option, at any time in

WELLTOWER INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

whole or from time to time in part, at a redemption price equal to the sum of: (i) the principal amount of the notes (or portion of such notes) being redeemed plus accrued and unpaid interest thereon up to the redemption date and (ii) any “make-whole” amount due under the terms of the notes in connection with early redemptions. Redemptions and repurchases of debt, if any, will depend on prevailing market conditions, our liquidity requirements, contractual restrictions, and other factors. At December 31, 2022, the annual principal payments due on these debt obligations were as follows (in thousands):

	Senior Unsecured Notes^(1,2,3)	Secured Debt^(1,4)	Totals
2023	\$ —	\$ 627,672	\$ 627,672
2024	1,350,000	345,400	1,695,400
2025	1,260,000	267,117	1,527,117
2026	700,000	127,454	827,454
2027 ^(5,6)	1,906,444	184,491	2,090,935
Thereafter ^(7,8)	7,368,085	577,820	7,945,905
Totals	<u>\$12,584,529</u>	<u>\$2,129,954</u>	<u>\$14,714,483</u>

(1) Amounts represent principal amounts due and do not include unamortized premiums/discounts, debt issuance costs, or other fair value adjustments as reflected on the Consolidated Balance Sheets.

(2) Annual interest rates range from 2.05% to 6.50%.

(3) All senior unsecured notes, with the exception of the \$300,000,000 Canadian-denominated 2.95% senior unsecured notes due 2027 have been issued by Welltower OP and are fully and unconditionally guaranteed by Welltower. The \$300,000,000 Canadian-denominated 2.95% senior unsecured notes due 2027 have been issued through private placement by a wholly owned subsidiary of Welltower OP and are fully and unconditionally guaranteed by Welltower OP.

(4) Annual interest rates range from 1.25% to 7.00%. Carrying value of the properties securing the debt totaled \$4,882,151,000 at December 31, 2022.

(5) Includes a \$1,000,000,000 unsecured term loan and a \$250,000,000 Canadian-denominated unsecured term loan (approximately \$184,747,000 based on the Canadian/U.S. Dollar exchange rate on December 31, 2022). Both term loans mature on July 19, 2026 and may be extended for two successive terms of six months at our option. The loans bears interest at adjusted SOFR plus 0.85% 5.29% at December 31, 2022) and Canadian Dealer Offered Rate plus 0.85% (5.56% at December 31, 2022), respectively.

(6) Includes a \$300,000,000 Canadian-denominated 2.95% senior unsecured notes due 2027 (approximately \$221,697,000 based on the Canadian/U.S. Dollar exchange rate on December 31, 2022).

(7) Includes a £550,000,000 4.80% senior unsecured notes due 2028 (approximately \$664,235,000 based on the Pounds Sterling/U.S. Dollar exchange rate in effect on December 31, 2022).

(8) Includes a £500,000,000 4.50% senior unsecured notes due 2034 (approximately \$603,850,000 based on the Pounds Sterling/U.S. Dollar exchange rate in effect on December 31, 2022).

Welltower, the parent entity that consolidates Welltower OP and all other subsidiaries, fully and unconditionally guarantees to each holder of all series of senior unsecured notes issued by Welltower OP that the principal of and premium, if any, and interest on the notes will be promptly paid in full when due, whether at the applicable maturity date, by acceleration or redemption or otherwise, and interest on the overdue principal of and interest on the notes, if any, if lawful, and all other obligations of Welltower OP to the holders of the notes will be promptly paid in full or performed. Welltower’s guarantees of such notes are its senior unsecured obligation and rank equally with all of Welltower’s other future unsecured senior indebtedness and guarantees from time to time outstanding. Welltower’s guarantees of such notes are effectively subordinated to all liabilities of its subsidiaries and to its secured indebtedness to the extent of the assets securing such indebtedness. Because Welltower conducts substantially all of its business through its subsidiaries, Welltower’s ability to make required payments with respect to the guarantees depends on the financial results and condition of its subsidiaries and its ability to receive funds from its subsidiaries, whether by dividends, loans, distributions or other payments.

(1) Includes the impact of interest rate swaps and interest rate caps.

Our debt agreements contain various covenants, restrictions and events of default. Certain agreements require us to maintain certain financial ratios and minimum net worth and impose certain limits on our ability to incur indebtedness, create liens and make investments or acquisitions. As of December 31, 2022, we were in compliance in all material respects with all of the covenants under our debt agreements.

12. Derivative Instruments

We are exposed to, among other risks, the impact of changes in foreign currency exchange rates as a result of our non-U.S. investments and interest rate risk related to our capital structure. Our risk management program is designed to manage the exposure and volatility arising from these risks, and utilizes foreign currency forward contracts, cross currency swap contracts, interest rate swaps, interest rate locks and debt issued in foreign currencies to offset a portion of these risks.

Foreign Currency Forward Contracts Designated as Cash Flow Hedges

For instruments that are designated and qualify as a cash flow hedge, the effective portion of the gain or loss on the derivative is deferred as a component of other comprehensive income (“OCI”) and reclassified into

WELLTOWER INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

earnings in the same period or periods, during which the hedged transaction affects earnings. Gains and losses on the derivative representing either hedge ineffectiveness or hedge components excluded from the assessment of effectiveness are recognized in earnings.

Cash Flow Hedges and Fair Value Hedges of Interest Rate Risk

We enter into interest rate swaps in order to maintain a capital structure containing targeted amounts of fixed and floating-rate debt and manage interest rate risk. Interest rate swaps designated as cash flow hedges involve the receipt of variable amounts from a counterparty in exchange for our fixed-rate payments. These interest rate swap agreements are used to hedge the variable cash flows associated with variable-rate debt.

Interest rate swaps designated as fair value hedges involve the receipt of fixed amounts from a counterparty in exchange for our variable-rate payments. These interest rate swap agreements hedge the exposure to changes in the fair value of fixed-rate debt attributable to changes in the designated benchmark interest rate. For derivative instruments that are designated and qualify as a fair value hedge, the gain or loss on the derivative instrument, as well as the offsetting loss or gain on the hedged item attributable to the hedged risk, are recognized in earnings. We record the gain or loss on the hedged items in interest expense, the same line item as the offsetting loss or gain on the related interest rate swaps. In March 2022, we entered into a fixed to floating swap in connection with our March senior note issuance. The carrying amount of the notes, exclusive of the hedge, is \$545,381,000. The fair value of the swap as of December 31, 2022 was (\$55,727,000) and was recorded as a derivative liability with an offset to senior unsecured notes on our Consolidated Balance Sheets.

Periodically, we enter into and designate interest rate locks to partially hedge the risk of changes in interest payments attributable to increases in the benchmark interest rate during the period leading up to the probable issuance of fixed-rate debt. We designate our interest rate locks as cash flow hedges. Gains and losses when we settle our interest rate locks are amortized into earnings over the life of the related debt, except where a material amount is deemed to be ineffective, which would be immediately recognized in the Consolidated Statements of Comprehensive Income. Approximately \$2,562,000 of losses, which are included in OCI, are expected to be reclassified into earnings in the next 12 months.

Foreign Currency Forward Contracts and Cross Currency Swap Contracts Designated as Net Investment Hedges

We use foreign currency forward and cross currency forward swap contracts to hedge a portion of the net investment in foreign subsidiaries against fluctuations in foreign exchange rates. For instruments that are designated and qualify as net investment hedges, the variability in the foreign currency to U.S. Dollar of the instrument is recorded as a cumulative translation adjustment component of OCI.

During the years ended December 31, 2022, 2021, and 2020 we settled certain net investment hedges generating cash proceeds of \$61,853,000, and \$14,505,000, and necessitating cash payments of \$1,988,000, respectively. The balance of the cumulative translation adjustment will be reclassified to earnings if the hedged investment is sold or substantially liquidated.

Derivative Contracts Undesignated

We use foreign currency exchange contracts to manage existing exposures to foreign currency exchange risk. Gains and losses resulting from the changes in fair value of these instruments are recorded in interest expense on the Consolidated Statements of Comprehensive Income, and are substantially offset by net revaluation impacts on foreign currency denominated balance sheet exposures. In addition, we have several interest rate cap contracts related to variable rate secured debt agreements. Gains and losses resulting from the changes in fair values of these instruments are also recorded in interest expense.

WELLTOWER INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Equity Warrants

We received equity warrants through our lending activities further described in Note 7, which were accounted for as loan origination fees. The warrants provide us the right to participate in the capital appreciation of HC-One Group real estate portfolio above a designated price upon liquidation and contain net settlement terms qualifying as derivatives under ASC Topic 815. The warrants are classified within receivables and other assets on our Consolidated Balance Sheets. These warrants are measured at fair value with changes in fair value being recognized within gain (loss) on derivatives and financial instruments in our Consolidated Statements of Comprehensive Income.

The following presents the notional amount of derivatives and other financial instruments as of the dates indicated (in thousands):

	<u>December 31, 2022</u>	<u>December 31, 2021</u>
Derivatives designated as net investment hedges:

WELLTOWER INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

13. Commitments and Contingencies

At December 31, 2022, we had 21 outstanding letter of credit obligations totaling \$68,217,000 and expiring during 2023. At December 31, 2022, we had outstanding construction in progress of \$1,021,080,000 and were committed to providing additional funds of approximately \$1,883,449,000 to complete construction. Additionally, at December 31, 2022, we had outstanding investments classified as in substance real estate of \$649,267,000 and were committed to provide additional funds of \$171,851,000 (see Note 8 for additional information). Purchase obligations include \$41,049,000 of contingent purchase obligations to fund capital improvements. Rents due from the tenants are increased to reflect the additional investment in the property.

14. Stockholders' Equity

The following is a summary of our stockholders' equity capital accounts as of the dates indicated:

	<u>December 31, 2022</u>	<u>December 31, 2021</u>
Preferred Stock, \$1.00 par value:		
Authorized shares	50,000,000	50,000,000
Issued shares	—	—
Outstanding shares	—	—
Common Stock, \$1.00 par value:		
Authorized shares	700,000,000	700,000,000
Issued shares	492,283,488	448,998,438
Outstanding shares	490,508,937	447,239,477

Common Stock

In April 2022, we entered into an amended and restated equity distribution agreement whereby we can offer and sell up to \$3,000,000,000 aggregate amount of our common stock ("ATM Program"). The ATM Program also allows us to enter into forward sale agreements. During the year ended December 31, 2022, we physically settled all of our outstanding forward sale agreements for cash proceeds of \$3,667,691,000. As of December 31, 2022, we had \$1,150,203,000 of remaining capacity under the ATM Program.

On May 1, 2020, our Board of Directors authorized a share repurchase program whereby we may repurchase up to \$1 billion of common stock through December 31, 2021. On November 7, 2022, our Board of Directors approved a follow on share repurchase program for up to \$3 billion of common stock (the "Stock Repurchase Program"). Under the Stock Repurchase Program, we are not required to purchase shares but may choose to do so in the open market or through privately-negotiated transactions, through block trades, by effecting a tender offer, by way of an accelerated share repurchase program, through the purchase of call options or the sale of put options, or otherwise, or by any combination of the foregoing. We expect to finance any share repurchases using available cash and may use proceeds from borrowings or debt offerings. The Stock Repurchase Program has no expiration date and does not obligate us to repurchase any specific number of shares. During the year ended December 31, 2020, we repurchased 201,947 shares at an average price of \$37.89 per share. We did not repurchase any shares of our common stock during the years ended December 31, 2021 or December 31, 2022.

WELLTOWER INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

15. Stock Incentive Plans

In March 2022, our Board of Directors approved the 2022 Long-Term Plan (“2022 Plan”), which authorizes up to 10,000,000 shares of common stock to be issued at the discretion of the Compensation Committee of the Board of Directors. Awards granted after March 28, 2022 will be issued out of the 2022 Plan. The awards granted under the 2016 Long-Term Incentive Plan continue to vest and options expire ten years from the date of grant. Our non-employee directors, officers and key employees are eligible to participate in the 2022 Plan. The 2022 Plan allows for the issuance of, among other things, stock options, stock appreciation rights, restricted stock, deferred stock units, performance units, and dividend equivalent rights. Vesting periods for options, deferred stock units and restricted shares generally range from three to five years. Options expire ten years from the date of grant.

Under our long-term incentive plan, certain restricted stock awards are market, performance and time-based. For market and performance based awards, we will grant a target number of restricted stock units, with the ultimate award determined by the total shareholder return and operating performance metrics, measured in each case over a measurement period of three to four years. Performance based awards vest after the end of the performance periods. The expected term represents the period from the grant date to the end of the performance period. Compensation expense for performance based awards is measured based on the probability of achievement of certain performance goals and is recognized over the performance period. For the portion of the grant for which the award is determined by the operating performance metrics, the compensation cost is based on the grant date closing price and management’s estimate of corporate achievement of the financial metrics. If the estimated number of performance based restricted stock to be earned changes, an adjustment will be recorded to recognize the accumulated difference between the revised and previous estimates. For the portion of the grant determined by the total shareholder return (“TSR”), management used a Monte Carlo model to assess the fair value and compensation cost. For time based awards, the fair value of the restricted stock is equal to the market price of the Company’s common stock on the date of grant and is amortized over the vesting periods. For purposes of measuring stock-based compensation expense, we consider whether an adjustment to the observable market price is necessary to reflect material nonpublic information that is known to us at the time the award is granted. No adjustments were deemed necessary for the years ended December 31, 2022, 2021, or 2020. Forfeitures are accounted for as they occur.

The following table summarizes compensation expense recognized for the periods presented (in thousands):

	Year Ended December 31,		
	2022	2021	2020
Stock options	\$ 2,378	\$ 1,088	\$ —
Restricted stock	23,771	16,724	28,318
Total compensation expense	\$26,149	\$17,812	\$28,318

WELLTOWER INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Stock Options

The following is a summary of time-based stock option activity in 2022:

	<u>Shares</u>	<u>Weighted Average Exercise Price</u>	<u>Weighted Average Remaining Contractual Life (years)</u>	<u>Intrinsic Value (\$ 000's)</u>
Outstanding as of				
December 31, 2021 . . .	311,306	\$67.17		
Options granted	256,716	86.23		
Options exercised	(2,433)	67.17		
Options forfeited	(14,074)	76.02		
Options expired	—	—		—
Outstanding as of				
December 31, 2022 . . .	<u>551,515</u>	\$75.82	8.76	<u>\$—</u>
Exercisable as of				
December 31, 2022 . . .	75,383	\$67.17	8.50	\$—

The Company used the Black-Scholes Option Pricing model to determine the grant date fair value of time-based options. The weighted-average assumptions used are as follows:

	<u>2022</u>
Dividend yield	2.83%
Estimated volatility ⁽¹⁾	32.84%
Risk free rate	1.61%
Expected life of options	6 years
Estimated fair value	\$ 21.15

(1) Estimated volatility is using 50% historical volatility and 50% implied volatility.

As of December 31, 2022, there was \$6,269,000 of total unrecognized compensation expense related to unvested time-based stock options that is expected to be recognized over a weighted-average period of three years.

During December 2021, we granted 832,356 performance-based stock options at a weighted average exercise price of \$83.44. During the year ended December 31, 2022, 7,140 options were forfeited resulting in 825,216 outstanding and non-vested options at December 31, 2022. The grant date fair value of \$20.31 was estimated on the date of grant using the Black-Scholes option pricing model. These options have a performance condition based on a Funds From Operations goal measured over the performance period of January 1, 2022 to December 31, 2024. These awards vest over two years after the end of the performance period, with a portion vesting immediately at the end of the performance period. Compensation expense is measured based on the probability of achievement of the performance goal and is recognized over both the performance period and vesting period. At December 31, 2022, the performance goal is not probable of being achieved.

Restricted Stock

During January 2022, we granted 936,915 performance-based restricted stock awards under the terms of an Out Performance Program (“OPP”), all of which were outstanding and non-vested at December 31, 2022. The grant date fair value of \$27.60 was estimated on the date of grant using a Monte Carlo model. These awards have performance conditions based on a Funds From Operations goal and absolute and relative TSR goals measured over the performance period of January 1, 2022 to December 31, 2025. These awards vest after the end of the

WELLTOWER INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

performance period. Compensation expense is measured based on the probability of achievement of the performance goals and is recognized over the performance period. At December 31, 2022, the performance goals are not probable of being achieved.

The following is a summary of the status of our non-vested restricted stock (including market, performance, and time-based awards, and excluding OPP awards) as of December 31, 2022, and changes during the year ended December 31, 2022:

	<u>Restricted Stock</u>	
	<u>Number of Shares</u>	<u>Weighted-Average Grant Date Fair Value</u>
Non-vested at December 31, 2021	566,227	\$76.28
Vested	(168,275)	82.78
Granted	303,566	98.49
Change in awards based on performance ⁽¹⁾	120,959	82.42
Forfeited or expired	<u>(19,150)</u>	<u>83.56</u>
Non-vested at December 31, 2022	<u>803,327</u>	<u>\$84.78</u>

(1) Represents the change in number of market and performance based awards earned based on performance achievement.

We used a Monte Carlo model to assess the compensation cost associated with the portion of the market awards granted for which achievement will be determined using total shareholder return measures. The model also considers a post-vesting holding period. The weighted-average assumptions used are as follows:

	<u>2022</u>
Dividend yield	2.83%
Estimated volatility over the life of the plan ⁽¹⁾	26.31% - 56.62%
Risk free rate	0.08% - 1.20%
Estimated market based performance award value based on total shareholder return measure	\$ 111.27

(1) Estimated volatility over the life of the plan is using 50% historical volatility and 50% implied volatility.

As of December 31, 2022, there was \$27,943,000 of total unrecognized compensation expense related to unvested restricted stock that is expected to be recognized over a weighted-average period of two years.

Defined Contribution Plan

We sponsor a 401(k) plan which is available to substantially all U.S. employees. We match a percentage of employee contributions up to 5% of an employee's wages and provide a discretionary profit sharing contribution calculated as a percentage of eligible compensation. We recognized expense of \$3,984,000, \$3,477,000 and \$3,323,000 during the years ended December 31, 2022, 2021 and 2020, respectively, related to this plan.

WELLTOWER INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

16. Earnings Per Share

The following table sets forth the computation of basic and diluted earnings per share (in thousands, except per share data):

	Year Ended December 31,		
	2022	2021	2020
Numerator for basic earnings per share—net income attributable to common stockholders	<u>\$141,214</u>	<u>\$336,138</u>	<u>\$978,844</u>
Adjustment for net income (loss) attributable to OP Units and DownREIT Units	<u>165</u>	<u>(3,020)</u>	<u>(6,146)</u>
Numerator for diluted earnings per share	<u>\$141,379</u>	<u>\$333,118</u>	<u>\$972,698</u>
Denominator for basic earnings per share—weighted average shares Effect of dilutive securities:	462,185	424,976	415,451
Employee stock options	20	—	—
Non-vested restricted shares	1,058	447	519
OP Units and DownREIT Units	1,865	1,396	1,396
Employee stock purchase program	<u>30</u>	<u>22</u>	<u>21</u>
Dilutive potential common shares	<u>2,973</u>	<u>1,865</u>	<u>1,936</u>
Denominator for diluted earnings per share—adjusted weighted average shares	<u>465,158</u>	<u>426,841</u>	<u>417,387</u>
Basic earnings per share	\$ 0.31	\$ 0.79	\$ 2.36
Diluted earnings per share	\$ 0.30	\$ 0.78	\$ 2.33

As of December 31, 2021, outstanding forward sales agreements for the sale of 5,187,250 shares were not included in the computation of diluted earnings per share because such forward sales were anti-dilutive for the period. There were no outstanding forward sale agreements as of December 31, 2022 or December 31, 2020. Employee stock options were anti-dilutive for 2021 and 2020.

17. Disclosure about Fair Value of Financial Instruments

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. A three-level valuation hierarchy exists for disclosures of fair value measurements based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date. A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement. The three levels are defined below:

- Level 1—Quoted prices in active markets for identical assets or liabilities.
- Level 2—Observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.
- Level 3—Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

WELLTOWER INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The following methods and assumptions were used to estimate the fair value of each class of financial instruments for which it is practicable to estimate that value:

Mortgage Loans, Other Real Estate Loans and Non-real Estate Loans Receivable — The fair value of mortgage loans, other real estate loans and non-real estate loans receivable is generally estimated by using Level 2 and Level 3 inputs such as discounting the estimated future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities.

Cash and Cash Equivalents and Restricted Cash — The carrying amount approximates fair value.

Equity Securities — Equity securities are recorded at their fair value based on Level 1 publicly available trading prices.

Equity Warrants — The fair value of equity warrants is estimated using Level 3 inputs and includes data points such as enterprise value of the underlying HC-One Group real estate portfolio, marketability discount for private company warrants, dividend yield, volatility and risk-free rate. The enterprise value is driven by projected cash flows, weighted average cost of capital and a terminal capitalization rate.

Borrowings Under Primary Unsecured Credit Facility and Commercial Paper Program — The carrying amount of the primary unsecured credit facility and commercial paper program approximates fair value because the borrowings are interest rate adjustable.

Senior Unsecured Notes — The fair value of the senior unsecured notes payable was estimated based on Level 1 publicly available trading prices. The carrying amount of the variable rate senior unsecured notes approximates fair value because they are interest rate adjustable.

Secured Debt — The fair value of fixed rate secured debt is estimated using Level 2 inputs by discounting the estimated future cash flows using the current rates at which similar loans would be made with similar credit ratings and for the same remaining maturities. The carrying amount of variable rate secured debt approximates fair value because the borrowings are interest rate adjustable.

Foreign Currency Forward Contracts, Interest Rate Swaps and Cross Currency Swaps — Foreign currency forward contracts, interest rate swaps and cross currency swaps are recorded in other assets or other liabilities on the balance sheet at fair value that is derived from observable market data, including yield curves and foreign exchange rates.

Redeemable DownREIT Unitholder Interests — Our redeemable DownREIT unitholder interests are recorded on the balance sheet at fair value using Level 2 inputs unless the fair value is below the initial amount, in which case the redeemable DownREIT unitholder interests are recorded at the initial amount adjusted for distributions to the unitholders and income or loss attributable to the unitholders. The fair value is measured using the closing price of our common stock, as units may be redeemed at the election of the holder for cash or, at our option, one share of our common stock per unit, subject to adjustment in certain circumstances.

WELLTOWER INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The carrying amounts and estimated fair values of our financial instruments are as follows (in thousands):

	December 31, 2022		December 31, 2021	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Financial assets:				
Mortgage loans receivable	\$ 697,906	\$ 739,159	\$ 877,102	\$ 932,552
Other real estate loans receivable	192,938	190,977	191,579	193,999
Equity securities	111	111	1,608	1,608
Cash and cash equivalents	631,681	631,681	269,265	269,265
Restricted cash	90,611	90,611	77,490	77,490
Non-real estate loans receivable	289,168	277,601	223,627	241,544
Foreign currency forward contracts, interest rate swaps and cross currency swaps	191,357	191,357	7,205	7,205
Equity warrants	30,436	30,436	41,909	41,909
Financial liabilities:				
Borrowings under unsecured credit facility and commercial paper program	\$ —	\$ —	\$ 324,935	\$ 324,935
Senior unsecured notes	12,437,273	11,381,873	11,613,758	13,139,748
Secured debt	2,110,815	2,054,889	2,192,261	2,252,107
Foreign currency forward contracts, interest rate swaps and cross currency swaps	55,727	55,727	39,296	39,296
Redeemable DownREIT unitholder interests	\$ 75,355	\$ 75,355	\$ 153,098	\$ 153,098

Items Measured at Fair Value on a Recurring Basis

The market approach is utilized to measure fair value for our financial assets and liabilities reported at fair value on a recurring basis. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets or liabilities. The following summarizes items measured at fair value on a recurring basis (in thousands):

	Fair Value Measurements as of December 31, 2022			
	Total	Level 1	Level 2	Level 3
Equity securities	\$ 111	\$111	\$ —	\$ —
Equity warrants	30,436	—	—	30,436
Foreign currency forward contracts, interest rate swaps and cross currency swaps, net asset (liability) ⁽¹⁾	135,630	—	135,630	—
Totals	\$166,177	\$111	\$135,630	\$30,436

(1) Please see Note 12 for additional information.

WELLTOWER INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The following table summarizes the change in fair value for equity warrants using unobservable Level 3 inputs for the years presented (in thousands):

	Years Ended	
	December 31, 2022	December 31, 2021
Beginning balance	\$41,909	\$ —
Warrants acquired	—	32,419
Mark-to-market adjustment	(6,837)	10,361
Foreign currency	(4,636)	(871)
Ending balance	\$30,436	\$41,909

The most significant assumptions utilized in the valuation of the equity warrants are the cash flows of the underlying HC-One Group enterprise, as well as the terminal capitalization rate of 10.5%.

Items Measured at Fair Value on a Nonrecurring Basis

In addition to items that are measured at fair value on a recurring basis, we also have assets and liabilities in our balance sheet that are measured at fair value on a nonrecurring basis that are not included in the tables above. Assets, liabilities and noncontrolling interests that are measured at fair value on a nonrecurring basis include those acquired or assumed. Asset impairments (if applicable, see Note 5 for impairments of real property and Note 7 for impairments of loans receivable) are also measured at fair value on a nonrecurring basis. We have determined that the fair value measurements included in each of these assets and liabilities rely primarily on company-specific inputs and our assumptions about the use of the assets and settlement of liabilities, as observable inputs are not available. As such, we have determined that each of these fair value measurements generally resides within Level 3 of the fair value hierarchy. We estimate the fair value of real estate and related intangibles using the income approach and unobservable data such as net operating income and estimated capitalization and discount rates. We also consider local and national industry market data including comparable sales, and commonly engage an external real estate appraiser to assist us in our estimation of fair value. We estimate the fair value of assets held for sale based on current sales price expectations or, in the absence of such price expectations, Level 3 inputs described above. We estimate the fair value of loans receivable using projected payoff valuations based on the expected future cash flows and/or the estimated fair value of collateral, net of sales costs, if the repayment of the loan is expected to be provided solely by the collateral. We estimate the fair value of secured debt assumed in asset acquisitions using current interest rates at which similar borrowings could be obtained on the transaction date.

18. Segment Reporting

We invest in seniors housing and health care real estate. We evaluate our business and make resource allocations on our three operating segments: Seniors Housing Operating, Triple-net and Outpatient Medical. Our Seniors Housing Operating properties include seniors apartments, assisted living, independent living/continuing care retirement communities, independent supportive living communities (Canada), care homes with and without nursing (U.K.) and combinations thereof that are owned and/or operated through RIDEA structures (see Note 19). Our Triple-net properties include the property types described above as well as long-term/post-acute care facilities. Under the Triple-net segment, we invest in seniors housing and health care real estate through acquisition and financing of primarily single tenant properties. Properties acquired are primarily leased under triple-net leases and we are not involved in the management of the property. Our Outpatient Medical properties are typically leased to multiple tenants and generally require a certain level of property management by us.

WELLTOWER INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

We evaluate performance based upon consolidated NOI of each segment. We define NOI as total revenues, including tenant reimbursements, less property operating expenses. We believe NOI provides investors relevant and useful information as it measures the operating performance of our properties at the property level on an unleveraged basis. We use NOI to make decisions about resource allocations and to assess the property level performance of our properties.

Non-segment revenue consists mainly of interest income on cash investments recorded in other income. Non-segment assets consist of corporate assets including cash, deferred loan expenses and corporate offices and equipment among others. Non-property specific revenues and expenses are not allocated to individual segments in determining NOI.

The accounting policies of the segments are the same as those described in the summary of significant accounting policies (see Note 2). The results of operations for all acquisitions described in Note 3 are included in our consolidated results of operations from the acquisition dates and are components of the appropriate segments. All inter-segment transactions are eliminated.

WELLTOWER INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Summary information for the reportable segments (which excludes unconsolidated entities) during the years ended December 31, 2022, 2021 and 2020 is as follows (in thousands):

19. Income Taxes and Distributions

We elected to be taxed as a REIT commencing with our first taxable year. To qualify as a REIT for federal income tax purposes, at least 90% of taxable income (excluding 100% of net capital gains) must be distributed to stockholders. REITs that do not distribute a certain amount of taxable income in the current year are also subject to a 4% federal excise tax. The main differences between undistributed net income for federal income tax purposes and financial statement purposes are the recognition of straight-line rent for reporting purposes, basis differences in acquisitions, recording of impairments, differing useful lives and depreciation and amortization methods for real property and the provision for loan losses for reporting purposes versus bad debt expense for tax purposes.

Cash distributions paid to common stockholders, for federal income tax purposes, are as follows for the periods presented:

	Year Ended December 31,		
	2022	2021	2020
Per share:			
Ordinary dividend ⁽¹⁾	\$2.4400	\$1.4828	\$1.6389
Long-term capital gain/(loss) ⁽²⁾	—	0.8371	1.0611
Return of capital	—	0.1201	—
Totals	<u>\$2.4400</u>	<u>\$2.4400</u>	<u>\$2.7000</u>

(1) For the years ended December 31, 2022, 2021 and 2020, includes Section 199A dividends of \$2.4400, \$1.4828 and \$1.6389 respectively.

(2) For the years ended December 31, 2022, 2021 and 2020, includes Unrecaptured Section 1250 Gains of \$0.0000, \$0.4523 and \$0.3458, respectively.

WELLTOWER INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Our consolidated provision for income tax expense (benefit) is as follows for the periods presented (in thousands):

	Year Ended December 31,		
	2022	2021	2020
Current tax expense	\$ 18,289	\$10,199	\$11,358
Deferred tax benefit	(11,042)	(1,486)	(1,390)
Income tax expense (benefit)	\$ 7,247	\$ 8,713	\$ 9,968

REITs generally are not subject to U.S. federal income taxes on that portion of REIT taxable income or capital gain that is distributed to stockholders. For the tax year ended December 31, 2022, as a result of ownership of investments in Canada and the U.K., we were subject to foreign income taxes under the respective tax laws of these jurisdictions.

The provision for income taxes for the year ended December 31, 2022 primarily relates to state taxes, foreign taxes, and taxes based on income generated by entities that are structured as TRSs. For the tax years ended December 31, 2022, 2021 and 2020, the foreign tax provision/(benefit) amount included in the consolidated provision for income taxes was \$5,222,000, \$6,787,000 and \$5,777,000, respectively.

A reconciliation of income taxes, which is computed by applying the federal corporate tax rate for the years ended December 31, 2022, 2021 and 2020, to the income tax expense/(benefit) is as follows for the periods presented (in thousands):

	Year Ended December 31,		
	2022	2021	2020
Tax at statutory rate on earnings from continuing operations before unconsolidated entities, noncontrolling interests and income taxes	\$ 35,241	\$ 80,470	\$ 220,252
Increase (decrease) in valuation allowance ⁽¹⁾	30,237	19,383	85,881
Tax at statutory rate on earnings not subject to federal income taxes	(75,729)	(117,931)	(300,196)
Foreign permanent depreciation	2,033	1,449	1,504
Other differences	15,465	25,342	2,527
Totals	\$ 7,247	\$ 8,713	\$ 9,968

(1) Excluding purchase price accounting.

WELLTOWER INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Each TRS and foreign entity subject to income taxes is a tax paying component for purposes of classifying deferred tax assets and liabilities. The tax effects of taxable and deductible temporary differences, as well as tax asset/(liability) attributes, are summarized as follows for the periods presented (in thousands):

	<u>Year Ended December 31,</u>		
	<u>2022</u>	<u>2021</u>	<u>2020</u>
Investments and property, primarily differences in investment basis, depreciation and amortization, the basis of land assets and the treatment of interests and certain costs	\$ (39,212)	\$ (32,616)	\$ (24,085)
Operating loss and interest deduction carryforwards	254,852	247,015	196,634
Expense accruals and other	94,999	53,367	72,459
Valuation allowances	<u>(294,558)</u>	<u>(264,321)</u>	<u>(244,938)</u>
Net deferred tax assets (liabilities)	<u>\$ 16,081</u>	<u>\$ 3,445</u>	<u>\$ 70</u>

On the basis of the evaluations performed as required by the codification, valuation allowances totaling \$294,558,000 were recorded on U.S. taxable REIT subsidiaries as well as entities in other jurisdictions to limit the deferred tax assets to the amount that we believe is more likely than not realizable. However, the amount of the deferred tax asset considered realizable could be adjusted if (i) estimates of future taxable income during the carryforward period are reduced or increased or (ii) objective negative evidence in the form of cumulative losses is no longer present (and additional weight may be given to subjective evidence such as our projections for growth). The valuation allowance rollforward is summarized as follows for the periods presented (in thousands):

	<u>Year Ended December 31,</u>		
	<u>2022</u>	<u>2021</u>	<u>2020</u>
Beginning balance	\$264,321	\$244,938	\$159,057
Expense (benefit)	<u>30,237</u>	<u>19,383</u>	<u>85,881</u>
Ending balance	<u>\$294,558</u>	<u>\$264,321</u>	<u>\$244,938</u>

As a result of certain acquisitions, we are subject to corporate level taxes for any related asset dispositions that may occur during the five-year period immediately after such assets were owned by a C corporation (“built-in gains tax”). The amount of income potentially subject to this special corporate level tax is generally equal to the lesser of (i) the excess of the fair value of the asset over its adjusted tax basis as of the date it became a REIT asset, or (ii) the actual amount of gain. Some but not all gains recognized during this period of time could be offset by available net operating losses and capital loss carryforwards. During the year ended December 31, 2018, we acquired certain additional assets with built-in gains as of the date of acquisition that could be subject to the built-in gains tax if disposed of prior to the expiration of the applicable five-year period. We have not recorded a deferred tax liability as a result of the potential built-in gains tax based on our intentions with respect to such properties and available tax planning strategies.

Given the applicable statute of limitations, we generally are subject to audit by the Internal Revenue Service (“IRS”) for the year ended December 31, 2019 and subsequent years. The statute of limitations may vary in the states in which we own properties or conduct business. We do not expect to be subject to audit by state taxing authorities for any year prior to the year ended December 31, 2018. We are also subject to audit by the Canada Revenue Agency and provincial authorities generally for periods subsequent to May 2018 related to entities acquired or formed in connection with acquisitions, and by the U.K.’s HM Revenue & Customs for periods subsequent to August 2016 related to entities acquired or formed in connection with acquisitions.

At December 31, 2022, we had a net operating loss (“NOL”) carryforward related to the REIT of \$335,293,000. Due to our uncertainty regarding the realization of certain deferred tax assets, we have not

WELLTOWER INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

recorded a deferred tax asset related to NOLs generated by the REIT. These amounts can be used to offset future taxable income (and/or taxable income for prior years if an audit determines that tax is owed), if any. The REIT will be entitled to utilize NOLs and tax credit carryforwards only to the extent that REIT taxable income exceeds our deduction for dividends paid. The NOL carryforwards generated through December 31, 2018 will expire through 2038. Beginning with the tax years after December 31, 2017, the law eliminates the NOL carryback period for REITs, replaces the 20-year NOL carryforward period with an indefinite carryforward period and, with respect to tax years beginning after 2020, limits the use of NOLs to 80% of taxable income.

At December 31, 2022 and 2021, we had an NOL carryforward related to Canadian entities of \$368,979,000 and \$316,821,000 respectively. These Canadian losses have a 20-year carryforward period. At December 31, 2022 and 2021, we had an NOL carryforward related to U.K. entities of \$184,779,000 and \$193,998,000 respectively. These U.K. losses do not have a finite carryforward period.

20. Variable Interest Entities

We have entered into joint ventures and have certain subsidiaries that are wholly owned by consolidated joint ventures which own certain seniors housing and outpatient medical assets which are deemed to be VIEs. We have concluded that we are the primary beneficiary of these VIEs based on a combination of operational control of the entities and the rights to receive residual returns or the obligation to absorb losses arising from the entities. Except for capital contributions associated with the initial entity formations, the entities have been and are expected to be funded from the ongoing operations of the underlying properties. Accordingly, such entities have been consolidated, and the table below summarizes the balance sheets of consolidated VIEs in the aggregate (in thousands):

	<u>December 31, 2022</u>	<u>December 31, 2021</u>
Assets:		
Net real estate investments	\$1,499,078	\$445,776
Cash and cash equivalents	15,582	9,964
Receivables and other assets	<u>9,949</u>	<u>7,617</u>
Total assets ⁽¹⁾	<u>\$1,524,609</u>	<u>\$463,357</u>
Liabilities and equity:		
Secured debt	\$ 155,992	\$163,519
Lease liabilities	1,329	1,324
Accrued expenses and other liabilities	28,417	12,394
Total equity	<u>1,338,871</u>	<u>286,120</u>
Total liabilities and equity	<u>\$1,524,609</u>	<u>\$463,357</u>

(1) Note that assets of the consolidated VIEs can only be used to settle obligations relating to such VIEs. Liabilities of the consolidated VIEs represent claims against the specific assets of the VIEs.

Item 9. *Changes in and Disagreements with Accountants on Accounting and Financial Disclosure*

Not applicable.

Item 9A. *Controls and Procedures*

Disclosure Controls and Procedures

An evaluation was carried out under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the disclosure controls and procedures (as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934, as amended) as of the end of the period covered by this report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the disclosure controls and procedures were effective as of the end of the period covered by this report.

Management’s Report on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a-15(f) of the Securities Exchange Act of 1934, as amended). The Company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles. The Company’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company’s assets that could have a material effect on the financial statements. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management has assessed the effectiveness of the Company’s internal control over financial reporting as of December 31, 2022 based on the criteria established by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) in a report entitled Internal Control — Integrated Framework.

Based on this assessment, using the criteria above, management concluded that the Company’s system of internal control over financial reporting was effective as of December 31, 2022.

The independent registered public accounting firm of Ernst & Young LLP, as auditors of the Company’s consolidated financial statements, has issued an attestation report on the Company’s internal control over financial reporting.

Changes in Internal Control over Financial Reporting

During the third quarter of 2022, we implemented new enterprise resource planning and corporate performance management systems. These implementations resulted in considerable changes to our processes and control environment, including modifications to existing applications, interfaces and reports. The new systems were used during the third and fourth quarter of 2022, and the new and modified processes and controls implemented were used to prepare our consolidated financial statements for the year ended December 31, 2022 included in this report. We will continue to monitor our internal control over financial reporting under the new systems, including evaluating the operating effectiveness of related key controls.

There were no other changes in our internal control over financial reporting (as defined in Rule 13a-15(f) of the Securities Exchange Act of 1934, as amended) that occurred during the fourth quarter of the one-year period covered by this report that materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Report of Independent Registered Public Accounting Firm

To the Stockholders and the Board of Directors of Welltower Inc.

Opinion on Internal Control Over Financial Reporting

We have audited Welltower Inc. and subsidiaries' internal control over financial reporting as of December 31, 2022, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). In our opinion, Welltower Inc. and subsidiaries (the Company) maintained, in all material respects, effective internal control over financial reporting as of December 31, 2022, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets of Welltower Inc. and subsidiaries as of December 31, 2022 and 2021, the related consolidated statements of comprehensive income, equity and cash flows for each of the three years in the period ended December 31, 2022, and the related notes and financial statement schedules listed in the index at Item 15(a) and our report dated February 21, 2023 expressed an unqualified opinion thereon.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects.

Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Toledo, Ohio
February 21, 2023

POWER OF ATTORNEY

KNOW ALL MEN BY THESE PRESENTS, that each of the undersigned, a director or officer of Welltower Inc. (the “Company”), a Delaware corporation, hereby constitutes and appoints Shankh Mitra and Timothy G. McHugh, and each of them, his or her true and lawful attorneys-in-fact and agents, for him or her and in his or her name, place and stead, in any and all capacities, to sign the Annual Report on Form 10-K for the year ended December 31, 2022 to be filed by the Company with the Securities and Exchange Commission under the provisions of the Securities Exchange Act of 1934, as amended, and any and all amendments to such Form 10-K, and to file such Form 10-K and each such amendment so signed, with all exhibits thereto, and any and all other documents in connection therewith, with the Securities and Exchange Commission, hereby granting unto said attorneys-in-fact and agents, and each of them, full power and authority to do and perform any and all acts and things requisite and necessary to be done in and about the premises, as fully to all intents and purposes as he or she might do in person, hereby ratifying and confirming all that said attorneys-in-fact and agents, or any of them, may lawfully do or cause to be done by virtue hereof.

IN WITNESS WHEREOF, the undersigned have hereunto set their hands as of this 21st day of February 2023.

CERTIFICATION OF CHIEF EXECUTIVE OFFICER

I, **Shankh Mitra**, certify that:

1. I have reviewed this annual report on Form 10-K of Welltower Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

FORWARD-LOOKING STATEMENTS

This Annual Report and the Letter to Shareholders contain “forward-looking statements” as that term is defined in the Private Securities Litigation Reform Act of 1995. For example, when we use words such as “may,” “will,” “intend,” “should,” “believe,” “expect,” “anticipate,” “project,” “estimate,” or similar expressions that do not relate solely to historical matters, it is making forward-looking statements. Forward-looking statements are not guarantees of future performance and involve risks and uncertainties that may cause the company’s actual results to differ materially from the company’s expectations discussed in the forward-looking statements. Important factors that could cause our actual results to be materially different from the forward-looking statements are discussed in our Form 10-K under the heading “Risk Factors.” We assume no obligation to update or revise publicly any forward-looking statements, whether because of new information, future events or otherwise, or to update the reasons why actual results could differ from those projected in any forward-looking statements.
